Thread: [Keyboard under 100 EUR](#)

Niek - April 2, 2016, 11:58 am

I'm searching for a mechanical keyboard with blue switches that is under 101 EUR, and not 101 USD because i'm from the Netherlands.

Im gonna use the keyboard for CS:GO, H1Z1, GTA V and BO III.

You could get a BlackWidow Ultimate. Loud af but pre satisfying tbh.

I don't like Razer, i think Razer is overpriced.

SubGenius - April 2, 2016, 12:08 pm

It might not look as appealing as a Razer Keyboard but it's good.

Niek - April 2, 2016, 12:15 pm

I think im going for the razer blackwidow ultimate i googled and it is a pretty dope keyboard, but i still thinks it overpriced but idc.

SubGenius - April 2, 2016, 12:15 pm

ohhhh my bad mate, yeah. wrong link.

I was talking about this:

Razer had this intense 50% off sale a while back. Shit sold out pre quick, but I ended up copping an Ultimate and Chroma Deathadder for like 120 Cad.

I would personally suggest a [Ducky One](#). Have you decided on what switch type you would like?

EDIT: I'm assuming MX reds?

Good choice. I personally have the Ducky Shine 4 with MX blues and use them for gaming. If you do get the Ducky One I left some links in case you are interested.

[Ducky One: MX Blue with White LED](#)

sorry again m8.

Steelseries have always served me well.
