Hey, is it just me or has my L33t usergroup and userbar gone off my profile? I haven't been that active lately but I went to my profile and all I see is Ub3r lol? Was l33t ever there or did Omni remove it for some reason? I'm confused to fuck right now ?

You are Uber so that takes away your leet user group. Unless I'm misunderstanding you.

Since I've been here, you can only have uber or leet not both at the same time.

I'm sure it used to show both leet and uber, but didn't show the current group you're using...I must be going crazy

It never showed both. Once you upgrade to uber, you lose leet
