I bought this from Secret Agent just today and the tool worked great. Here is some information about the product:

Benefits:

- + The software checks proxies perfectly and follows accounts perfectly
- + The tool is very fast and works well for following, commenting, and liking.

Disadvantages:

- + It is hard to get proxies that will work, but if you get enough that work you should be good. Also note that if the accounts aren't phone verified, they sometimes work and sometimes not.
- + There is a big which opens windows when following someone who has private mode on and a

bigger one with the source of the website. (Not sure what is causing this, but I am sure it is an easy fix!)

Overall, well worth the \$15 it costs. I highly recommend for anyone who is looking to start an Instagram Social media boosting service. Highly vouch for this product!

You can't update your Instagram profiles like your Instagram biography with this tool. You can make your Instagram accounts follow users using specific tags.

We haven't considered a Like from Tag option but we do have Follow from Tag.

As for the delay, I have released an update that'll fix it. Just reopen and login and it should self auto update.

If you added an unfollow mode for people who didn't follow back you could make a lot more man.

And lets not even speak if you add campaigns.... would be lit, just like massplanner! just that this wouldn't really get known out the forums too much like massplanner (they got shut down by facebook)

There's always a chance your accounts will get banned. There's no bypass to Instagram's system if they find your accounts to be suspicious.
