Thread: [Fairy Tail - Dub or Sub?](#)

SkullCandy - March 30, 2016, 7:20 am

I am thinking about starting Fairy Tail; starting a new anime for me is usually a pretty big thing that I don't do often (mostly because they can go for so long that it can end up being a big commitment cough Naruto *cough*). So I want to know which one is better for Fairy Tail, the dub or the sub? I am perfectly fine with sub but if the dub is good then I will happily go with that. Which one do you prefer for this particular anime?

Sure for Fairy Tail i will prefer u dub

It's completely up to you, I've always preferred subbed anime. Mainly because dub is usually really slow talking and it becomes annoying. Also the voice actors for some of the characters are annoying as fuck, i.e, Happy's dub voice actor makes me want to kill myself.

Neither; fairy tail is a sub-par generic anime that shouldn't be watched unless you have nothing better to do really there is a lot more interesting anime to watch IMO. I have watched the whole first series (skipped fillers), was like 175 episodes or so, and kind of regretted it, I watched it all dubbed.

Tbh there is a lot better shounen anime out there to watch, if you must watch it pick your poison, sub or dub eventually when you catch up you'll have to watch sub as the newer episodes are only made in sub, and eventually probably will be dubbed.

Fairy Tail, like its counter-part One Piece, doesn't have serious content in every episode because it's long running. As a manga follower, I don't think FT is anywhere near bad, just that at times, it's overflowed with nakama power, but then again, it's still enjoyable! ?

Well, it really depends on the Dub quality, but i hate Dubbed Anime, Subtitles with the Original sound give me the real feeling of the Anime.

definiety with Subtitles. Dubbed anime looks fake

Subbed it is :) I will give it a go at least; and there was a mention of its counterpart One Piece. I have seen one piece, are they in any way related?

Fuck- encountered my next problem; for some reason Crunchyroll only has the episodes after Funimation took over. So only series two :(
