I'm going to try and keep adding more to make a full set.

Any specific colors or themes you would like to see? HMU.

As for being on topic, I'd like to say that, they're okay imho... But could be improved and done a lot better, it's good for a first try, and you should definitely continue and try and hopefully improve your skills.

Good luck in the future OP, hope to see some stuff in the future.

You should probably make them transparent.

I've added some more. Sorry I don't make them transparent, it interferes with the color pallet.
