I just finished the original + OVA so will be good to keep it going :3 Although I do recommend to everyone out there who likes to watch the actual gore, etc. not to use kissanime since they blocked it out when I watched the first 2 episodes, so I went over to another site.

Show would have been a lot more exciting if it wasn't all about giant cockroaches; the first half was real good but then it seemed like a grind to me; pretty much all of the cocktoaches are the same and there's a fuck ton so it's like there grinding on them the whole series. I hope they add more enemy types or excitement in the next season. There was no issues with the people's powers and such they were cool as well as backstories.

Heard it was garbage compared to the first season already, GG?

It's only one episode and was mostly recapping.
