Thread: [Won \\$500+ today on Satoshimines](#)

SWS. - April 5, 2016, 9:16 pm

Well for the last week or so I've been playing on <https://satoshimines.com/> on and off a few times every day with small amounts of BTC and each day I would end up with like \$20-\$60 profit which was nice but nothing to get too excited about. Today I decided I would try the method that I'd been using with a larger amount of BTC to see if I could keep up the success and I ended up winning over \$500.

Nah I don't use a bot, I bet manually with the strategy that I use.

No, that's the total amount that I wagered when you add together all of the bets that I made. The most that I wagered in any one bet was around .1 BTC
