Doesn't feel so good after seeing some others but still, best system/setup I've ever had.

It's an alright chair, it was originally \$250 CAD but it was on sale for \$150 and I ended up getting it for like \$94 or something with Air miles lmao, was a good deal so I picked it up.

Lil Kodak - April 6, 2016, 5:59 pm

Lol i gotta get new curtains for sure.

That and I think you should get a matching second monitor instead of that random one on the right. Personally not having every monitor the same drives me crazy but to each their own.
