Ayahuasca - April 3, 2016, 11:07 am

Would love to join, is 1,000,000 hard to earn on Hackercraft?

If you have a decent farm you can easily get 1,000,000.

You can buy \$1mill IGM from those who play for like... \$20-\$25. But if you want to earn it, then it'll probably take like a week or maybe a week and a half.

insurance - April 3, 2016, 11:39 am

Will join hacker craft when I get home and start farming \$ hopefully I will be joining soon

D?edalus - April 3, 2016, 11:39 am

I'm so close...

R3gulate - April 3, 2016, 5:07 pm

This is exactly why I asked moderators about the future cost possibly increasing. I paid 1.5m for it to drop to 1m lmao.

Yeah I replied letting you know that I didn't think it would drop much with the way things were going for the economy and it really hasn't. I mean you got that 100k you needed in no time. And anybody who builds a half decent farm can get 1mill in a weeks time on the server.

FearOfGod - April 3, 2016, 8:25 pm

I just joined the server and I am grinding my ass off to join this group :) hopefully I get guap

Lol, well you can message Riley to buy some IGM as well. I believe he charges \$1/30k which isn't a bad deal imo. But also you can just grind it out :P

If you ever need quick cash, I can sell \$500k IGM for \$7 BTC / PP. Cheapest rates found anywhere.

You are a good portion of why the economy isn't doing well lol. Along with the fact that everyone seems to be afk farming.

It's not my fault that the economy is easy to exploit. However, I am most likely going to buy into this group since it looks pretty dank.

We are still accepting members!

I think this would be better if it wasn't just based around HC, another survival server would be amazing! Let me know.

The group is a Minecraft group so members that have a general interest in the game and community can join. But... we support HC as our main server so we try to promote the server as much we can. And if we say that by playing HC you can get into the group, that brings more attention to HC.

If HC ever goes away again, then we will have our own server. But until then I think it's safe to say that we will stick with HC and support it through our recruitments and events.

chase. - April 8, 2016, 7:34 pm

I think I should be in like my HC swag is 10/10 so if you want someone as cool as me hmu

We will still be accepting these in game payments as a way of joining the Minecrafters. But we do not have any plans for future events or whatnot for the HackerCraft server.

I've updated with a \$50 buyin fee as well.

Audi0 - April 18, 2016, 6:34 pm

Why is this called a recruitment if I have to pay \$50 to get in?

of course you just have to update with a \$50 buyin fee. because accepting in game currency is worthless.

ZerFallen - April 18, 2016, 7:08 pm

Worth buying into if you enjoy Minecraft!

The \$50 is just to try and show people the worth of what IGM should be. I don't plan on anyone actually buying in with BTC.

Chubs™ aka badman - April 20, 2016, 12:15 pm

Still not been able to get in this group. Was bashing HC for a while. Guess I give up.

Just buy IGM off somebody else for like \$10-\$20 to get in. The \$50 part is just to try and help make the currency worth more but I don't see it helping.

Varane - April 20, 2016, 12:50 pm

No. We are a Minecraft group, not a HackerCraft group.

Price has now jumped to \$2million per invite due to so many having the money for this. After

another 2-3 buyins I may raise this to \$3mill or even \$4mill.

It's pretty crazy when you see how little the buyins were compared to now! I bought in for \$350k as I was the second person to buy in and now it costs \$2m.

You'll only get kicked if you break any of the rules listed. So basically stay active in the subforum and don't break HF rules or scam or leak anything.

And no drama... forgot that one lol.

I highly recommend joining this group hurry My assumption is they are no longer are going accept IGM as they did state that they are no longer supporting HackerCraft.
