Thread: [CSGOPowerball offering FAKE Giveaways to keep people around!! WARNING to ALL GAMBLERS](#)

IzzyJohnson - April 5, 2016, 4:44 pm

I didnt want to be the one to make this post but what I have just discovered DIRECTLY from the OWNER of CSGOPowerball is that they put of their giveaways even though they do not have the items available beforehand. Then they are scrambling to try and find the items to keep the winners quiet before they cause an uproar. MattyB is the rightful winner of the latest Howl giveaway and has yet to recieve his item.

Heres a log of MOST of the chat

Imao so the MattyB kid isn't even getting the howl? That's bullshit, I don't understand why so many people are defending this owner.

Firebombpk - April 5, 2016, 7:53 pm

How the fuck does a site admin even be this scummy? Even CSGOWild has their giveaways prepped for like the next couple months.

Ken M - April 5, 2016, 8:02 pm

Haha look what is still on their site!

Divined - April 6, 2016, 1:44 am

That is why you should refer to trusted sites that record picking the winner or are known to have hosted legit giveaways.

e.g CSGORumble, CSGOShuffle etc.

1tap - April 6, 2016, 2:01 am

Should post this on reddit, fuck that site.

sweSiM - April 6, 2016, 2:32 am

The fact that I haven't even heard of CSGOPowerball should tell you something. Only play on trusted websites. That website looks like crap too :|

^ This.

Why would you play on such a shady, bad coded site?

Low pots = easy wins for skins to go bet on bigger sites. I kept getting rekt on bigger sites with big pots...

There are many well coded, good looking sites which have low pots / a pot limit. I just don't get why you would choose this one. I'm not surprised something like this happens on such a shady site.

Vitani - April 7, 2016, 5:08 am

Wow it sucks that they scam. They will make alot more money and people if they are just honest.

inoriii - April 7, 2016, 7:20 am

Yeah CSGOPowerball is pretty awful. A few months ago this was one of the few sites that would let you bet cases. A few friends and I went in and started betting cheap cases, I personally won about 300-400\$ on just those bets and a friend of mine won about 200\$ the rest won under a 100\$. From what I gathered their site is badly coded, but I assume since then the problem has been fixed, but it was funny sniping a 100\$ knife with cases. Overall this site has a track record of bad up-keep and horrible ownership. When the site first went live and users started joining they waited over a MONTH to improve their bot/servers to handle their items, sometimes it took 10 minutes to get into a pot.
