Thread: [50 Vulnerable Websites](#)

Vicci - April 11, 2016, 5:23 am

These websites has one thing in common. A SQL vulnerability.

All vulns are working as of the time that I'm writing this thread because I found them all under the last 48 hours.

Some of them has admin panels and some do not. Some sites has databases with 2k+ users registered.

The only thing that you need to do in order to get this is to send me a private message and I will reply with the full list of the website vulns.
