(May 22, 2016 06:25 PM)therobotrbt Wrote: [\[CITE\]](#) I bought this product about two weeks ago and I can tell you that this product has to be the best cracking product out there. With most cracking tutorials and resources that you would get on HF, it doesn't contain all the necessities in order to truly crack accounts. However, with this product, you have a 100% chance of cracking tons of accounts if you follow the tutorials correctly.

Not only that, but with the product you join our Skype group. I am telling you that this is almost the best part of the product. We all work together to get what we want accomplished -> crack accounts.

The crack pack had a list of forum websites. I went on one of the forum websites and got a combolist that got me 1000 uPlay accounts at one time! I used the proxy tools provided by Cracking Galore and the forum websites provided as well. With this product, it is no longer hard or time consuming to learn to crack. Just open the tutorial and do the same thing. It takes a few tries at the

beginning, but afterwards its a straightforward process.

The new update came out today and all the people who bought the product earlier got the beta version of it. The new version contained SO much good stuff! Honestly, I would have been glad to give Turtle \$10 for the updated version, but he gave it for FREE regardless!

I can promise you that if you follow everything here, you will be able to open a cracked account shop and make tons of money. Vouch! Definitely buy this product.

I received a vouch copy 4/9 and I had some family issues to attend and was not able to complete the review until today. OP was very understanding. A huge plus.

Included Ways to get combo lists (also teaches you basic SQLi) and a combo leacher.

5 Complete Guides on cracking, how to make and check configs and also how to start your own account shop and make money from these methods.

Misc. Cracking Tools

A free basic proxy scraper and check and a guide on how to use them.

Clean copy of Sentry MBA and basic configs.

Methods/Ebooks: 10/10, OP goes into detail and basically holds your hand going throughout the entire process of each method and explains things very well.

Programs Included: 9/10, Comes with basic free programs to get your feet wet. Wouldn't have been my goto but I can't complain nonetheless. A huge plus is the CLEAN copy of Sentry MBA. (Can sometimes be difficult to find.)

Included Configs: 10/10, NakedTurtle includes over 500 configs and there was no way I could test them all. You should always try to create your own configs for the best chances at cracking.

OVERALL: NakedTurtle is a really friendly and down to earth guy who will provide support where needed with no questions asked. He has put alot of time and effort into putting this all together to sell and it is DEFINITELY worth \$15. (On sale to first 3 customers for \$10!!)

The guides/programs and included configs all make this product a great buy for anyone who is wanting to get up and running instantly with an account shop or just to crack accounts for the hell of it. I would not hesitate to recommend this ebook to a friend who is wanting to get into cracking. A huge vouch for OP on his friendly support and a great product. Good Luck With Sales OP!

into this pack is tremendous! It basically has just about every single program and guide needed into the basics of cracking.

If you want to learn cracking another way, it's going to take time. With this product, you get everything in one place. I no longer need to search the forums for different things that I need. I have it all here!

If you want to start a cracking shop on HF, this is the perfect product. Highly vouch!

The book is really easy to read and easy to follow. I'm not a really experienced cracker however I have been doing this for a while (used to do it before) and this just gave back the memory I lost such as tips on dorks. It comes with different folders so its easy to choose whatever you want to read, you can easily come back to the folder and select the part you want to know more about or that you've forgotten. I have bought an ebook on hackforums on how to sqli etc but this gives more information about that than the other books available.

It even gives you tips on how to sell accounts, what to think about, the payments, how to get proxies, how to use sentry, making dorks, config and much more theres everything you need in this book.

I received a vouch copy. This Ebook covers every aspect about cracking from A-Z. From getting proxies to creating combos and configs, this ebook has everything. You will not need another guide for cracking. Better than any other cracking related books I have seen. The method isn't exactly new but I am yet to see other topics linked to cracking in such detail.

Vouch from me.

Good luck with the sales OP.

Everything is explained very nicely and easy to understand. I'll vouch for this because you can get a lot of information for only 6.99. Looking forward to getting the new version and see what's included in that one!

so u teach people how to leech combos?

as by the pic one of the vouchers posted cracking netflix that was a horrible combo.

47k tested and 2 HITS is horrible.

I haven't bought this yet, but it does look like he is teaching SQLI as well. I didn't catch the fact that he only got 2 accounts with a 47k combo list, so I think we need an explanation for that.

I dont know where he got his combo from but due to proxy and new netflix system its pretty hard to get hits. If you got hq proxies then you can probably get lots of hot.

If you look closely, most of his proxies are banned and most emails are on retries. Thats why

I highly vouch for this product. This morning, I just bought it for \$7 and began looking through the guides and resources. The amount of work put into this pack is tremendous! It basically has just about every single program and guide needed into the basics of cracking.

If you want to learn cracking another way, it's going to take time. With this product, you get everything in one place. I no longer need to search the forums for different things that I need. I have it all here!

If you want to start a cracking shop on HF, this is the perfect product. Highly vouch!

Swizzi00 - May 15, 2016, 12:27 pm

What can i say, this cracking guide is the best one on HF, it learn you many stuff like cracking account RDP etc, Vouch for OP he is really nice and good guy to do business with, so i recommend all you people here on HF to buy this and the best thing is that it's cheap as f'k :)

Bump, still selling! Update is almost done around 80%. Just a few things left.

**W?lr??** - May 22, 2016, 6:25 pm

I bought this product about two weeks ago and I can tell you that this product has to be the best cracking product out there. With most cracking tutorials and resources that you would get on HF, it doesn't contain all the necessities in order to truly crack accounts. However, with this product, you have a 100% chance of cracking tons of accounts if you follow the tutorials correctly.

Not only that, but with the product you join our Skype group. I am telling you that this is almost the best part of the product. We all work together to get what we want accomplished -> crack accounts.

The crack pack had a list of forum websites. I went on one of the forum websites and got a combolist that got me 1000 uPlay accounts at one time! I used the proxy tools provided by Cracking Galore and the forum websites provided as well. With this product, it is no longer hard or time consuming to learn to crack. Just open the tutorial and do the same thing. It takes a few tries at the beginning, but afterwards its a straightforward process.

The new update came out today and all the people who bought the product earlier got the beta version of it. The new version contained SO much good stuff! Honestly, I would have been glad to give Turtle \$10 for the updated version, but he gave it for FREE regardless!

I can promise you that if you follow everything here, you will be able to open a cracked account shop and make tons of money. Vouch! Definitely buy this product.

Thanks bud for the great words! Really appreciate you and others help as well :)

Anyways, the new update is available for everyone. However the prices have been changed a bit (not alot). The new pack has alot of different and new tools, i.e RDP cracking, Bonus cracking(BONUS), In-Depth SQLI with lots of tools. Still a lot more to come! I'm gonna keep this updating! v3 will be out soon as well. If you would like to buy with Paypal PM me, otherwise use the autobuy link provided in thread. If you need any sort of discounts PM me we can work something out ;)

Have a good day!

And to those who had purchased my preview version of this Pack, Please PM me regarding the new update with receipt and proof :)

**Roguerazlin** - May 23, 2016, 8:38 am

Bought this to learn how cracking is done.

i must say its very detailed.

content and tutorials are really good(well made)

SUPPORT is very good.

worth the 7\$ spent on version one !

and the update on version 2 has more stuffs included, even more detailed.

this pack is like an All in one tool for cracking.

i would recommend this even for a beginner who doesnt know anything about cracking accounts(like myself)

\$10 ? You can easily earn it back.
