Hi Hackforums! ?

Do you need Active Subscribers & Active Followers?
I mean I want to ?

We are doing Playlist4Playlist & Subbox4Subbox on youtube that way only if people like the content they will subscribe and like your videos. Much better then Sub4Sub that will get your subscribers that don't watch your videos and are not active on your channel.

We are doing RT4RT & LIKE4LIKE on twitter that way only if people like your profile they will follow and they will be active on your profile and Like & RT youe tweets. Much better then Follow4Follow that will get your Followers that don't RT, Like your tweets or interact with you.

When you have done what you want me to do for you then please fill out this format when you reply, thanks

Twitter Profile:
