Scammed 20\$ by Boston uid=2447024

He was selling this social panel for 20 :

<https://hackforums.net/showthread.php?tid=5224488>

I was interested and saw some vouches so I went straight away to buy it.

First I sent paypal payment as a normal payment and he refunded me saying I had to pay as for family and friends so I can't chargeback if he scams maybe?

But ok, not a big deal and I sent as he wanted.

After receiving the panel, On his thread he has 3 thing :

Instagram likes

Instagram comments

Sub4sub coins

But oncz I logged in it had no instagram comments but again ok not a big deal because I was mainly interested in instagram likes as I'm trying to grow up some acocunts.

First day : I kept getting error while trying to get likes :

Screenshot below of me showing him the errors, but nothing helped it didn't work and I went to sleep

Next day ; I come to hackforums and I see he closed his thread.

This is his last post there : "This is closed as of 4-3-16. I'll reopen once my webdev gets it fixed."

So basically he closed and he don't know when it will be back.

Me reporting the first error ;

Me again reporting another error :

His last response regarding the errors :

That's it no more replies and he closes his thread.

A day after I pm him again asking for refund but he ignores

His last reply :

He says iit's upto his web dev but no it's not I bought this from you, idgaf about your fucking web

dev

I have already waited like a fucking week.
Just refund my fucking money

update after like a month :
hahaha he said that 'i said that it worked' but i never said that fucking scammer

You're a fucking bitch.

This user did this to me too.
His panel was closed due to him using an stolen source from another hf member.

You can see my thread here:
<https://hackforums.net/showthread.php?tid=5230834>

Biggest bitch move on HF.

Also, he doesn't have a webdev anymore.
His webdev was the User Raven (spelled weird, check his rep)
I messaged him and he told me that he refunded boston because he couldnt do it BECAUSE Boston used a stolen source that the OG owner fixed so Boston couldnt use it.

Also look at how LQ he is:

In the T.O.S you should of added "If this product is shit, doesn't work, is a stolen script, and your lifetime purchase will be down in a day, there will be no refunds"
