Thread: [Stop Buying Gambling Scripts! - READ NOW](#)

?XiS - April 7, 2016, 10:55 pm

This kind of shit has REALLY started to piss me off.

I don't see why people still buy this kind of stuff then complain when they don't earn / lose their money.

You CAN'T make a script that will win you money on Bustabit. You CANNOT. Same with Satoshimines, same with Roulette, same with Blackjack, same with anything. You CAN'T bypass the rape trains.

In every gambling method, no matter what game, even if you're using Martingale, there is a PROBABILITY that you will never win.

So don't listen to claims that scripts WILL make you a profit. Maybe the first 30 seconds you start running it they will, leave it running for a longer period of time, and you WILL lose everything.

Don't get me wrong, I'm saying SCRIPTS won't work. Of course, there will be guides that WILL help. These guides however will explain all the probabilities to you, the odds of you winning, etc, they make give you some advice, but they will NOT claim to be 100% flawless. So seriously, stop wasting your money on that kind of shit, and if you DO want to earn money gambling, take a look at the upcoming script I'm going to be releasing tomorrow (LOL, jk), but go learn how to play Poker / count cards in Blackjack etc.

Poker takes skill (albeit luck is involved too). I advise you to enter tournaments instead of Sit & Go tables, simply because you'll get hooked and lose all your money.

Blackjack is luck, but the knowledge of probabilities as in knowing when to hit, when not to hit is vital too, so go read up some guides on that. It's easy to flip money on Blackjack if you just know some simple tips. Heck, PM me and I'LL help you for free.

Better yet, DON'T GAMBLE. You'll always lose in the long run.

Post your thoughts below please.

Stashyy - April 7, 2016, 10:56 pm

People that buy scripts are the idiots who get sucked into buying ebooks.

Vip?r - April 7, 2016, 10:58 pm

Fact that people believe that they can make money by doing nothing is stupid.

?XiS - April 7, 2016, 10:59 pm

(Apr 7, 2016 10:58 PM)Vip?r Wrote: [\[CITE\]](#) Fact that people believe that they can make money by doing nothing is stupid. Don't get me wrong, money can always be made gambling in the short run. I flipped \$10 into \$110 on Satoshimines the other day.

Then \$10 into \$110 on Bustabit.

Then \$10 into \$95 on Blackjack.

BUT, once you start winning you will want to play more, thinking you can win more. And you end up losing. If you're happy to gamble once, take your potential winnings, and leave and never gamble again, then if you win you'll be in profit. But that won't happen, if you win once you'll always want to keep on playing.

KFC Watermelon - April 7, 2016, 11:25 pm

The house always has the edge. Even if you cash out at 1.01, or play Satoshi Mines and click only 1 square on a 1 mine game, you will eventually lose. Yes, that includes clicking on that single mine 10 games in a row, or bustabit busting at 1.01 10 times in a row, it will EVENTUALLY happen given enough time.

Basically, all outcomes are possible given enough time. Hence why us, human beings, are alive on right now. The chance is incredibly low yet it still happened.

Each round on BustaBit is 100% computer-generated random. How in the hell can pausing after a loss stop a "rape train"? Each round has the same probability of the outcome, pausing won't do anything...

Knucklez. - April 7, 2016, 11:30 pm

I thought people were a little harsh on him last time because he did refund the 1 person that bought it but now this is just sad...

10k games later from the thread he created and hes down 100k bits. rip

SIM-2908357 - April 7, 2016, 11:33 pm

Mr. Black Shadow never learns with his scripts, and people don't either.

Reece Morgan - April 8, 2016, 1:10 am

Anyone smart enough to read (and understand this thread) already knows this information.

But just to be clear, some games can be won on skill such as Blackjack (counting cards..etc) but it's important to recognise the difference between a game which is entirely luck based and a game

which does have some small element of skill to it. Physical games have a lot better odds than those online, and casino's are much more enjoyable.. So if you want to gamble, go to a casino and have a couple drinks but when the fun stops, stop.

The Drama Llama - April 8, 2016, 1:27 am

This. Fucking. Post.

Seriously, if someone posts a script for sale. Just pop this thread in the comments because fuckkkkk people are retarded.

Mr. Robot - April 8, 2016, 1:30 am

I agree completely, I wrote up the math to satoshimines and even played with it for a while.

I lost 6 times in a row once out of 2800 games, over 5000 games I lost 3 times.

When I put real money in, I lost 4 times over 5000 games, 2 times over 1000 games.

Overall I lost \$3.80 as over so many games it did make my cash back but if you cash out before it hits that 6 times in a row, you'll be fine.

Unfortunately you don't know when that next 6 in a row will be so there's that.

Any script for 'sale' should be completely free for all of us to abuse and get rich off. That's how a community works - we are all here to help each other or learn from each other.

? rooq?e ? - April 8, 2016, 1:57 am

I totally agree, was using a paid script awhile ago. Had it running for along time, steadily going up more and more. Then got fucked and lost all. ffs

Knucklez. - April 8, 2016, 2:04 am

When he's good with money
heart emojis

Telstra - April 8, 2016, 2:09 am

They're called gambling sites for a reason, if you buy a script for a gambling site thinking it's guaranteed win you're pretty damn stupid in my eyes.

However they seem to be selling well, so I guess not everyone has common sense.

Sift - April 8, 2016, 2:45 am

Axis you lost my 10\$ in black jack sh.

Jenicke - April 8, 2016, 2:59 am

This is so true, people think a clicker script can make you win.

KaptaiN - April 8, 2016, 5:38 am

Anyone with just a minimal understanding of statistics should know this. People who don't already understand this probably won't be bothered to read threads like this anyways.

Exchange.Service - April 8, 2016, 6:58 am

also if there is a script that works without busting why would anyone sell it lmao

Peeka - April 8, 2016, 7:01 am

As much as I am in agreeence with you, a script can work if it has a brain.

Ryan said himself that the only way to beat bustabit odds is to beat the house edge, which is possible with a script however it needs to be complex. It needs a external database to calculate what someone might bet in a %. Tons of formulas. I stopped building out my bonus script because of this however I do still continue to work on a private version in my free time.

This only applies to bustabit.
Scripts for other services are just luck.

not to mad considering he lost over 7 BTC math proves all scripts will fail

Black Shadow - April 8, 2016, 7:25 am

(Apr 8, 2016 07:04 AM)??? ??? Wrote: [\[CITE\]](#) not to mad considering he lost over 7 BTC math proves all scripts will fail

Who lost over 7 BTC using a script I would like to know?

Edit: Oh I see you mean me well maybe you should have read through the comments on that thread as someone else said the same thing.

Here is my answer the same as I gave him.....

See you are assuming, this is something I really hate people who assume without knowing the full true facts!

I will say this so you understand

I DID NOT WIN THE 13BTC WITH THIS SCRIPT THAT WAS WITH ANOTHER SCRIPT AND I LOST DOING 1BTC BETS.

This script will only make \$20 per day

Cxdde3990xc - April 8, 2016, 8:21 am

People who buy scripts are the same people who buy monetizing e-Book's here

1st Copy : 54\$
2nd Copy: 40,000\$

3rd Copy: 1 billion US dollars

Unsaturated and refund if you don't earn within 30 days and get the fbi to prove it

e?erg1zer - April 8, 2016, 8:37 am

(Apr 8, 2016 07:25 AM)Black Shadow Wrote: [\[CITE\]](#) Who lost over 7 BTC using a script I would like to know?

This script will only make \$20 per day

I'm unsure as to whether or not you actually believe your scripts are perfect & flawless, or if you are just continuing to pretend they are to hook more young users and generate more profits off the ignorant...which is it?

Zen - April 8, 2016, 9:00 am

Anyone who thinks they can 'cheat' a gambling site with a 'strategy' has never passed a basic statistics course

SIM-2908357 - April 8, 2016, 10:10 am

(Apr 8, 2016 09:00 AM)_LLT Wrote: [\[CITE\]](#) Anyone who thinks they can 'cheat' a gambling site with a 'strategy' has never passed a basic statistics course

You dont even need to pass a statistics course, all you can do is a simple google search.

StevesTrolls - April 8, 2016, 12:02 pm

I'm going to agree with this too, it wouldn't be financially viable for sites like SatoshiMines to operate if these scripts or programs managed to work 100% of the time - all they do is automate it, and maybe in some cases get you a decent return, but as soon as you get greedy, that's when you'll lose it.

?XiS - April 8, 2016, 12:45 pm

(Apr 8, 2016 12:02 PM)StevesTrolls Wrote: [\[CITE\]](#) I'm going to agree with this too, it wouldn't be financially viable for sites like SatoshiMines to operate if these scripts or programs managed to work 100% of the time - all they do is automate it, and maybe in some cases get you a decent return, but as soon as you get greedy, that's when you'll lose it. That's what I'm trying to say. Leave ANY script running and you WILL lose.

Cameron - April 9, 2016, 12:13 am

I wish more new members could see this thread. I hate when members get fooled by a members reputation (Black Shadow) and assume they're legit because he has the most on site reputation. You can not ever have a "no lose" script on a gambling site, otherwise they would go broke.

?XiS - April 9, 2016, 12:19 am

(Apr 9, 2016 12:13 AM)Camer?n Wrote: [\[CITE\]](#) I wish more new members could see this thread. Buffy Summers - April 9, 2016, 12:55 am

I've never tried gambling online, but I do see its appeal. However, I find gambling in person to be more fun. The flashing lights, the music, your friends, etc. I remember my first time at a casino. My first bet, I placed 50 on 17 in roulette and won a bunch. Didn't want to stop and now I kind of always have an itch for it. (woohoo addictive personality!)

but yeah, these scripts are silly lol winning is fun and these scripts promise you'll win.. people are dumb enough to believe it. that simple i guess.

ThePsycho - April 9, 2016, 7:26 am

Well I was stupid enough to buy one and regret it to this day , quickly realized that no money without hardwork and thanks for giving me a good laugh at "If u want to make money buy my upcoming script" :D

Maximus Meridius - April 9, 2016, 8:02 am

This thread is beautiful...thanks for helping out the community!

Black Shadow - April 9, 2016, 10:28 am

It's a lesson well learned, don't interrupt the lecture.
Probably bought 1-2 myself before realizing.

?XiS - April 10, 2016, 11:56 pm

Lemme just take this back to the top real quick.

Night Fury - April 11, 2016, 1:26 am

Human greed can get people to fall for things that aren't logical. I've seen some of these offerings, and they don't sell themselves alone. The customers must make themselves believe that these scripts will work despite all odds. We all want something that will beat the system and set us up with that vacation home on the beach. It doesn't exist, but that doesn't mean people won't sell something that promises that.

?XiS - April 11, 2016, 1:40 am

(Apr 15, 2016 02:17 PM)?XiS Wrote: [\[CITE\]](#) If only I understood ANYTHING of what you just said. ? Well for one, counting cards & basic strategy enables the probability to be in your favor, and for roulette if you were to put \$5 on 1st 12 and \$5 on 2nd twelve (really any 24 numbers works..) (Assuming double 0, 24/38) Probability is on you.

Pseudo Random Number Generators exist because a seed is required. This seed is not random, and can be predicted, therefore any pseudo random number generator has it's flaws.

Although since true random number generators exist because of quantum phenomena, photoelectric effect generation through particle emission, since we don't clearly understand the quantum phenomena, the numbers generated can be considered random.

random.org provides an example.

Congratulations, you can simulate the martingale concept on a 50/50 system, you've just proved how fucking retarded you are.

Need I explain why doubling up is the preferred choice for a person with a high bank roll? Or are too stupid to grasp the concept?

The fact that you can't even comprehend what i'm on about says enough about your comprehension.

Need I explain why doubling up is the preferred choice for a person with a high bank roll? Or are too stupid to grasp the concept? How does doubling help increase the chances of you winning, what the fuck are you on about?

The only way doubling up will help you is if you have UNLIMITED bankroll. Fucking hell you must really be a different kind of stupid.

Where did I specifically say it would increase your chances of winning?

You stated: Ahh, yes I do that in roulette sometimes, but you need to win twice in order to cover one loss.

That's incorrect, you don't need to win twice in fact it's undefined. Depending on what you bet, and if you lose, it could take you more wins, and more wins, and more wins, etc.

But the point is, you don't need to win twice.

If i were to put \$5 on 1st 12 and \$5 and 2nd 12 and lose both, I've lost \$10. What do i do? I'll just double up my bet.

\$10 on 1st 12 and \$10 on 2nd 12

it's a 2:1 pay out.

If i win on 1st I get 10 + 10 + 10. I'll let you do the math here, i know you can do it!

I've just recovered from my loss, wow! It's ok people are worse at math than you. Actually correct that, no one is worse than you. Not even my nephew with down syndrome.

I've just recovered from my loss, wow! It's ok people are worse at math than you. Actually correct that, no one is worse than you. Not even my nephew with down syndrome. So essentially it's still the same fucking result.

But again, there's a chance of you never winning.

Yes, that's pretty much acknowledged from the probability I gave you.

It was a joke calling you a broke fuck, for the sake of the argument, because you didn't need to win twice to come back.

Then you took it to the heart...

Then you took it to the heart...I spent the last 2 days arguing with BlackShadow AKA Mr Mathematics, I'm so tired I've been taking everything seriously recently.

Nadisty - April 15, 2016, 3:39 pm

I feel as if blackshadow is the cause of all of this... Or why this thread was created.

?XiS - April 15, 2016, 3:40 pm

(Apr 15, 2016 03:39 PM)Nadisty Wrote: [\[CITE\]](#) I feel as if blackshadow is the cause of all of this... Or why this thread was created. Correct.

And look who the winner is.

Me :)

He done fucked up ahhahaha and he had to close his thread.

The Illusionist - April 15, 2016, 3:42 pm

I've been saying this about gambling scripts for a long time; They infact have a VERY low chance of losing. But these scripts run for 24 hours a day, placings thousands of bets a day. If you do a million bets you'll see that the very low chance of losing gets pretty big overtime.

?XiS - April 15, 2016, 3:44 pm

Exactly what I've been trying to say.

Nice Net Bro - April 16, 2016, 4:46 pm

"Never lose whit gambling" anyone who believes that is stupid tbh.

Still tough blackshadow tried so hard selling his script i hope no one got ripped off by him.

?XiS - April 17, 2016, 7:42 am

BITW - April 18, 2016, 3:18 am

Appreciate OP's Post and these are correct words.

?XiS - May 1, 2016, 7:25 pm

Just bumping this because I know what's about to come...

topdog77 - May 1, 2016, 7:33 pm

I would hope people don't buy these but evidently from this thread, people do.

Quite unforunate.

?XiS - May 30, 2016, 4:45 pm

Lemme take this HQ thread back to the top.

Credit to Black Shadow cause my lazy ass won't search all those.

But these scripts need to come to an end. If they worked they wouldn't be for sale. If they worked the sites would not be available because they will lose too much money. AXiS is a virgin

?XiS - June 25, 2016, 4:04 am

Aaaaaaaaaaand time to take this to the top again because of certain retards.

Yaniel - June 25, 2016, 4:13 am
