Thread: [\[FREE VPN\] - AES Encrypted - ZERO Logging - DDoS Protected - Offshore \[TEMPORARY\]](#)

BlueRDP - April 9, 2016, 12:16 pm

I'm busy setting up new servers for my upcoming project. This time you can get free access to my VPN. It is temporary (3-4 weeks) so FULL = FULL!

I'm 100% serious about this, it is 100% free and it has the features listed underneath. I'm willing to show my setup & code to any hackforums staff members if needed.

Features:

- All traffic is AES encrypted
- Zero logging
- DDoS Protected
- Offshore

Send me a PM and fill in this form - I'll reply ASAP!:

Quote:Username you want:

Password you want:

Do you know how to install and setup OpenVPN?: [YES/NO]

After the DM, add me on skype and I'll confirm your account + send you the config files!

My skype username is: LeQWD2

(this is because I can't reply yet until I got 25 posts)...

I ONLY ACCEPT USERS WITH A MINIMUM POST COUNT OF 20 AND YOUR ACCOUNT NEED TO BE OLDER THAN 1 WEEK!

?

DDoS Yah Dig? - April 9, 2016, 1:19 pm

I'll hit you up for this, thanks man.

BlueRDP - April 9, 2016, 1:25 pm

Seems like I can't reply on DMs because of low post count.

For the people who DM'ed me, after you send me a DM, add me @ skype and I will confirm your account + send the config files.

Add me at skype: LeQWD2

Push. Enough space for new users.

BlueRDP - April 11, 2016, 1:18 am

Push. There are still VPN slots available.

DDoS Yah Dig? - April 11, 2016, 1:19 am

Works great, pretty fast too!

[img]http://www.speedtest.net/result/5241525078.png[/img]

Thanks again

fakb0i - April 11, 2016, 1:21 am

I would like to have this.

PM me thanks.

BlueRDP - April 11, 2016, 1:24 am

PM me thanks.

Send me a PM with the form stated above (check OP).

After that, add me at Skype: LeQWD2 for activation and config files.

Sorry for the hassle, can't DM yet ?.

LEEWAY IS BACK @fedbait - April 11, 2016, 1:29 am

Can you tell us more about the VPN. Any proof theirs no logging? Does this allow port forwarding? Doesn't seem v/ safe that you're asking the public to send the user and pass you should randomly generate a string and send it to them.

BlueRDP - April 11, 2016, 1:38 am

There is no logging, if you want proof ask a HF STAFF member and i'll show the setup and code to them.

Why is it not safe? What is the difference lol?

They generate their own password and they let me know, I push it in to the database, done.

If I was going to generate one for them, it would still be the exact same situation right?

Anyhow, I do understand what you try to say. I'm launching a website soon, this is just a test if everything is working alright.

?

Wrong you're missing my point the fact you're requesting a password not all HF members are cyber smart and will probably give you there main password. Just saying it would be better customer satisfaction to generate a password to be safe.

Thanks for your message. I will let them choose their password. I don't think people who are interested in a VPN are so stupid to use their main password ;).

Niko - April 11, 2016, 12:34 pm

Just got it.

This is actually really nice, thanks!

Glad that I helped you out :).

There are still VPN slots available! Just send me a PM with your preferred user/pass and I will reply ASAP!! ??

Port 666 is open for some devil shit. Hahah ?.

Just send me a PM with your preferred user/pass and I will reply ASAP!!!
Still available! You will be amazed by its quality and speed.

Nice to hear that you're enjoying it!

There is still enough space for everyone. Just send me a PM with the user/pass you want and I will reply ASAP with the config files.

This service is over. Thanks for the users who signed up! I had some good testing.
