Lol. Anyway, on the right hand side, there isn't any bots shown, or even "Dervie" (my nick). Is it the botnet source, or what?

/oper user pass

/mode #chan +o yournick

/names #chan

Otherwise, youre S.O.L.

If you can login you can also issue a download command.

I CAN issue an update command, but I just can't see the bot.

Can you see the channel modes? if so it's probably set to +u (hide users) if not the modes are hidden but it's still set +u.
