Thread: [Thread DragDrop Image Uploader](#)

SIM-1676753 - April 7, 2016, 11:29 pm

Drag an image to upload to imgur and automatically input the MyBB code for it onto the textarea.

Screenshots: [\(Click to View\)](#)

[Full Script \(GitHub\)](#)

If you're using the WYSIWYG Editor by Hash G.: [\(Click to View\)](#)

and if you're not:

[\[Userscript\] Live post editor for HF | No need to edit BBCode yourself anymore! | WYSIWYG - Hash G.](#)

Hash G. - April 8, 2016, 8:54 am

This is dope, good job Trvp!

Crory - April 8, 2016, 8:57 am

That's actually a pretty good Idea good job! ?

Ooze - April 8, 2016, 8:57 am

Saw this in your recruitment and IM currently using it

Thanks

SIM-1676753 - April 8, 2016, 3:27 pm

Thanks for all the feedback.

void account - April 21, 2016, 11:26 am

Nice script you have here. Very efficient and good decision in the upload destination (Imgur). ?

Bluntmeh - June 6, 2016, 3:40 pm

Wow, this is such a great tool mate thanks so much for this I am loving it and going to use it now all the time. Really takes away the headache of uploading the picture.

Aveling - June 6, 2016, 3:43 pm

Oh damn, this is a feature I would never have thought about, nicely done!

SIM-1676753 - June 6, 2016, 4:52 pm

You are very welcome. Enjoy!

Hopsin - June 7, 2016, 3:17 pm

This is awesome, too bad I don't use imgur anymore. Is API always required from the image hosting

? Since this is very nice.

SIM-1676753 - June 7, 2016, 5:29 pm

(Jun 7, 2016 03:17 PM)Hopsin Wrote: [\[CITE\]](#) This is awesome, too bad I don't use imgur anymore. Is API always required from the image hosting ? Since this is very nice.

It's easier to use the API to upload images to imgur. Using the non-api version could be implemented, but this should suffice. Other hosts can be implemented.

M?xim - June 7, 2016, 5:33 pm

Oh this is pretty neat, especially for those who are contributing in the free graphics section a lot. Good job Virility.

Also I have to ask, if you are able to code things like these. Are you able to write a script that notifies you in your web browser when you get a private message or someone reps you or whatever. Would it be easy to make? I don't know much about these things.

SIM-1676753 - June 7, 2016, 5:37 pm

I can and others have made userscripts that checks if you got rep. Is it difficult to make? No, not really.

+mK - June 8, 2016, 3:26 pm

Edit: Holy shit, that's cool man. Didn't know I needed this, but this is great.

One small bug I saw, and it's mostly just because nobody would probably ever be in this situation, but this doesn't work when you drag and drop an image into a "Preview post".

Edit #2:

Here's a link for example:

<https://hackforums.net/newreply.php?tid=5230469&processed=1>

Nice job, since you mentioned the "editor" plugin from another user, can you also add the thread url of his plugin for easier navigation ? Keep it up!

Michael - June 9, 2016, 9:23 am

That's actually a very nice extension OP!

Going to download and install it now and I'm also going to test it.

These userscripts are getting handier by day.

+mK - June 9, 2016, 9:48 am

(Jun 9, 2016 09:21 AM)Hopsin Wrote: [\[CITE\]](#) Nice job, since you mentioned the "editor" plugin from another user, can you also add the thread url of his plugin for easier navigation ? Keep it up!

Here you go:

[\[Userscript\] Live post editor for HF | No need to edit BBCode yourself anymore! | WYSIWYG - Hash G.](#)

Hopsin - June 9, 2016, 10:24 am

I know thanks but I meant OP to add this link to the OP since he mentioned him ?

SIM-1676753 - June 9, 2016, 1:23 pm

Appreciate it.

Edit:

Done.

SIM-1676753 - June 12, 2016, 8:35 am

The new update uses [vgy](#) as a second host, but unfortunately you'll have to use a [beta](#) version of Tampermonkey.

This is because the GM_xhr fix was only added to the beta version.

<http://tampermonkey.net/changelog.php?version=4.1.5240&ext=gcal&show=gcal>

Edit:

The beta version of Tampermonkey is now the one that I use. If the update doesn't work for you, change the host to "imgurbase64" and it should work for the stable version. Reason being it takes extra time to convert the image to base64. Uploading raw data is much faster because it don't have to convert anything.

+mK - June 13, 2016, 11:04 pm

Link in the OP is broken. Use this:

<https://gist.github.com/MrTrvp/1d52d7eb2c1a5b068a0e26b82041d253/raw/fee08a66d4cde3b69162a1cb00fbf041b6ddcdc8/HackForums%2520-%2520Thread%2520DragDrop%2520Image%2520Uploader.user.js>

Darkwin - June 13, 2016, 11:06 pm

omg that just changed my whole browsing experience, Usually i was too lazy to upload to imgur then link but this is GREAT!!

SIM-1676753 - June 14, 2016, 7:22 am

Enjoy the script bud.

Meow - July 12, 2016, 9:21 am

Link is dead, anyone got new one? ?

clawd31 - July 12, 2016, 5:09 pm

Yup, the link isn't working for me too :/

poeja - August 3, 2016, 4:07 pm

Hai, nice share

But, can you add the loading progress to it?

B?ker - August 3, 2016, 4:09 pm

Yo what theme is that? it looks sexy af

Hash G. - August 5, 2016, 6:52 am

(Aug 3, 2016 04:09 PM)Mr-Dark Wrote: [\[CITE\]](#) Yo what theme is that? it looks sexy af
Flat Darkness by iHydra.

Xerotic - August 12, 2016, 10:40 am

Awesome userscript. Cool to see such interesting ideas pop up in here like this.

(Aug 3, 2016 04:07 PM)poeja Wrote: [\[CITE\]](#) But, can you add the loading progress to it?
Sounds like a good idea for the people with slow connections.

Bluffer - *August 13, 2016, 1:50 am*

Just found out about this script and damn do I ever need it, thank you for making it!

Purple Kief - *August 14, 2016, 6:35 am*

Does this work for Firefox?

Can't seem to get it to work.
