"unbanned ebook" I'm guessing you mean kv right? Lol

Oh you just mean a tutorial well anybody who gets this would need to not be an idiot anyways and do proper researching online to use it properly so I thought a kv would be more important so assumed it was that.

Sorry, 20gb is pretty low you might not get 170 for it, you talking about unbanning jtag? that can also be found online

I will give you \$!50 for it. I know I could get cheaper but I have been looking and you have it ready. Also I like how you offer to give the free paid tools and games with the 20gb Hard Drive. 20 gb is fine for someone like me who only plays a few games anyways. I messaged you back about it so let me know
