Thread: [\[Help\] Taskbar, icons, background gone and more \[Windows 10\]](#)

Private Network - April 4, 2016, 6:39 am

So recently I started getting some errors about Run.vbs missing or something when starting up my PC, started to ignore it and then my taskbar, icons, background and I can't right click dissapeared. My solution for that was running explorer.exe as admin from Task Manager.

My problem now is, if I open explorer.exe as admin it opens a folder instead of fixing my shit...

Help?

I'm not sure what might cause this, it may be a RAT they have the feature to hide taskbar, wallpaper, desktop icons. They can block right click also even taskmanager too.

I will suggest just to be 100% sure it's not a malware you should scan your system.

I will suggest these :Eset online scanner

Malwarebytes anti malware

Hitman pro

Zemana Antivirus

I hope this helps

That's why I said "also even taskmanager too", just wanted to let you know that they can disable or change many parts of the system.
