Need some that wont come out when I run..  
Also that doesnt have a cheap wire etc.

Not looking to spend more than \$50, but I prefer around the \$30 range.

Original HTC Headset One E8 InEar for 12.99€

Very good Sound! but that with the falling out if you run depends on your ears..

Did you try Philips. They are nice or S'heiser.

If they're used purely for running get ones that have wires like this;
