T.O.S.

- 1.No Sales Thrashing
- 2.No Refunds Whatsoever.
- 3.You are responsible for what you do with Mailer.
4. All deals to be confirmed on HF before Skype.
5. Supported SMTP = Mandrill , LeaderSend, SMTP.com , Amazon SES
6. You pay for the Mailer only. You pay an extra charge for SMTP servers [\$50 per 500K mails]. SMTP is not included except localhost.
7. I am only responsible for fixing errors with the Mailer and not your SMTP service provider.
8. I can modify the T.O.S. whenever I want.

HelloCreed - April 8, 2016, 1:53 pm

Interested.

Would you be able to provide the smtp for a fee also?

I intend to run this service for as long as I can, after purchase I can assure you at least 1 year of working service as I have hosting bought for 3 years already and your domain lasts for 1 by default.

If after one year you are still using the service (which I hope you will) I will renew your domain without hesitation.

5. Supported SMTP = Mandrill , LeaderSend, SMTP.com , Amazon SES

does that mean we have to provide our own smtp servers for mailing? So this is just online software to manage our lists, but it won't actually send out emails without a 3rd party smtp?

Epicur - April 14, 2016, 7:57 am

Exactly, I do not provide SMTP services, only the software to manage the lists & the campaigns and the method to make it hit 100% inbox regardless of the smtp provider.

NoTail - April 14, 2016, 8:07 am

dude raymond reddington used to sell this shit

and at 50\$ it was overpriced

now you sell this for 75\$?

it is so simple a 5 year old boy/girl can do it within 5 minutes

i can do it for free, but i will not go through the hassle

it's just if you are helping them with your service , make it low

because a 3 minutes work doesnt deserve 75\$

I dont flame,

OP must be some skid

I'm confused if it isn't providing the SMTP server what exactly is this?

So people paying \$75 for someone organizing a few stuff really?

??????? - May 1, 2016, 5:04 am

Dude, you are using (probably a nulled version of the) Interspire email marketer software. What else do you offer? Because it seems like this could be easily setup.

And the 100% inbox method, which will guarantee you that you will hit inbox if you follow my simple rules, and some addons which will make it even easier for you to market your product.

Putting this here to remember!

Thanks.

DaChamp - May 12, 2016, 12:04 pm

I'm assumign this is just an interspire set up? How do you guarantee 100% inbox. I have about 15k emails per day that I need to send so I'd be interested if it works.

How about I send you 15k emails and then you send them out (I will provide the html email and details and everything you need). If it truly is 100% inbox, I'll buy it.

LMK if you're down. PM me your skype if so.

freshyard - May 17, 2016, 12:06 am

Is the method about getting IP reputation ? Something like getting reply from mail list and build a good IP reputation that take few month... ?

If the emails are well built I can guarantee you will hit 100% inbox.

Plus interspire has its way to manage complaints and bounces so it works flawless with Amazon SES or any other SMTP on the list.
