Oscura - March 31, 2016, 4:31 pm

Currently not available for new projects!

Currently only taking BTC!

Please do not PM me without reading the Terms Of Agreement stated below.

Terms Of Agreement, which you accept when working with me.

What you're using the software for, is your issue. I do not take part in action nor am I responsible for the consequences.

If you have multiple (small) projects/assignments: I have to be paid for each part of the whole, after completion of one part.

I require 50% up front, and the other 50% after completion of the project. Refunds are only issued when the software's not working. You will not get back the 50% if you do not want the project while I'm working on it/completed it. If I'm doing a school assignment then I am NOT responsible for trouble you might get with it (plagiarism and such).

No malicious use/ grey/blackhat (account creators, bruteforcers, crypters, ...).

I can cancel any project while working on it. In that case, you will get a full refund.

The TOS can change over time. You will not be personally noticed but you will still agree with them if you decide to take use of my services.
