Thread: [Anyone order from flight club? Need help](#)

Just ordered shoes from flight club and checked out, they charged my paypal account but when I go on my flight club account and click " Your Orders " it says I have no orders. Its pretty weird because they already charged my paypal account and its a completed transaction.

It takes a while to update. Once they check-in your order, it should update. Which pair of sneakers did you buy out of curiosity?

My friend bought yeezys from them. Not sure what's happening though. Maybe they need to process it
