One way that I see if a jailbreak is legit or not, is if there's any YouTube videos on it. If there's not, it's not legit.

I dont think that's legit, i've heard the only way to jailbreak is if you flash back to v 3.55 or youre already on it.

Fake, the only way to jailbreak is to downgrade to 3.55

You cannot jailbreak on a console that is on a firmware higher than 3.55, anyone that tells you otherwise is talking absolute horse shit

Fake only way is a 3.55 ps3 but u could buy a e3 flasher and downgrade depending on your ps3 model

EliteKane - April 15, 2016, 9:59 am

You can jailbreak your console no matter what your current firmware is only if you have been on 3.55 sometime in the past or when the console was bought.

what everyone else has said above. the super slim which is the newest and i believe last version of PS3 is i believe the ONLY ps3 that can not be downgraded since it was released on a firmware AFTER 3.55. Slim's and Fats are jailbreakable but as they have said above it has to have been on 3.55 and you will need an E3 flasher.

You HAVE to be on 3.55 or earlier in order to jailbreak.

Whether you got it there via downgrading or you bought one that's on 3.55.

Thanks for reading You need to be on 3.55 firmware or lower. Check to see if you can downgrade your console with an E3 Flasher.

No only 3.41 and 3.55 is legit.
