Thread: [Fallout 4 save corrupted?](#)

Jinx - March 31, 2016, 6:27 pm

Hey guys/gals, I'm hoping someone can help me with this as Microsoft's support told me stupid things (No surprise.)

Okay; the issue I am experiencing is the issue of at the Fallout 4 Main Menu, I click Continue or try to load any of my saves of that character it'll start to load then it'll freeze and crash to the home screen....

Things I've tried: Deleted profile, did power cycle, blah blah
Deleted saved and redownloaded from Cloud, etc.

I'm at this point at a loss and would like any suggestions of what I am hoping to be the solution so I don't need to reset my game. Thanks in advance :Blackhat:

Fer? - April 1, 2016, 12:26 pm

If you get a corrupt Fallout 4 save you have to revert to an older save and just delete that one. Myself and a friend had that happen, I didn't full save a lot just quick saving so I reverted to about 10 hours of game play previous. Was a bit annoying but now I do hard saves frequently.

That is all I know, I wasn't able to find a solution months ago when this happened to me.

Allelujah - April 1, 2016, 1:00 pm

Yeah, you're best bet is to revert to your last save. Lesson learned I hope.

Sorry for your loss, I had this happen to me with my favorite save on Oblivion a long time ago.
