Appraisal on this please?

Chubs™ aka badman - April 3, 2016, 10:14 am

If you was to sell this in marketplace I'd say \$10 each copy but if you was just to sell one copy I'd say way over \$100.

axel - April 3, 2016, 10:18 am

\$7 a month, \$20 lifetime

Can ger up when it works really well cause I payed \$200 for IG followliker, similar tool with more features

Change and redesign the UI, it's horrible

SIM-2908357 - April 5, 2016, 5:17 pm

Not much, you're competing against massplanner, followliker, and instagress.

Massplanner for \$17 a month allows you to manage unlimited accounts at once, has verification support, tons of modules and settings to fiddle with, constant updates and a better ui.

If you sold this, a good price would be \$5.00/month or \$15 lifetime.

Also your program bots 1 account on instagram.

Massplanner for \$9/Month you can bot 4 accounts in 5 or so social media sites.

You load as many accounts as you want & proxies

Choose your target picture to comment, like OR profile to follow

The accounts you loaded will do the task

So it's basically like botting yourself followers, likes, comments

Since when is FL worth 200? I'm pretty sure it's 99\$

He's actually correct man, MassPlanner is like McDons of fast food and every other guy on HF selling a bot is a Roadside Vendor

Yeah I know, I was just pretty confident that MassPlaner is to grow accounts on auto, not to bot follows/likes/comments

I wouldn't expect the source going for that much either, just curious of the price it COULD be sold at

I wouldn't expect the source going for that much either, just curious of the price it COULD be sold at It does pretty much everything, But I'd suggest you to sell it for 5\$ Monthly as there are a lot of newbies who wants to try out botting.

x - April 5, 2016, 6:19 pm

This is a pretty legit tool , Nice job man!

TRAUMA - April 5, 2016, 6:22 pm

Someone on here's already selling this tool tho

Moneyonly - April 13, 2016, 11:10 am

Hmmmmmm considering this is the program I payed you to custom make for private usage I dont think it would be fine to sell it...

Also it isnt working well at all and the multi threading needs to be fixed and it crashes after 5-10 mins
