when i am trying to upgrade my iphone to 9.0.2

it keeps saying error 3194 how come im trying evrething to fix this

hamkaastosti - March 29, 2016, 3:36 pm

This error appear the most if iTunes can't connect to the apple servers when restoring. Check your firewall, host file or restore from an other computer.

Ow I'm seeing now that you mention 9.0.2. This firmware is not being signed by apple anymore. So you are out of lock buddy
