

Forum:[Hack Forums](#)

Thread: [Live post editor for HF | No need to edit BBCode yourself anymore! | WYSIWYG](#)

Hash G. - April 9, 2016, 1:27 pm

This script adds a Live Editor (what you see is what you get) to the Quick Reply mode on HackForums.

Preview: Image ([Click to View](#))

Gif ([Click to View](#))

Known bugs:Doesn't work with the Full Reply mode or edit mode.

When you use the multiquote feature, you must click outside of the textarea to correctly insert the quotes.

To add some buttons back, you need to reset it and then manually remove those you don't want while keeping carefully the buttons you want to keep.

To do:Rainbow text

New theme

Links detection

Links "improver"

Improve spoiler tag

Improve font size

Your suggestion here

Suggestions added ([Click to View](#))Alt+S post the message // Done in v0.1.11

Remove text once the post is done. // Done in v0.1.9

Add hr // Done in v0.1.8

Add settings // Done in v0.1.8

Add tab+enter support // Done in v0.1.7

Add IG support // Done in v0.1.7

Add emotes support // Done in v0.1.6

Improve the code button // Done in v0.1.5

Change styling of links // Done in v0.1.4

Add a color choice // Done in v0.1.3

Install:

Credits and huge thanks to the [WYSIBB](#) team, this script wouldn't be there without them. Feel free to suggest anything and report every bug you may find.

stackoverflowin - April 9, 2016, 1:35 pm

This is nice work, Hash G.

Matt AH - April 9, 2016, 1:37 pm

Great work Hash. Will utilize no doubt

Walt Disney™ - April 9, 2016, 1:45 pm

The code button isn't working very well. It works for making a code, but it's invisible from view.

Code cats

Nonetheless amazing plugin. Will be using it.

johnnathontaylor - April 9, 2016, 1:47 pm

dank as fuck

Krave - April 9, 2016, 1:47 pm

Nice release man. I will be using this.

Remix - April 9, 2016, 1:48 pm

Really nice m8

Thanks for it

Durham - April 9, 2016, 1:51 pm

Very nice script Hash! Good job!

ZerFallen - April 9, 2016, 1:54 pm

Very nice addition sir! ?

SIM-1676753 - April 9, 2016, 3:03 pm

My [userscript](#) is compatible as so:

Spoiler ([Click to View](#))

Hash G. - April 9, 2016, 3:33 pm

Pushed a small update to remove the spellcheck and improve the quote button - still working on it though.

Peeka - April 9, 2016, 3:34 pm

You know me so well. Thanks a bunch hash!

Retribute - April 9, 2016, 3:37 pm

This is great, thanks for this.

Peeka - April 9, 2016, 3:38 pm

Yea I have been waiting for him to release this. Going to make threads much easier haha.

K3njii - April 9, 2016, 8:52 pm

Love it, seems to be working fine. Thanks!

Mr Kewl - April 9, 2016, 9:04 pm

Really good stuff, gonna be wasted once we upgrade to 1.8

Remix - April 10, 2016, 3:33 am

(Apr 9, 2016 03:03 PM)Mr. Trvp Wrote: [CITE](#) My [userscript](#) is compatible as so:

Spoiler ([Click to View](#))

Yeah but just works if you activate the BB code :/

PrivateDonut - April 10, 2016, 3:37 am

Oh I really like this user script, I no longer have to go into the full editor to use bbcodes easier!
Thank you for the userscript!

K3njii - April 10, 2016, 8:23 am

Could you guys add it so theres a font color?

Thanks in advance.

Hash G. - April 10, 2016, 9:50 am

(Apr 9, 2016 09:04 PM)Mr Kewl Wrote: [\[CITE\]](#) Really good stuff, gonna be wasted once we upgrade to 1.8

I should of have checked this before ;_;

(Apr 10, 2016 08:23 AM)K3njii Wrote: [\[CITE\]](#) Could you guys add it so theres a font color?

Thanks in advance.

It was added. You may download the update using the button in the OP.

minimalist - April 10, 2016, 9:55 am

Just trying out this editor. It looks like there's a few bugs (should I list 'em out?) but...
This looks like it was well-made.

It sucks.

[Thread Link](#)

(Apr 10, 2016 09:59 AM)Hash G. Wrote: [\[CITE\]](#) Go ahead, I would really appreciate it.Spoiler_begin & spoiler_end breaks whenever you type something into them and then delete

YouTube tag apparently doesn't close properly

Probably nitpicking, but the YT tag is [``video=youtube`] instead of the recommended [``yt`]
forgot

K3njii - April 10, 2016, 1:44 pm

(Apr 10, 2016 09:50 AM)Hash G. Wrote: [\[CITE\]](#) I should of have checked this before ;_;

It was added. You may download the update using the button in the OP.
Thanks so much ?

Hopsin - April 10, 2016, 1:45 pm

Thanks for sharing buddy! Much appreciated, using at the moment.

Peeka - April 10, 2016, 1:47 pm

Idea suggestion:

Add smarter link detection for when people accidentally type commas or dots after a link.

PS: I promise I did not steal your avatar look

Hash G. - April 11, 2016, 8:36 am

(Apr 10, 2016 10:30 AM)Minimalist Wrote: [\[CITE\]](#) YouTube tag apparently doesn't close properly
It closes properly on my end. Not sure what you mean.

Minimalist Wrote:Probably nitpicking, but the YT tag is [``video=youtube]` instead of the recommended [``yt]`
Fixed.

Also changed the color of links.

Mint - April 12, 2016, 11:19 am

Not a serious bug, but this shows up really fast when loading up the plugin.
?

Audio0 - April 12, 2016, 3:51 pm

ty so much for this!! Good addition! Put autocorrect doe plez hehe.

PrivateDonut - April 12, 2016, 3:52 pm

I really think this script is bad...

Joking, I really like it. I have been using it for a few days now. I wish it had the emotes added into it.
?

Hash G. - April 12, 2016, 3:58 pm

(Apr 9, 2016 01:45 PM)Walt Disney™ Wrote: [\[CITE\]](#) The code button isn't working very well. It works for making a code, but it's invisible from view.

Should work fine now. Avoid clicking the code button, writing your code and re-clicking it. Instead, copy (or write) it, select it and click the button.

(Apr 12, 2016 11:19 AM)Mint Wrote: [\[CITE\]](#) Not a serious bug, but this shows up really fast when loading up the plugin.

-snip-

It should not do that again. The loading time is almost instant on my end so I disregarded this bug.

(Apr 12, 2016 03:52 PM)PrivateDonut Wrote: [\[CITE\]](#) I really think this script is bad...

Joking, I really like it. I have been using it for a few days now. I wish it had the emotes added into it.

?

Thanks! The emotes were added on my to do list.

PrivateDonut - April 12, 2016, 3:59 pm

(Apr 12, 2016 03:58 PM)Hash G. Wrote: [\[CITE\]](#) Thanks! The emotes were added on my to do list. You're welcome! I can't wait to see emotes added. Keep up the good work!

Jacoder23 - April 12, 2016, 10:38 pm

Thank you! Thank you so much!

(Ok so maybe I overreacted but, THANK YOU!!!)

Sadistic - April 13, 2016, 11:20 am

Still trying to make quotes work, otherwise nice work.

Edit: Found out how

Hash G. - April 13, 2016, 1:31 pm

Emotes are now supported. If you have any suggestions, feel free to post it on this thread!

Hunting Rifle - April 13, 2016, 1:33 pm

So many vouches and thanks but no votes on the thread, smh tbh fam.

TRAUMA - April 13, 2016, 1:52 pm

This is fucking dope. Why have I just now found this?

zilo.hf

<3

Frankey - April 13, 2016, 1:53 pm

Great! I'm using it right now! :P

Varane - April 13, 2016, 2:01 pm

I am really thankful that you have made this.

Cryptic™ - April 13, 2016, 2:05 pm

testing it out. this is dope

Update: Installed it, this script is dope.

Ooze - April 13, 2016, 2:08 pm

Glad to see this working with some of my other scrips I have running

Why cant I hit enter to go down a line?

Really annoying

Eternal. - April 13, 2016, 2:28 pm

Looks great, thank you for your contribution!

Sadistic - April 13, 2016, 3:15 pm

SPOILER_START

Cant get spoilers to work

SPOILER_END

Hash G. - April 13, 2016, 3:17 pm

(Apr 13, 2016 03:15 PM)Nvidia GTX 980 TI Wrote: [\[CITE\]](#) SPOILER_START

Cant get spoilers to work

SPOILER_END

You need to type the text, select it and then click the Spoiler button.

But spoilers are shitty, I'm trying to find a way to improve them.

Freebooter - April 13, 2016, 7:53 pm

Fantastic script nice job [Hash G.](#)

stackoverflowin - April 14, 2016, 8:44 am

You should add an option for scored through text.

Cryptic™ - April 14, 2016, 12:53 pm

If I paste URL's it does not make them clickable

<https://hackforums.net/member.php?action=profile&uid=1>

Also when I use quick reply I like to press tab then space to post what I wrote, this breaks that ? other than that it's awesome

Freebooter - April 14, 2016, 1:00 pm

Script was very good but i had to uninstall it as Firefox spell checker stop working with the script.

Hash G. - April 14, 2016, 1:01 pm

(Apr 14, 2016 08:44 AM)stackoverflowin Wrote: [\[CITE\]](#) You should add an option for scored through text.

It is already in.

(Apr 14, 2016 12:53 PM)Cryptic™ Wrote: [\[CITE\]](#) If I paste URL's it does not make them clickable
<https://hackforums.net/member.php?action=profile&uid=1>

Also when I use quick reply I like to press tab then space to post what I wrote, this breaks that ? other than that it's awesome

I just added it to my todo list.

(Apr 14, 2016 01:00 PM)Freebooter Wrote: [\[CITE\]](#) Script was very good but i had to uninstall it as Firefox spell checker stop working with the script.

This is actually my fault - a mistake. The autocorrect will be added back in the next version.

\$lick - April 14, 2016, 3:09 pm

I was told to post here by Hash G via Skype.

The script bug has been patched thanks Hash G.

Freebooter - April 15, 2016, 5:32 pm

I thing after patching in my view last bug of your script your script should be mention as perfection. The last bug is when linking URL and URL display text some how even text after link is treated as part of the link that is place on textarea and to break the chain one needs to either enable BBCode or this wont work always enter the text at next line and to place next to link one need to use backspace key. From below link you can see WhiteHatForums is the link but the text "after link" also treated as link which is not hopefully there is a simple fixes for this minor bug if not i can leave with it.

Here's an update

Using that, thanks remix.

Leroy Jethro Gibbs - December 12, 2016, 3:13 pm

For anyone having issues with the editor, open the userscript up in whatever extension you use for userscripts. Then copy all the code. Create a new text doc on your desktop and add the code to it. Then use the replace function and replace http: with https:

thanks, that fixed it

Tid?es - December 19, 2016, 1:54 pm
didn't even see this userscript before

this is gonna save me so much time

funtela - December 20, 2016, 1:40 am
Is it just me or does it not work well with Firefox. It looks all broken. Maybe it's because I'm using MacOS?

Bennynguyen100 - December 21, 2016, 8:16 pm
Omg this is the best thing ever.

I just started installing all these scripts people have made.

Wait I think I have the same problem.
Okay, I am having some weird problems.

Is anyone able to fix it?
When its on, it looks like this:

Please PM when you reply, because I don't get any notification when you reply to this.

Hash G. - December 22, 2016, 5:25 am
Hmm it doesn't work because of Firefox not allowing requests to http website when the main website is https. If anyone wants to take a look, feel free to do it and PM me results.

(Dec 23, 2016 07:53 PM)xadamxk Wrote: [\[CITE\]](#) Change the URL to HTTPS?
wysibb supports it I believe.
Yea but that doesn't work and I have no idea why xD

I know this is quite old but you can do that all of those stuff just in full editor, you don't have to click on "B" (bold) so it opens a tag, you type some text, hit "B" again (to close it with [/b] tag). You can just mark text and apply the desired action. ?

Nonetheless, thank you for putting time into making this.

TheChi?f - February 12, 2017, 12:09 pm
Wait, does this work with quick reply as well?

Hash G. - February 12, 2017, 12:55 pm

I dislike the Full Reply mode because of the page I have to load so it was made for Quick Reply ?

Effexion - February 12, 2017, 12:58 pm

Looks great but please don't add rainbow text. The forum will be riddled with it. Thanks for another great userscript, Hash G.
