Anyone know what happened to Instinct? It was the only group I was interested in.

The group owner Vinnie agreed to leave Hf and to sell his group.

Vinnie's account was closed so the group went with it. Vinnie still received the funds from the payment for the group.

Vinnie sold the group and Icy bought it and he renamed it to Axiom, then he sold the group and got closed, now it's named Fusion and Raptor. is the owner

vinnie died and icy scammed

I missed them too. They were a bunch of idiots but at least they had something going and brought new people to the group scene.

Vinnie sold it to Icy, who then resold it to Glitch after some months
