Thread: [How To Port Forward \(Router & Modem Style\) -/ Noob Friendly -- Now With Utorrent!](#)

Plutonium - July 5, 2010, 9:01 pm

[CHECK THIS THREAD @ THE BOTTOM FOR THE PORTFORWARD PART.](#)

kprof - July 5, 2010, 9:11 pm

i have seen alot of tuts how to port forward, and somehow i have managed to get everything i need, now when i look these tuts with pics, everything is clearer, but what i suggest is: move this to beginner section and stic. it, since first problem after program is = how to open ports!!!

Plutonium - July 5, 2010, 10:24 pm

(Jul 5, 2010 09:11 PM)kprof Wrote: [\[CITE\]](#) i have seen alot of tuts how to port forward, and somehow i have managed to get everything i need, now when i look these tuts with pics, everything is clearer, but what i suggest is: move this to beginner section and stic. it, since first problem after program is = how to open ports!!!

Yeah, Sent PMs to iBruteforce & Yin. Hopefully a response soon

Humanoid - July 6, 2010, 6:07 am

Good tutorial, it will help people who need this it's really good...

Thanks Dude ^_^
?

Okey... - July 6, 2010, 6:58 am

Nice tut,

But to check if the port is open you must first start an application to listen on that port. Then check if its open via an port checking tool.

Plutonium - July 6, 2010, 7:00 am

"Or Try To Have The Application You Are Forwarding For Open, Like Cybergate & Try Again!"

You cant read? =p

The Name's Bing - July 6, 2010, 7:06 am

1 Pure Devil - July 7, 2010, 4:46 pm

Gah, I was hoping for some new method. >.< +1 on the tut though, the most detailed I've seen.

Question:

When using my Mobile Modem (USB stick which creates an internet connection, my Default Gateway is the same as my IP address. Is this normal?

#2) When I type the Default Gateway (same as IP address) into the URL bar, the page never is never found, and the browser says that the URL I entered is invalid.

Any tips? :3

#2) When I type the Default Gateway (same as IP address) into the URL bar, the page never is never found, and the browser says that the URL I entered is invalid.

Any tips? :3

Firtly, you cant port forward a mobile internet since the connection goes straight to the company.

Therefore you cant Port forward.

2# - Yes, thats normal since you dont have a Router IP.

1 Pure Devil - July 8, 2010, 1:56 am

Buump Buump Buump Major Buump

Sia - July 11, 2010, 8:28 am

people put this in your browser 192.168.1.1

and press enter once you get prompted for login type admin as username and password as password

and in router settings go under portforward/port triggering and put the ip and port you wanna forward
IT REALLY IS THAT EASY!

Dyegunswin - July 11, 2010, 9:22 am

Th? Truth - July 18, 2010, 7:18 pm

Great guide. This is what helped me portforward.

Apocalypse - July 18, 2010, 8:59 pm

Does any one else have the problem of canyouseeme.org saying your port is not open but the portforward port checker tool says it is?

Plutonium - July 19, 2010, 1:59 am

(Jul 18, 2010 08:59 PM)?pocãlyps? Wrote: [\[CITE\]](#) Does any one else have the problem of canyouseeme.org saying your port is not open but the portforward port checker tool says it is?
IM well aware of that problem, PF Port checker always says it's open, Even though it isn't. And if "Canyouseeme.org" doesn't work, Then you've port forwarded wrong. Try again!

//Plutonium

Livewire - July 19, 2010, 2:03 am

Plutonium - July 24, 2010, 3:26 am

(Jul 23, 2010 06:49 PM)moefasa Wrote: [\[CITE\]](#) Dude if i take the steps you did on the tut then will it affect my internet access or anything since my wireless internet has no password?

No, It wont affect anything.

Mashimaro - July 24, 2010, 3:57 am

i use only modem so i should not port fowarding?

Plutonium - July 24, 2010, 3:59 am

(Jul 24, 2010 03:57 AM)neo6633 Wrote: [\[CITE\]](#) i use only modem so i should not port forwarding?
Well, A few modems does need PFing.

Mashimaro - July 24, 2010, 4:10 am

i creat my sever and boot it.
so on my sybergate show me
but other computer doesn't work

Plutonium - July 24, 2010, 4:15 am

(Jul 24, 2010 04:10 AM)neo6633 Wrote: [\[CITE\]](#) i creat my sever and boot it.
so on my sybergate show me
but other computer doesn't work
Cause you've used 127.0.0.1 as DNS. Replace 127.0.0.1 with your no-ip adress. EG:
myfcknbadhost.no-ip.biz

Mashimaro - July 24, 2010, 5:02 am

i swiched....haha ??`
what should i do?

GhetoGeek - July 24, 2010, 5:34 am

I cant seem to forward my damn ports, can anyone help me. I have an Ambit modem and the settings are different. I need help :(

Aristocrat™ - July 24, 2010, 7:55 am

Great tutorial! Really cleared up a lot for me, thanks! (:

venkya - July 24, 2010, 8:11 am

I'm using mobile gprs modem connection for cybergate.. I made a server and run it on my own computer . Its showing my pc in the list but not showing my victims whom i'm spreaded the rat..

Need a help...! pls help me.. Msg too short..

GhetoGeek - July 24, 2010, 4:35 pm

My setup doesn't look exactly the same. This is what I put in but canyouseeme still says its closed.

skj - July 27, 2010, 7:37 am

What if i haven't any router and i'm connected by cable (lan)?

Phenethylamine - July 27, 2010, 1:07 pm

(Jul 5, 2010 09:01 PM)Plutonium Wrote: [\[CITE\]](#) What Is Portforwarding?

Port forwarding is necessary for using different tools, Such as RATs and uTorrent and so on.
Please follow this guide on How To Port Forward and you'll have your port forwarded :)!

Hey Guys! Today i'll teach you how to port forward through the router & modem. (Not with PFConfig :))

Lets Start!

Start off by going to: Start -> Run -> CMD -> And Type IPCONFIG

[IMG]<http://i978.photobucket.com/albums/ae264/Rasmuz00/FASDASD.png>[/IMG]

Now Copy That "Standard Gateway // Default Gateway" IP And Type It Into Your Webbrowser & Log in.

[IMG]http://i978.photobucket.com/albums/ae264/Rasmuz00/IP_2.png[/IMG]

My username is Root - nothing. The router // modem accounts usually are these:

Admin -

Admin - Admin

Admin - Password

Admin - User

Admin - Root

Admin - Custom Password, Check underneath your router for it! ;)

Root - Admin

Root -

Root - Password

Root - Root

Root - Password

Root - Custom Password. Check underneath ;)

User - Root

User -

User - Admin

User - Password

User - User

User - Custom Pass.

And so on.

Once you're logged in, Go to the "port forwarding" or in this case, "Virtual Server"

[IMG]http://i978.photobucket.com/albums/ae264/Rasmuz00/lp_3.png[IMG]

[IMG]<http://i978.photobucket.com/albums/ae264/Rasmuz00/DASDSAD.png>[IMG]

Virtual Server: Enable / Disable.

Local IP: Found In IPConfig, As IP Address.

Start Port: The Port You Want To Forward, Start Port.

End Port: The Port You Want To Forward, End Port.

Protocol: TCP & UDP or BOTH

Remark: The Name Of The Wished Forwarded Program.

And When You've Saved The Settings, Go To Canyouseeme.org And Type Your Port In There, And If It Says

[IMG]http://i978.photobucket.com/albums/ae264/Rasmuz00/lp_5.png[IMG]

Then You've Succeeded Your Port Forwarding.

If It Says

[IMG]http://i978.photobucket.com/albums/ae264/Rasmuz00/lp_6.png[IMG]

You've Failed. Then I Advice You To Take A Look At Portforward.com And Look For Your Router Or Modem, Once You Find It They Have A Port Forward Tutorial There.

Or Try To Have The Application You Are Forwarding For Open, Like Cybergate & Try Again!

Hope You Liked This Short Explained Tutorial! (Credits To Undefined For Giving Me The Inspiration To Do This, Since His Is With PFConfig, I Made It Router Style)

when i type ipconfig i get default gateway address as 0.0.0.0 and when i type that in my web browser i get error message that "the connection was reset".what should i do now..

Eternity - July 28, 2010, 4:16 am

Im haaving trouble port fowarding on my router (thomsan) can anyone help please? Thanks

kitkin15 - July 28, 2010, 4:26 pm

(Jul 27, 2010 04:56 AM)Plutonium Wrote: [\[CITE\]](#) Hmm.. Since you're on your neighbours router. Ask them how to PF.

I would, but they dont speak English. They are one of two mexican families that live next door, they all have the same last name and neither of them speak English.

So who knows anything about Qwest? I need to know what the thing is called that i have to go to.

ViggU - July 28, 2010, 4:39 pm

ehm okey :P I just followed your tut on cybergate. Tried it out on my other laptop. Still says that no one is online. So i figured maybe thise port forward thing was the cause. So I tried this, but as I still live with my father he is running the router..so when I copied my gateway into the browser all I got was error...help? :P

Correct. Other people can not show up in your list if you've not port forwarded. And to port forward you need a PFable Modem // Router. THEREFORE you won't be getting any victims.

venkya - July 30, 2010, 3:47 am

Other than that.. Bump! =F

matthewg49 - August 11, 2010, 4:42 pm

Another amazing tutorial by Plutonium!!!

Your tutorials have helped me a lot you know that?

I only have 1 little problem though.

I try to port forward my belkin router and once i follow the steps and go to canyouseeme.org it says that my ports are not open.

I tried following youtube videos and tuts on the internet and even that website that you provided us

with the routers (my router isn't on that big list btw) and I have yet to find the solution.

The weird thing is, I have tested the server on myself and it did in fact detect my computer and it worked!!

Does that mean my ports are open regardless of what canyouseeme.org says?

Thank you =)

ScreamingSlug - August 13, 2010, 7:31 am

Really good tut but when i put default ip thing into webaddress bar it comes up with something about bt shwoing all people on my modem o_O

Johnieb95 - August 14, 2010, 12:51 pm

This doesn't work for me and my router isn't on portforwarding.com

slitthrow - August 17, 2010, 2:21 pm

I have verizon and I cant find anything about Portforwarding or Service once I put my Default gateway into the bar. I put in the password and username but then Im lost. I dont know where to go. Help me please, Im from your RAT tut.

Edit: I found where I setup Port forwarding it was under security>application (for future refrence)

Now I have to decide what category to choose from Theres

- 1.Games
- 2.VPN
- 3.Audio/Video
- 4.Apps
- 5.Servers
- 6.User

What one? They have rules after you select a category..

InvisibleKid6666 - August 17, 2010, 11:39 pm

I would place it under "Apps", "serves" or "User".

Now to my question,

Do you have to port forward port 86 and port 100?

slitthrow - August 18, 2010, 1:31 pm

Yea but If I do place it under anything but User I cant edit or really make a port D: Under User I can sorta, but I cant enter IP and it has some other stuff.. Here lemme upload a picture for more clarity.

<http://i968.photobucket.com/albums/ae169/Creator21/Apps.jpg> ---> Apps Section

<http://i968.photobucket.com/albums/ae169/Creator21/Servers1.jpg> > Server part 1
<http://i968.photobucket.com/albums/ae169/Creator21/Servers2.jpg> > Server part 2
<http://i968.photobucket.com/albums/ae169/Creator21/User.jpg> ----> User

I removed my pc name..

Edit: Forgot, this is what happens when in user you click new..
<http://i968.photobucket.com/albums/ae169/Creator21/NewUser.jpg>

Thanks for this Tut!

But:

>Or Try To Have The Application You Are Forwarding For Open, Like Cybergate & Try Again!

Isn't that a must have?

I mean musn't there be a running program e.g. a rat that is listening on this port so that it is really opened?

I try the whole night to configure my port forwarding and ever get "Connection refused". Finally i did my tests with the Tool PortChecker on <http://portforward.com/help/portcheck.htm> and it works because it locally listen on this opened port like a running rat-client.

Please indicate in your tut that the windows firewall must be deactivated or the specific ports must be selected as exception (tcp and udp).

Now my port-forwarding works.

Plutonium - August 26, 2010, 9:10 am

Uploaded with ImageShack.us

xms - August 26, 2010, 10:56 am

hey a kay: do you open the port 82 in your windows firewall?

try this tool: <http://portforward.com/help/portcheck.htm>

it allows you to check if your router or your windows is the problem

sometimes "pinging from the internet" is set at not allowed on some routers, this would also block canyouseeme.org

a kay a - August 26, 2010, 1:21 pm

my firewalls r off, windows and router 2. maybe this is my problem.

[IMG]<http://img121.imageshack.us/img121/1168/20100826221659.th.jpg>[/IMG]

brandon. - August 28, 2010, 6:49 am

I've forwarded plenty of ports in my life, but for some god damn reason it won't forward for me. Any reason why? I'm using the right IP, settings, and area of the router configuration tool to do this.

I just don't know why it's not forwarding!

Plutonium - August 29, 2010, 2:05 am

Giving this thread a good ol' bump! :)

Bulletproof™ - August 31, 2010, 5:41 am

Hey There Great tut mate i got here using your cyber gate tut witch was also really really good

about port forwarding though i'm connected to my neighbors wifi so i logged in to there router

forwarded port 100 and 999

but heres the thing i'm not sure if it worked because when i go here a few times to check if it worked <http://canyouseeme.org/>

and most of the time it said failed but on a few occasions its said success :S

also i've been here <http://ports.my-addr.com/check-all-open-ports-online.php> and if i set it to 3 sec it says success every time but if on 1 sec or 2 sec it fails every time i've tried a few other online checkers to which say failed

oh yea i downloaded this tool <http://portforward.com/help/portcheck.htm> PFPortCheck Program and it tells me success every time

so im just confused as to weather its working or not

what do you think please?

Shout - August 31, 2010, 1:34 pm

Im having trouble logging in when I put my default gateway into my web browser :S I dont know what I'm supposed to put in it.. and when I just put Admin in as user and password in as password I get a red page that says: 401 Unauthorized... Authorization Required. What should I do?

No worries, Glad you liked it.

J1nx - September 15, 2010, 12:59 pm

I dont have a router, but only a cable modem.

Is it possible that i dont need to foward a port ???

Cuz when i goes in the modem with a web browser, i can only see Log event, and shit like that.

Nowhere i can log as admin or anything.

`P R O D I G Y™ - September 15, 2010, 1:01 pm

Sounds like you might have to just ask your ISP. Not to be an ass, but I've never heard of a panel having such minimal options... Hmm

J1nx - September 15, 2010, 1:09 pm

(Sep 15, 2010 01:01 PM)`P R O D I G Y™ Wrote: [\[CITE\]](#) Sounds like you might have to just ask your ISP. Not to be an ass, but I've never heard of a panel having such minimal options... Hmm
:(

EDIT : i run utorrent btw and its working fine and never had to mess with port foward...

I think it could be it's because I use an dynamic ip adress. Yesterday, my internal IP was *.*.*.116 and toady its *.*.*.114

This could be an issue because in the router setup, port 100 is forwarded on 116 but now, I'm 114. Could that be the problem?

Plutonium - September 18, 2010, 2:41 am

p0pe - September 26, 2010, 1:40 pm

Tjenare => Har ett litet knasproblem på vägen som jag hade uppskattat något enormt om du kunde se på. Följer instruktionerna till punkt och pricka men ingen server dyker upp i Cybergate.

På Portforward är :100 stängd medan den ses som öppen genom Simple Port Forwarder..

adda MSN: p0pe@hush.com

AlbinoBowler4200 - September 28, 2010, 4:15 pm

Thanks for the tut Plutonium! but I've got a seemingly more advanced situation, hoping you can help.

I've port-forwarded a couple times before for gaming, but I've moved since then and now the complex I live in has shared internet. I just hard-line into the LAN and away i go. The default gateway isn't the typical router address. I type it into my browser and nothing happens. Is it possible to port forward in this situation. Should I just hook up another router between?

any help on the subject is appreciated. Thanks.

Itzah - October 2, 2010, 9:24 am

WOW good job a very good tutorial

Phreak™ - October 2, 2010, 10:09 am

gamefreak11221 - October 17, 2010, 9:42 pm

192.168.0.1

idk what's the user and pass thought i'm in public

lobwege - October 18, 2010, 7:16 pm

super easy to understand, im in dire need to port forward lol

sac - October 20, 2010, 9:56 am

help plz! my isp is blocking all ports except 53(used for DSN).SO CAN i use this port in spy net.
can somebody test it and tell me plzz..

i am really missing my spy net a lot :(
any reply is appreciated.

unteagle - October 20, 2010, 10:45 am

Doesn't work on my wrt54g. I've had 4 diff people. Try in teamviewer. I even have portforward. I'm bout to offer to pay cuz I just can't get my damn router to work.

Astronome - October 20, 2010, 12:28 pm

hi i entered the dynamic ip and i read under router the username and pass are admin but still couldn't login

DNX - October 24, 2010, 1:55 pm

Thanks for this =]

I'll be using this for sure

MoNsHiNe - October 24, 2010, 4:50 pm

Really nice tut. will help me and other. :)

Xplodin - October 24, 2010, 5:29 pm

hmm, i got a problem, when it asks me for my LAN IP i put in my IP address and it says "address is not apart of the Private Subnet"

any ideas?

i'm really confused

anyways thanks for the tut, i got confused up to where i was almost done with the port forwarding and the LAN IP i had to enter for Hosted Service: where i select a pc on the LAN

Apollone - October 26, 2010, 5:29 am

Problem:

I use Digicom MichelangeloWAVE as Router!

When i go in virtual server it simply doesn't have UDP or TCP

it has a lot of type has:

FTP

SSH

HTTP_Server

HTTPS

PcAnyware

H234(something)

T(something)

PPTP

something else too but i try one by one all this type, but the web test with the link provided on the 1st post doesn't work! (access denied)

HELP!!! : (

PrototypeNinja - October 26, 2010, 5:33 am

Great guide, thanks ?

lilbutterfly - October 26, 2010, 3:04 pm

[font=Arial][font=Courier]Hi i'm new to everything, this may sound stupid, but can someone please help me log in after i have typed the ip address into my web browser, how do i work out my user name and password? Thanx

ilbknownas1 - October 27, 2010, 10:54 pm

I do everything correctly, and i have a mid-level experience with stuff like this, but currently even with it enabled in my router settings, my port forwarding isn't working, it still says the port is closed, i

even went through and changed my DynamicIP to StaticIP to see if thatd fix it.

newbie1789 - October 28, 2010, 12:43 am

Thanks Dude.It helped..Now how to send the cybergate server to the victim?? And will we be able to know his\her username or password.??

(Oct 26, 2010 03:04 PM)lilbutterfly Wrote: [\[CITE\]](#) [font=Arial][font=Courier]Hi im new to everything, this may sound stupid, but can someone please help me log in after i have typed the ip address into my web browser, how do i work out my user name and password? Thanx

There are different combinations of usernames and password listed above.Try them. In maximum cases they are the same..Enjoy??

kelulipanas - October 28, 2010, 5:47 am

thanks dude...really useful..

Ayoub - October 30, 2010, 6:15 pm

I have a quick question! I did this and I checked a program to test it and it said the port was open! However when I tried the site YOU supplied to test it, it said it wasn't open.. im kind of confused.

King Z - October 31, 2010, 7:56 am

Guys! i have set everything up correctly and port forwarded and the port is open but whenever i run the server.exe or anyone else it don't work!

pm me if you can help thanks!

Simonas00 - October 31, 2010, 12:36 pm

Plutonium can you pm me if you could help me cuz my router is Pirelli and im having problems with the virtual servers etc the both thing cuz there isnt one in mine :) thanks regardless Simon

pls tell me whr to go ?

I'd go first to check "LAN". Send me a pic of whats there.

hlidar - November 11, 2010, 9:40 am

nice tutorial he helped me a lot

Norpheus - November 13, 2010, 11:45 am

This requires a static Ip-adress? It doesn't work for me and I don't know what to do because it really should be working, although homesites like checkmyip gives me another IP than my RUN does (which somehow says ipv4-adress and not IP?). How do I find my true IP in dynamic or must I have static IP?

Any help on this please? I would really appreciate it.

Sammii - November 13, 2010, 2:37 pm

Thank you so much for this.

Queen - November 13, 2010, 3:29 pm

Thank you dude, helpful for me

apt-get money - November 14, 2010, 7:02 am

hahhah at the 2nd pic you tried to hide a porn site.

is there something wrong? Please Help me.. .

woots - November 17, 2010, 8:45 am

where can I find the password?
I can't find it on my router.. :s
(US robotics)

xxdelxx - November 17, 2010, 9:16 am

nice tute will try it later .Thank you !

Joey Tribbiani - November 17, 2010, 9:39 am

2 problems :-

canyouseeme.org shows different IP than my actual IP (I don't use proxies or no-ip or any IP hider) but whatismyipaddress.com shows correct IP.

I have changed my dynamic IP to static IP and now I am not able to add any rules in my router setting even though I have added the static IP in my router.
my router is :- dlink DSL 502t (not v1)

PLEASE HELP !!

I used this tutorial

Code http://portforward.com/english/routers/port_forwarding/Dlink/DSL-502T/default.htm

anything_a - November 17, 2010, 10:50 am

is there anyway u could crack a router user & pass?

xboxmaster - November 17, 2010, 11:02 am

Thanks for the tutorial, finally port forwarded my router.

MiKroTiK|+| - November 17, 2010, 11:23 am

Wow Thnx Man i Have Rooter

iNehp - November 19, 2010, 9:12 am

Hi, thanks for the tut, though i have a little problem. Sence im under 18 and still lives with my parents we all share the same router.

Problem number 1. My dad has the router password, is there any way to crack it? (I can probably trick him in to telling me if theres not)

2. Will my dad or anyone logged in to the router be able to see what i have done in the router? If so, is there anyway to hide it? Thanks :)

Cityjohn - November 19, 2010, 7:09 pm

Excellent Tutorial, This makes it as easy as hitting a tree for literally Anyone who has one arm. :)

Rixxon - November 20, 2010, 6:00 am

Having problems forwarding on a 2wire 2701GH-B. Keeps saying Error(Reason: Connection Timed Out). Anyone willing to teamviewer this shit with me please?

xxd3d - November 20, 2010, 8:13 am

(Nov 20, 2010 07:00 AM)ExplicitExploitation Wrote: [\[CITE\]](#) Having problems forwarding on a 2wire 2701GH-B. Keeps saying Error(Reason: Connection Timed Out). Anyone willing to teamviewer this shit with me please?

Same here. Doesn't say connection refused, ti says it's timed out.

Rixxon - November 22, 2010, 1:38 am

I'm sorry I'm completely new to rats please don't flame. Should i be forwarding to port 82? On the 1.07.5 tut it says port 100 for the listening port, but here it says 82..I'm kinda assuming that this is outdated and meant for the 1.02.0 tut correct? I'm feeling pretty confused. Thank you in advanced whoever.

coolrocky1st - November 23, 2010, 1:26 am

This is clear, short and Good tutorial..

Vito Scaletta - November 24, 2010, 9:54 am

when i try to log in on my default gateway it just came this mozilla firefox cannot, bla bla.

revv - November 25, 2010, 5:32 pm

nvm edit edit edit edit

krickan123 - November 29, 2010, 12:37 pm

Okay, I got 2 questions: I've forwarded port 82 on my router for both tcp and udp but still <http://canyouseeme.org> / PFPortchecker can't see me. And i can't find any servers in CG..

And when i try to send the server to a friend of mine it says Sourcefile(not sure, it's atleast "Källfil" on swedish) can not be found. Is that because of a antivirus is running in the background?

rubeke4747 - November 30, 2010, 12:09 pm

thank you, got it now :D port is open and working

Sharan - December 1, 2010, 1:56 pm

Strange, I followed this tutorial a couple of a days ago(Very nice btw) and it said 'Success', but now I was going to spread my RAT and I checked, no victims on CyberGate, so I went to Open Port Check Tool, and now(everything is still exactly the same) it says 'Error'. I don't understand what's wrong, any help?

M107 - December 1, 2010, 4:12 pm

Thank u very much both ur tuts are very helpful!!;]

Kustom - December 1, 2010, 4:25 pm

Nice, very detailed. One of the best I've seen for a port forwarding setup :]

amn3sys - December 3, 2010, 5:51 am

Thanks helped me (atleast its showing the port open) now i only need to test :D

Sockatobi - December 3, 2010, 3:23 pm

This was a really clear tutorial. Thanks

Crypto9 - December 4, 2010, 5:36 pm

i have Level1 how do i forward on Level1?

hackur98 - December 4, 2010, 10:48 pm

is it possible 2 do dis on netgear? and can sumone explain how, thnx

(Dec 4, 2010 11:48 PM)hackur98 Wrote: [\[CITE\]](#) is it possible 2 do dis on netgear? and can sumone explain how, thnx

Try <http://portforward.com/> and find your router should help you :)

the rainman - December 4, 2010, 11:04 pm

i have at&t has anybody successfully port forwarded with at&t??? help please i can get in but i don't understand how to find where i need to forward it....

kbera44 - December 6, 2010, 4:49 pm

THanks for this great tutorial works great!

(Dec 5, 2010 12:04 AM)the rainman Wrote: [\[CITE\]](#) i have at&t has anybody successfully port forwarded with at&t??? help please i can get in but i don't understand how to find where i need to forward it....

Hello!

In the tutorial on the pictures, he sets portforwarding for the port "82" but at the settings its port 100 that is set.

So you have to forward port 100 in your router.

Hope its your problem, and you can get it work :)

Johnny Test - December 6, 2010, 5:47 pm

is that one picture that's being covered up porno lol nice tut

Mikki - December 8, 2010, 2:41 pm

thank you dude this helped me alot!!!

LinusT - December 8, 2010, 6:53 pm

canuseeme gave me an error, but the PFportchecker says the port is open. Am I fine?

Troller Coaster - December 10, 2010, 6:36 pm

Hmm... Sorry for this little bumb but...

I did everything that is on the tutorial. And it either says Connection Refused or Connection timed out. At the top, should it say my IP, or 192.168.1.13? If so, I'm doing something wrong, because it always shows my IP. Also, does No-IP have to be on during this process?

EDIT: I have Linksys WRT120N router. Hope someone helps me :>

xistu - December 11, 2010, 6:16 pm

It says my default gateway is 0.0.0.0? Whattt :|

xx red xx - December 12, 2010, 9:36 pm

I type the default gateway in my browser and nothing happens :S

Asteriqz - December 12, 2010, 10:05 pm

great tut good work :)

Have you tried Sniffing on Cybergate? Cos sometimes for it to open on canyouseeme.org you have to "Start" on Cybergate first :)

WaRpEd - December 24, 2010, 7:12 pm

Thanks a lot man, real clear, simple, helpful tutorial

jentlemanraju - December 25, 2010, 11:20 am

i am not using any router.. can i use this process to port forward.?

Predator_Crack - December 25, 2010, 11:28 am

(Dec 25, 2010 12:20 PM)jentlemanraju Wrote: [\[CITE\]](#) i am not using any router.. can i use this process to port forward.?

If you mean, that you have a simple MODEM - dialup to connect to internet then you don't need Port Forwarding.It's only for routers/adsl routers.On the other hand if you have software firewall then you may have to configure something.

L0ckreaderz - December 25, 2010, 12:23 pm

my default gateway is : 0.0.0.0 and nothing opens there :O ?

what can I do to get a gateway and open my port.

jentlemanraju - December 26, 2010, 11:57 am

(Dec 25, 2010 12:28 PM)Predator_Crack Wrote: [\[CITE\]](#) If you mean, that you have a simple MODEM - dialup to connect to internet then you don't need Port Forwarding.It's only for routers/adsl

No, PortChecker ALWAYS says the port is open. Even though it's not ?

vidhit - January 3, 2011, 9:13 am

hey i tried to unblock port 100 but i cudn't what can be the reason ? please help . I have a D-LINK router and i had entered the rite settings but still on the website there was an error ! :/

Jonerke - January 3, 2011, 4:34 pm

Hi

Nice tutorial! Just a few questions...

First of all I opened the port! But I couldn't chose 'Both', I had to chose either TCP or UDP. Is that a problem? I could also chose '*' but than nothing worked anymore...

Secondly, I read on portforward.com you might need a static IP to get everything working properly. Is that a big difference? (I changed it anyway)

Thx in advance

P.S. I have a Topcom WBR254g router

Alexander - January 3, 2011, 4:38 pm

(Jan 3, 2011 05:34 PM)Jonerke Wrote: [\[CITE\]](#) Hi

P.S. I have a Topcom WBR254g router

The first question idk about.

Without a static ip, the ip of your computer sometimes changes, and you have to portforward again using your new ip.

Fourteenkix - January 3, 2011, 8:50 pm

Good tutorial helped me alot thank you!

Keenara - January 3, 2011, 9:59 pm

QUESTION; How do I know which number I'm supposed to port foreward?

Must it be 82? I am trying to use Dark comet rat 3.0, but I must do this first.

[http://i52.\[censored\].com/14ki3xx.jpg](http://i52.[censored].com/14ki3xx.jpg)

Can you help me and tell me what do I put here?:)

Georgia - January 4, 2011, 12:36 am

nice one tutorial, mate

honestly, after hacking my routers username and password was changed again))

ShuxNatux - January 6, 2011, 7:35 pm

Another great tutorial Plutonium ?
Always seems to carry through!

h4yR0 - January 8, 2011, 1:26 am

Any other way to open port , because I haven't router :(

flyrock - January 8, 2011, 3:50 am

wow, great tuto thanks man :)

san143 - January 8, 2011, 5:45 am

Good tutorial, but i cant do on mine, please please can set thrgh team vwr??? i will be vry thankful...
Am a newbie please... Ill pm my id & pwd if u will...

jorjo - January 8, 2011, 5:49 am

Very nice tut, man ! If anyone has problems with port-forwarding , he can PM me for help ;)

ExTrEmEz_SAM - January 9, 2011, 6:43 am

Great, nice one dude.. read all of your tuts now and they've all worked..! :)

ebonie101 - January 9, 2011, 10:18 pm

did not work for me :(spent like 40 minutes trying this too smh
anybody willing to help me?
never mind i got it too work!! thank you!!

Rust3d Phantom - January 10, 2011, 1:14 am

My bloody router doesnt support this :((

Keenara - January 10, 2011, 3:49 pm

CrystalKnight - January 10, 2011, 5:23 pm

Hey i follow everything as you said but when i run portchecker it sees port 100(i use that)when i

scan for udp but when i scan for tcp on port 100 it says its closed.I put tcp&udp on my router config.Do cybergate work with udp?

African Hat - January 11, 2011, 12:21 am

Didn't work still says error:S mehh

ghostfacekillah777 - January 11, 2011, 3:34 am

Hey i was hoping some one could help me with opening up a port. Im not new to ports i have done it before but for some reason when i go to cannyouseeme.org it still says port 100 is not open i have tried everything i know and looked around too but still i cannot get it to work i even changed my ip from a dynamic one to a static one and it still wont open up the dang port ? lol

I got Win 7 now could that be the cause? Also my Router is a LinksysE2000.

Thanks in advanced!

?

Liero - January 11, 2011, 4:18 am

Hello, I have an internet stick, an item that goes to the USB port. Do I have to port forward then? ps. sorry for my bad english... Thanks!

African Hat - January 11, 2011, 11:46 am

@ liere yes you have to do that or else no work

homeslice - January 11, 2011, 3:35 pm

My standard gateway comes up as 0000

Liero - January 12, 2011, 7:05 am

But when i write my Standard Gateway in the web browser it finds nothing...

ps. my ip and standard gateway is the same, does is matter?

Nexum - January 18, 2011, 5:45 pm

Great tutorial, but I have a question,
What port should I use for DarkComet?

KrispyKreme - January 19, 2011, 11:46 am

You don't even have to portforward for this version of Darkcomet.

EDIT: oops wrong thread.

-Mr Mesmer - January 19, 2011, 12:11 pm

This thread is a perfect example of how leet HF is.

sam0016 - January 19, 2011, 3:18 pm

thanks this helped so much took a while tho netgear routers are a ass

Ø?á?le - January 19, 2011, 4:41 pm

Thank you very much. I've tried other port forwarding guides, but this by far helped me out the most. Once again, thanks!

C150traffic - January 19, 2011, 4:47 pm

Thanks but i can not get into my ambit none of those passwords work

Mattf117 - January 20, 2011, 4:22 pm

Send you a pm with a couple of questions :).

savio - January 21, 2011, 7:00 am

I successfully (I think) port forwarded in my router. When I go to canyouseeme.org my IP is the new no-ip.com IP. How do you get out of your remote IP back to your original one to see if port forwarding worked? Am I missing something? Thanks

autorunman22 - January 21, 2011, 9:26 am

And the utorrent method seem not working fine to me. I mean its totally not.

ado11 - January 21, 2011, 10:46 am

You must tell the that they cant add port to RAT without closing torrent
When i made tut thre was lot of questions

- When i close toorent it say that port is closes
- Yes but when you add it to RAT it will be open ...

Centrius - January 22, 2011, 1:44 am

Fine and well writen guide! Thx for the help!

Dreek Lass - January 24, 2011, 8:54 am

(Jan 19, 2011 04:18 PM)sam0016 Wrote: [\[CITE\]](#) thanks this helped so much took a while tho netgear routers are a ass

Hey sam. How in the fucking world did you get your netgear router to portforward? Mine just...won't. Either says connection refused or timed out. Pissing me right off.

thanks

iHacking - January 25, 2011, 3:57 pm

Do I need a specific Port, Like perhaps for Cyber Gate is what I need to know.

Levi - January 26, 2011, 12:42 am

(Jan 25, 2011 04:57 PM)iHacking Wrote: [\[CITE\]](#) Do I need a specific Port, Like perhaps for Cyber Gate is what I need to know.

The port for Cybergate is 100 I believe.

Wewe - January 26, 2011, 8:06 pm

How to portforward with this as your virtaul thingy?

Apex. - January 26, 2011, 8:08 pm

if you need PFing help PM me and ill TV you.
im pretty sure i can fix most problems.

fl4m3 - January 27, 2011, 6:52 am

Wonder what that picture was you filled with arrows o.O

prodigy360 - January 27, 2011, 11:55 am

has anyone managed to port forward succesfully with a linksys router? im pretty sure I did everything right but when I check it on that website it always says its timed out...I need to try it at my

friends house so that way I can use a different router and ISP....I'm thinking it has something to do with my stupid router because I doubt my ISP would be blocking port 82...please help...thank you

roan - January 28, 2011, 9:49 am

Great guide, port forwarding can be a bitch

Potential - January 30, 2011, 7:31 pm

thanks you helped me open port 21 =]

Hiit - January 31, 2011, 4:06 pm

Anyone know how to do with on a 2wire 2701 Hg G?

dragon755800 - January 31, 2011, 5:54 pm

lol confuing to me a bit but still awesome... 0-0

JOW - February 3, 2011, 5:38 am

dude you're awesome I've been following some of your tutorials and I have been able to do everything correctly so far thanks a lot:) +1

thichraohop - February 3, 2011, 10:36 pm

For a question. When I type ipconfig into run box. I just saw a flash black folder for a second then it disappear. So any reason for that? Something wrong with my computer?

angilboy - February 4, 2011, 1:20 am

thanx thanx thanx for help ! you helped me so much

xVENdEr - February 5, 2011, 6:20 am

Damn... I made it 100% correct, but it still show:

"Error: I could not see your service on xx.xx.xx.xx on port (100)
Reason: Connection timed out"

I made it with uTorrent too and still same sh!t... :S dunno what to do.

blackfart - February 5, 2011, 6:44 am

Great! im gonna try the utorrent way since the first way does not work

kezeyrage - February 7, 2011, 1:08 pm

good tutotial, and lol at pornhub

uuuuuuyyyyyzzzzz - February 8, 2011, 5:12 pm

my deault gateway is showing 0.0.0.0..what to do now??

thank u for helping in advance :)

B4M - February 8, 2011, 6:10 pm

Awesome tutorial mate. really helpful

lonelyboyy - February 8, 2011, 8:35 pm

when i enter my username in the no-ip setting. it says it's invalid. am i supposed to use a fake email that doesnt exist?

uuuuuuyyyyyzzzzz - February 8, 2011, 11:13 pm

u rock man..method of port forwarding by utorrent is simply awesome

nice tut mate..keep rocking :)

BLACKLISTER - February 8, 2011, 11:41 pm

Good tutorial, it will help people who need this it's really good...

Da God - February 9, 2011, 3:51 am

Nice Tut, you have any idea on how to port forward on a net gear router?

I've been trying to help a friend port forward and I'm having problems.

DrrtEgrrT - February 10, 2011, 11:05 am

Nice tut. Thanks for the work.

H8123 - February 10, 2011, 12:22 pm

damn dont works on my router :(

noisystick - February 10, 2011, 6:25 pm

see its threads like these that made me finally create an HF account...

csas25 - February 11, 2011, 9:13 am

Made with the utorrent portforwarding [my router made automaticaly for 100port] And when my victim opened the virus i don't got him on my list... What might be the problem of this?

crawl7 - February 11, 2011, 11:10 am

I get on canyouseemee.com

Error: I could not see your service on XXX.XXX.XX.xx on port (82)

Reason: Connection timed out

?

What now ?

redman1488 - February 11, 2011, 1:23 pm

Good tutorial thanks for the help man

ira terror - February 11, 2011, 1:44 pm

Thanks for this tut, helped me a lot.

normalcy - February 12, 2011, 5:46 pm

Great tutorial. I'm having some troubles port forwarding but I'll probably get things figured out.

Unforunate Ending - February 12, 2011, 6:48 pm

Still lost. I type in my Default IP to the address bar and it just takes me to AT&T website. >_>

jacetbiddle - February 13, 2011, 1:49 am

yes when i type in my defalt getaway from comand prompt i come up with nothing "adress not valid" what can I do about this?

san_rock1 - February 13, 2011, 3:44 am

thanksss man, just loved this tutorial

new.here - February 16, 2011, 1:31 am

thanks a lot m8 it works for a noob (me)
thanks again :P

maytap - February 16, 2011, 2:13 am

Thanx...intresting ledges....but it doesnt work everywhere.

jebou - February 16, 2011, 6:31 am

Damn :/ My modem thing says password "admin" and user "admin" but it doesnt work :@

CSAS - February 17, 2011, 10:16 am

Thanks , i builded my server succesfully with this , thumb up

ebonie101 - February 17, 2011, 11:41 pm

i cant port forward anymore. even on the website im doing it correctly it just say connection timed out but it worked a little while ago -__-

2't0X - February 18, 2011, 12:18 pm

what i must do i am on local area network i cant connect in my router

i have mikrotik but i can connect

BulletPR00FXX - February 18, 2011, 12:43 pm

I have a netgear router, and im getting the error message in the pic above, can you help me resolve the issue? I am not real sure what port(s) I need to forward (I followed the cybergate tutorial fine) but I assume the 100 we used in your cybergate tutorial is the only one? anyway, if you dont mind helping will you pm me. thanks for the help, and for the good cybergate tutorial. I liked how you explain what each button you click does. It really helps someone learn the program.

Greatest - February 19, 2011, 9:43 am

Thanks for this guide helped me a bit

Zeldak - February 19, 2011, 9:49 am

Thanks really helped !
/message short

jknice - February 19, 2011, 11:42 am

Good tutorial but i cant fix my forwarded port for cybergate server
can u fix for me ??
reply me on pm

spacess

iksiksiks - February 22, 2011, 9:30 am

Great tut, but i do everything right and still my ports are closed. What should i do?

Deathvault - February 23, 2011, 12:27 am

I have a wireless internet usb. So i don't need to do port-forwarding right?

peek - February 23, 2011, 3:43 pm

When I make my server on CyberGate you know how you make the user "YourName.no-ip.biz:port"
Why do you put 100 then when you showed the port forwarding you said to open port 82. Anyway I did exactly what you said and when I went to canyouseme.org I check port 82 and it said this "Error: I could not see your service on MY IP on port (82)
Reason: Connection refused

Inventor1 - February 23, 2011, 4:38 pm

I have a Q1000 router and have tried to port forward. When I get to the port forward page, I get this. It requires a IP address. Does anyone know how to port forward this router?

[img]http://screenshots.portforward.com/Actiontec/Q1000_-_Qwest/Port_Forwarding.jpg[/img]

Thanks in advance,

Inventor1

kneonKodo - February 23, 2011, 7:40 pm

Thanks Plutonium, helped me a lot :D

Dominance - February 23, 2011, 7:52 pm

Thanks for the guide on this, always was curious about Port Forwarding.

popobob3 - February 24, 2011, 9:38 pm

This was helpful. thanks :)

▣ **Nick™** ▣ - February 25, 2011, 6:12 am

Very nice tutorial, should help lower all the threads asking for portforwarding help.

The Coon - February 25, 2011, 8:41 am

I need help, i do this with port 82 and other ports, when i use UDP (if thats what it's called) It says connection timed out on canyouseeme, but when i use TDP it says Connection refused. Any help?
I have a belkin btw but don't know which model.

t4dp0l3 - February 27, 2011, 8:27 am

portforwarding has been a major pain! Thanks for the utorrent tip!

danidm - February 27, 2011, 9:02 am

Very nice tutorial. But will you please tell me that HOw can i port forward on Fiberhome Router?

modderofphones - February 27, 2011, 9:39 am

Thanks for explanation .. :)

Neverine378 - February 27, 2011, 12:13 pm

I always get an error in utorrent : TCP port bind failed 0.0.0.0:100: (10048) Only one usage of each socket address (protocol/network address/port) is normally permitted
Can someone help? THX

Toonnn - March 1, 2011, 2:55 am

I did open port check and recieved an error
Reason: connection timed out
Is this good or bad ?

termin - March 3, 2011, 4:20 pm

Good tut, nicely explained.

P?ris?m - March 3, 2011, 5:27 pm

What if it says "Connection Timed out"?

I'm on dlink btw. Whoever can help, it would be very much appreciated :)

Just PM me please.

Sudo - March 3, 2011, 5:39 pm

It supprises me that some still do not know this..good tut.

[Delta] - March 5, 2011, 7:36 am

nice tutorial

spoilerr

spoilerr

TheCreeL - March 8, 2011, 9:10 am

really usefull thx :) i'll port forward everything now XD

Kamehamehaaaa - March 8, 2011, 11:11 am

You can do this, or download PFCONFIG ;) it does this manual work automatically ;)

andrewofff - March 8, 2011, 11:56 am

thx for the utorrent tip!! you re the best

Jookajaaka - March 11, 2011, 6:21 pm

Hey, After i put the IPCONFIG into CMD, I do not get the resulst as shown on the first picture taken of the ip's. After I type IPCONFIG, i get a list of ip's but not labeld Ip adress, or IP gateway, i get IPV4 Adress, subnet mask and default gateway? i am a complete noob can someone help? i think ive missed something out but cant make out what it was.

B33RF3aR - March 15, 2011, 7:11 am

ahh my badluck my router doesn't have anything like in the pictures.. :(and in PFConfig doesn't included my router when i send a help msg it says only for register users :(.... damn badluck

dinosaur770 - March 16, 2011, 8:11 am

im stuck in the part where i have to put in the numbers to the port, not sure what to put since my pics are different from yours, if you could help me id appreciate it =) i even made a thread to it <https://hackforums.net/showthread.php?tid=1133810>

uglykidjoes - March 16, 2011, 2:05 pm

nice tut but what if none of the pass combos work? ive tried lots now and none fucking work , even all the ones wrote on the side of my router dont work

oldboy1985 - March 17, 2011, 9:28 am

great tut although i read this somewhere on net

cHs - March 17, 2011, 11:16 am

thxxx so much my portssss :D is now 80 :D thxxx

1337r0ck\$tr - March 18, 2011, 4:43 pm

AWESome guide man really good

zakn5 - March 19, 2011, 5:04 am

nice guide just need abit of help add me on msn?

BobsBees - March 19, 2011, 8:14 pm

If anyone can find how to port-forward for my router "ASUS Wireless Router RT-N10" I will love you for ever, If not my router just fked me over! =[

After 2HOURS of figuring out what to do I did it! :D

Libies - March 19, 2011, 11:09 pm

Good Tut Nice Work Man..!

weezy80 - March 21, 2011, 5:56 am

Hi there,

I did everything as shown. Canyouseeme.org is telling me that my ports are still closed. But the Open-Port-Check-Tool by portforward.com is telling me the complete opposite. the tool says all ports are open. so who should i believe?

edit: utorrent method is working. thx mate

[--Anonymous--] - March 21, 2011, 10:19 pm

I did everything in the tutorial but Canyouseeme.org keeps telling me that the connection timed out and that the connection refused. I have a Linksys Wireless N-Broadband Router Wrt160Nv3. Any help would be appreciated (:

Heres a screenshot of what i put in.

[\[IMG\]http://img828.imageshack.us/img828/4918/linksys.th.jpg\[/IMG\]](http://img828.imageshack.us/img828/4918/linksys.th.jpg)

stevengi19 - March 22, 2011, 5:54 pm

I downloaded this yesterday, got it to work but then today i couldnt find where i saved it so i just re-downloaded darkcomet but now i can't open the port. When I check to see if it's open i get a message saying "could not test port 83 because some other application has that port locked. Please close any applications that may be using this port and try again." I have everything closed, is the darkcomet i downloaded yesterday still running somewhere? can someone please help me with this problem. thanks!

also when i click listen on darkcomet i get an error message that says "cannot listen on port: 83. Only one usage of each socket address (protocol/network address/port) is normally permitted"

Pew - March 23, 2011, 10:35 am

I've pm'd you my problem , hope you will respond soon.

DaxxXyrax - March 23, 2011, 11:52 am

Ok, my router (TP-Link TL-WR340GD) is on the site portforward.com, I have done everything right I think ?. canyouseeme.org shows connection refused for every port that I try to forward. I'm currently downloading something with uTorrent on port 100, I forwarded that port in the router, but canyouseeme.org shows connection refused.

And my internal IP is always 192.168.1.100, my external is always xx.xxx.xxx.138 (whatismyip.com shows that). and my router shows that I have dynamic WAN IP (xx.xxx.xx.14 now). Can that be the problem?

Thanks.

And one question, what exactly is WAN IP? What's the difference between WAN IP and external IP?

Edit: "Roadkil's ScanPort" shows the ports opened! so, have I successfully PFed? But canyouseeme.org shows my external IP, and in Roadkil's scanner i scanned localhost.

CandyMan123 - March 23, 2011, 3:57 pm

I did everything in that guide and my port warding is wrong.

what the fuck?

(Mar 21, 2011 10:19 PM)Brandon9191 Wrote: [\[CITE\]](#) I did everything in the tutorial but Canyouseeme.org keeps telling me that the connection timed out and that the connection refused. I have a Linksys Wireless N-Broadband Router Wrt160Nv3. Any help would be appreciated (:

Heres a screenshot of what i put in.

[\[IMG\]http://img828.imageshack.us/img828/4918/linksys.th.jpg\[/IMG\]](http://img828.imageshack.us/img828/4918/linksys.th.jpg)

I did the same exact thing as you in that picture and I get the same result.

stealtre - March 24, 2011, 9:32 am

cool understand every word :D nice im norwegian by the way :D

DoctorJekyll - March 27, 2011, 4:18 am

Just to shed some light on the problem about "CanYouSeeMe" not working, try running a server on yourself and using the No-IP address not the local one then using "CanYouSeeMe" because somtimes it need a proper connection to the port to be there already before it can check, for example I can never see any of my ports as "open" on www.canyouseeme.org but once I test a server using the connection "iamhere.noip.org:67" then www.canyouseeme.org will automatically see that the port is open.

Obv I am talking about setting up portforwarding for RATs ;)

DutchProduce - March 27, 2011, 6:08 am

Thanks

good clean info

PASIØN - March 27, 2011, 6:09 am

Thanks for this guide, many people struggle with portforwarding and hopefully this can resolve most of their problems!

Regards,
PASIØN

Auswilly - April 2, 2011, 1:15 pm

I cannot manage to open a port, even with using every method in this guide. I will be sending you a PM.

hampaaan - April 2, 2011, 2:31 pm

tjena jag gissar att du är svensk eftersom det står på svenska:P

jag undrar varför inget händer när jag skriver min standard gateway i adressfältet... asså jag har firefox, måste jag ha google chrome?
jag får bara upp att det är fel sida oså...

tack hampaaan

SpikyTheHacker - April 3, 2011, 9:32 am

Plutonium kan du hjälpa mig lite med massa saker ? :D:D

skipperguy12 - April 7, 2011, 5:14 am

I got through the whole cyber gate tut. It was great! But now, my router is a little different. Like I cant exactly get the port forward to work. And UTORRENT didnt work either. Can you please reply as fast as you can, i'm starting to learn to hack.

alok541 - April 9, 2011, 10:31 am

great tutorial man..congrats?

fckpro - April 9, 2011, 11:11 am

Hello everyone ! Not a bad tutorial but just seeing the last page, many people can't get it working :)
I don't wanna advertise , but check it : <https://hackforums.net/showthread.php?tid=1198299>
Leave comments there ^^ Hope i helped.

MoneyExchanger™ - April 9, 2011, 12:29 pm

thank you bro!

thanks for share with me

Peelsaven - April 9, 2011, 1:26 pm

wow nice tut this helped a lot thnxxxx

djgamer23 - April 14, 2011, 5:58 am

Couldn't find my router on that site :(
My router name is : ASUS RX3041 Router
Some1 answer fast plz ?

Liamxxx - April 15, 2011, 1:08 am

Wanting to know how do i login when i go to portforward, what do i use, and where do i find the login detailss??

surya467 - April 16, 2011, 1:47 pm

IV tried everthing...utorrent, No=IP and everything else...can someone help me to forward port!!

Arkanjel - April 17, 2011, 8:31 am

Good tutorial I needed it!!!

KingKhaoticZ - April 17, 2011, 8:41 am

Thanks, this helped me! I was struggling to port forward with my router.

JebusOfSubergia - April 18, 2011, 3:44 pm

hi i dont have an option to port forward on my site it is with sky so if anyone knows how to port forward a sky router could you pm me?

thanks

~

JebusOfSuberbia

2pac-G - April 24, 2011, 6:12 pm

Ahh damid it says i fail , but i think something is wrong since my service is diferent theres like external port start , external port end, internal port scan , internal port end anyone can help me?

?r1PP|? - April 25, 2011, 4:37 am

nice tutorial, plutonium (like always :D)

k@\$f - April 25, 2011, 6:28 am

i still cant port forward..

i have a pirelli DRG124G ROUTER ,i have tried at least 5 tuts but something goes wrong my port is still closed..

gamer11fw - April 25, 2011, 7:16 am

Amazing the utorrent works! Thanks :)

iamangel - April 26, 2011, 3:03 am

but my ip is dynamic. it changes after every time i disconnect and reconnect. what can i do then?? please help

zenbio13 - April 28, 2011, 8:02 pm

THANK YOU soo much this helped me so much. I appreciate the tut.

IP-Killer - April 29, 2011, 8:23 pm

I do this and it does not work for me. canyouseeme.org cant even "see" me on port 80

Dhruvdutt - April 30, 2011, 12:32 am

Nowdays Port Forward is very hard
coz hardly any connection opens its ports
& allows Virtual Servers :(

EZ Wider - April 30, 2011, 2:23 am

Apparently my modem is unportforwardable.. What do I do :S

Fermonos - May 1, 2011, 1:23 am

Right, I've tried to open port 82 about 30 fucking times it just ins't working. Every time I'm getting this.

Error: I could not see your service on ..***.** on port (82)

Reason: Connection timed out

Via- <http://www.canyouseeme.org/>

Starting to piss me off think I might leave it if I can't get it sorted out soon.

<http://img822.imageshack.us/f/portforwardingd.png/>

dannyfenton - May 1, 2011, 9:34 am

Worked for me,it can see me on port 100! Great guide.

xTiNgUiSh - May 4, 2011, 5:38 pm

I am having some issues. I am using a netgear router. I'll pm you.

Shout - May 5, 2011, 12:07 pm

When port forwarding I'm getting an error that says: illegal port. I've tried using a ton of random ports but none of them work, do I have to change a setting in my router? (Its SMC)

Xxscript-kiddiexX - May 7, 2011, 7:35 am

im with Sky broadband and when i type my IP into the URL bar it doesn't come up with the pop up? is there another way to do this or am i doing it wrong?

please PM me,
many thanks,

IP-Killer - May 7, 2011, 2:55 pm

Thanks, I love your tuts!

badjoras - May 7, 2011, 5:41 pm

Thank you for the tut, really helped me. :D

Stormer123 - May 9, 2011, 1:14 pm

someone help me i dont know what to put to login after i have put my default server ip thing in address bar, i dont get it in the tut

jamjam19 - May 9, 2011, 9:01 pm

sir thank you alot you have helped a butt load lol

EDIT: NVM Stuck again none of these methods work

Raw. - May 10, 2011, 5:59 pm

my port 100 is open, but i cant figure out how to open port 82, can i use this RAT with only port 100?

RHacks - May 11, 2011, 12:22 pm

hello, im on sky and its completely different to your tut. I get to the firewall rules tab and i don't know what to do from there? how do i do it with sky?

Stormer123 - May 11, 2011, 1:21 pm

hey man i get to the bit on your port forwarding tut where you ave to login with like admin and password, then when i get to the screen where it shows all my info about my router on the left hand side toolbar there is no section called virtual server or portforwarding, where should i go or do you know where i can find out, the router i user is NETGEAR...

thanks maxx

swift racer - May 12, 2011, 6:31 am

i have a innomedia MTA 6328 router..i get the error 102 (when i enter my standard gateway or my ip)..server refusing connection..how the hell do i port forward??

btw...i hav a reliance connection..

gummyboy - May 13, 2011, 11:45 pm

thanks man. great tutorial

Omn1potent - May 14, 2011, 2:39 am

hey, i'm with sky broadband and i can't seem to be able to log in? i have used all of the passwords/usernames provided and also tried a few of my own, but i can't seem to log in? can anyone help because i don't really want to phone sky up and ask for it.

many thanks,

Qelasi - May 14, 2011, 3:59 am

ohh man i dont have the standard ip i just have default gateway :S
what to do ?

nep - May 14, 2011, 6:53 am

hi.. i'm not able to port forwarding.. i'm not using any router , im using broadband to my internet..can you help me?

i'm using cybergate...

MistleToe - May 14, 2011, 6:55 am

Nice tut. you should make it for other routers to!

elbably8 - May 16, 2011, 6:52 pm

im using linksys, its a lot different and confusing. can someone help

icydragon542 - May 19, 2011, 12:00 pm

I'm using a verizon router and its nothing like the one you have can you please help me =D

Ayo iTz Solo - May 21, 2011, 3:06 pm

Thankyou for helping me out with this but still I can't portforward, Pming you.

turcott1 - May 21, 2011, 3:51 pm

im totally confused i got a netgear router and i cant figure out how to enable cybergate protocol

Donald Duck. - May 21, 2011, 8:16 pm

I use a Clear on the go wireless USB, is it possbile for me to still portforward?

softarchive20 - May 21, 2011, 8:56 pm

Thanks for this info. Great post

Cool story bro - May 21, 2011, 11:08 pm

nice ttutorial keep up the great work bro

Daxos19 - May 23, 2011, 10:00 pm

So I have an Ambit system, and when I go to forward any ports, I do it just like your tut says as well as the Port Forwarding gurus, and any time i check to see if it is actually working, it still says the connection was refused?! How Do I make this shit work!!?!?! D:

Late - May 25, 2011, 9:22 am

I try to port foward it says connection timed out? tried port fowarding with uTorrent and it still said timed out.. you should've made the uTorrent part more clearer

jfockyou - May 26, 2011, 6:41 am

Okay, I just wanted to know something... when I go to www.canyouseeme.org It says Succes but ONLY if Cybergate is running ... when it's not it says Connection timed out. Is it normal ?? thx in advance and sorry if I'm asking a noob question hehe

EDIT : when cybergate is running but I didn't click on "START" it shows : No route to host in www.canyouseeme.org ... is it normal ???

muap - May 26, 2011, 7:11 pm

okay so on my virtual server tab, it doesn't look anything like yours, it looks much different, so lets say im running windows 7, how would i do this on that, were would i enter the port 82?

beastboy46 - May 27, 2011, 7:04 am

im not able to get logged into standard ip...page..i tried all of ur prescribed combinations..still..wat to do..plz help me

jazvec - May 28, 2011, 7:16 am

cant forward ports on d-link 524

please help. i tried everything but when i checked, ports are closed.

hemescool - May 28, 2011, 8:06 am

Thanks Bro Good tut

I use utorrent method to forward my port

Harry93 - May 30, 2011, 2:14 am

Dude, I've logged in to my Webbrowser but still can't find the "port forwarding" or "virtual server" anywhere. ?

[img]http://img823.imageshack.us/img823/1307/92648923.png[/img]

Tom70111 - May 30, 2011, 3:22 am

Good tutorial. I'm sure it will help lot's of people :)

Phexi - June 1, 2011, 4:31 pm

(May 30, 2011 02:14 AM)Harry93 Wrote: [\[CITE\]](#) Dude, I've logged in to my Webbrowser but still can't find the "port forwarding" or "virtual server" anywhere. ?

Go to Toolbox -> Game & Application Sharing.

Then click Create a new game or application, name it and select Manual Entry of Port Maps.

Click next and then fill out the info and click Add then click Apply.

After that click on Assign a game or application to a local network device on the botom of the screen, and in the drop down menu choose whatever you named it to and then the device. Click Add and then Apply and it's done.

BMA - June 2, 2011, 12:50 pm

Unfortunately i cant Get my User/Pass Because im connected to my Next doors (Stolen)... and im unable to get pass...

would the pass/user be the same as the router connect pass/user

gilded - June 2, 2011, 2:26 pm

I HAVE A LINKSYS e3000 router and i've tried the port forwarding but every time on canyouseeme

it says connection refused is there another guide for linksys routers?

lars90 - June 6, 2011, 1:26 pm

Is there any way to forward ports without using the router?

Numinous - June 8, 2011, 6:36 am

nice Tut buddy,,,

Really helpful....

asifali2000 - June 8, 2011, 8:17 am

NICE TUTORIAL thanks to share it

haloasc - June 8, 2011, 8:41 am

nice tut man looks really easy this will really help out noobies with port forwarding :)

Starcraftmaniac - June 8, 2011, 12:26 pm

This is great tutorial but I have problem portforwarding..

My router is Huawei HG552a1 and I cant find no guides how to portforward this because it's different from other tutorials I saw

Here is the pic:

[img]<http://imageshack.us/photo/my-images/232/routerv.jpg>[img]

Thanks for replys ??

mashruwala - June 8, 2011, 5:00 pm

I have a Lan Connection and when trying to type "Standard Gateway // Default Gateway" into my browser all i get..

[img]http://www.pikipimp.com/pp/pimped_photo/s/image/58/900/133/Scrnshot.JPG?ts=1307608022885[img]

Please help me. Thanx in advance :)

CyberM@X - June 8, 2011, 5:11 pm

<http://192.168.1.1> TCP 3070 > echo enable

too short ?

Rexxar - June 13, 2011, 11:00 pm

Whenever I type default gateway address in brower, firefox givig me error that "Unable to connect"

Anybody can help me plzzz

Eclipse - June 13, 2011, 11:40 pm

Thanks you for this tutorial. It works for me! (:

Eclipse - June 13, 2011, 11:40 pm

Thanks you for this tutorial. It works for me! (:

xx Hacker xx - June 14, 2011, 5:51 am

I followed your first TUT and it worked GREAT!!!

I just need help with this step

"Now Copy That "Standard Gateway // Default Gateway" IP And Type It Into Your Webbrowser & Log in"

Im completley lost on what i have to do

Help is appreciated

EDIT: I paste my Default Gateway into my Browser and i try to log on.

On my Router it says my Username is: admin and my Password is: password.

When i type these details into the 'log-in' and hit 'OK' the Log in feature just restarts itself as if i typed the incorrect log in

Help!@

laxguy - June 14, 2011, 8:55 am

Thanks for taking the time to post the TUT. Enabled a total newb to port forward.

crankfielder - June 20, 2011, 3:19 pm

I don't have the option to "remark" in step 4

what do you say?

I also don't have the option to "enable"

I'm having trouble. I can only get 15 connections. and their failed. I don't know why. When I test it on myself I get an error that pops up too.

"Unable to locate component

This application failed to start because mozsqlite3.dll was not found. re-installing the application may fix the problem."

My Utorrent port is the same as my CG Listening Port. As well as the server port such as no-ip:(port) they're all the same port number. Except for the port forwarding. I can't sync all three to be the same for some firewall reason. Assistance would be appreciated.

daehaking - June 30, 2011, 6:33 pm

Awesome tutorial! Im a fan :D

manele2011 - July 4, 2011, 12:23 am

maan :((((

When i type my subnetmask in the browser doesn't work :((
appears that:

Unable to connect

Firefox can't establish a connection to the server

open_surgery - July 4, 2011, 6:37 pm

No matter how many times i say thanks to you dude it would be less.
Really thanks alot.

F4rr3n - July 5, 2011, 9:44 pm

Nice and very detailed tutorial.
Thanks for share mate.

R1DDL3R - July 6, 2011, 7:01 pm

Just to clarify... if I'm using a computer that is not connected to either my router nor my modem, and is connected via USB wireless (to wireless router) I will be unable to PF?

technogeak - July 7, 2011, 8:10 am

it helped a lot.. good work to help beginners..thaks

SI4s#3r - July 9, 2011, 2:38 pm

Good tut but i cant use it.. it shows my default gateway is 0.0.0.0 err??

Sir RipZ - July 9, 2011, 3:10 pm

Good post, still a bit confused. More research it is. Whoo!

Abided - July 10, 2011, 3:35 pm

im using a laptop and its wireless and I portforwarded exactly how it said on portforward.com, do I need to plug a ethernet cable into my laptop to be able to portforward?

can you help me over team viewer to get portforwarding working i set up the rat good just cant get portforward to work for some reason even though i did everything right it just says connect timed out on canyouseeme

tjchaching - July 11, 2011, 4:06 pm

I am having a lot of trouble with my router and port forwarding. Send me a pm please

Primehouse - July 11, 2011, 9:08 pm

It tells me my port is blocked by my ISP, and the uTorrent trick doesn't work either.

Help would be greatly appreciated.

opx1230 - July 12, 2011, 10:16 am

Thanks very nice keep it up

LamadAWriterCru - July 13, 2011, 2:53 pm

i made it with utorrent.
does it work now?

Success: I can see your service on xx.xxx.xxx.xxx on port (82)
Your ISP is not blocking port 82

Krle97 - July 13, 2011, 3:18 pm

I have Huawei HG552a1 and i still don't know how to port forward :S

426F62 - July 13, 2011, 3:39 pm

Good tutorial, should stop some of those "How do I portforward?" threads... Good job.

Blaze - July 14, 2011, 7:14 am

OK a problem i am having.

I followed your tut word by word but when it came to the part when u make a virtual server...erg

I looked at some tut's for my kind of router and found this one.

<http://www.cctvcamerapros.com/D-Link-Port-Forwarding-s/286.htm>

With that image i changed:
Name to Cybergate
Ip to my LAN ip
Public AND private ports to 82
TCP to both.

I ticked the box,saved and then went to the website you gave to check if port 82 was open. It kept saying it wasn't open because 'Connection Timed Out'

Then i went to this site:<http://www.yougetsignal.com/tools/open-ports/>

Put my ip in and changed 80 to 82, click check and....

Port 82 is closed on xxx.xxx.xxx.xxx

If you could please PM me, or post here my problem, and how to fix it, it would be highly appreciated...

Thanks in advance,

Blaze

crazyamazing1 - July 16, 2011, 8:27 am

Ok, so Im trying to set up "portforwarding" But need some help here please?

After "ipconfig" I dont see any: ip adress not any local?

I see: ipv4 adress: and some numbrs..

: subnet mask: 255. and so on

: default gateway: (those numbers I get right)

So Im alittle lost on what to do (have tried and tried) but dont get any luck when checking at "canyouseeme"

I prty sure on how to set up my router but not what numbers to use.

Btw if I had an VPN should I use those ip numbers?

(what if they are random every time I log on)?

velho22 - July 17, 2011, 2:57 pm

my standard-gateway is 0.0.0.0 WTF?!

Diamond-eX - July 19, 2011, 12:16 pm

only trouble I'm having is to find the virtual server option, i have a 2wire router if anyone can help i would appreciate it, thanks.

Halidromos - July 19, 2011, 9:44 pm

Fantastiiic :D the utorrent way saved the day ^^

tannyc - July 20, 2011, 1:27 pm

nice tutorial..thnks for sharing..

rohit - July 21, 2011, 1:25 am

thanks for this great tut

i like it

Zikk - July 21, 2011, 4:56 am

I have a problem. A few months ago, everything worked well but now the problem is...

[img]<http://img29.imageshack.us/img29/190/beztytuutsq.png>[/img]

[img]<http://img36.imageshack.us/img36/4016/beztytuu2pqu.png>[/img]

i get a connection timeout on canyouseeme.org

ItzCody - July 21, 2011, 12:45 pm

Nice tutorial !!!!?

?Ñâzg?! - July 22, 2011, 10:26 pm

And what If you can login your router?

Ghost? - July 22, 2011, 10:46 pm

Very nice and detailed tutorial.

Good work :)

kSp - July 22, 2011, 11:15 pm

WORKS TESTED ON MY SELF NICE

rustamsoccer - July 31, 2011, 3:16 pm

GREAT GUIDE but i have time capsule for apple and i need a guide would u make one please?

iTzAs1anAiD4n - July 31, 2011, 3:22 pm

when i do this, nothing comes up, i think its cause of my Apple Airport. Can someone help?

Wojak - August 1, 2011, 4:45 pm

omg i need help really bad whatever i do, it says

Error: I could not see your service on 173.0.5.179 on port (12500)

Reason: Connection refused

i tried the utorrent method, tried different ports, had cybergate open, disabling firewall, but it always says connction refused

JarkTheShark17 - August 2, 2011, 5:39 pm

Thanks for the Tutorial Bro, I used it a long time ago and came back to it today to set it up on another computer. appreciate it.

Charaky - August 2, 2011, 7:07 pm

lol, my Dlink router is a peice of shit, despite being outdated, it still refuses to portforwd half the time, although this tut cleared things up for my and gave me a better understanding, thanks.

frostparse - August 3, 2011, 2:19 pm

Thanks, I needed this.

BonGo™ - August 5, 2011, 1:50 am

hmm it says illegal port for me in my gateway setup :(cant figure it out :P

ah so i figured it out ;) with my router i need to have a static ip in order to do this thanks for the guide! helped alot :)

but on the port checker it still gives me the error ? :(helllp!

could it be it doesnt work cuz the ip on the port checker is my real ip not the static one?

also if i do a port scan it says the ports are open :S

penguin19985 - August 5, 2011, 4:18 am

Good tut but...

5 starts for this shit?

Sorry ;)

LOLOL Port forwarding isnt illigal?

Its good

No more internet hosts ;)

xEliteWaffle - August 6, 2011, 8:09 am

Hey,

On canyouseeme.org, it says "Error: Connection timed out" in red. I'm pretty sure I Port Forwarded properly, but it won't verify that on the site.

Is there another way to check?

Thanks

firepaw10 - August 8, 2011, 2:47 pm

Nice tutorial but for me every time I portforward and go to canyouseeme.org It says connection timed out does this mean that I have slow internet or that it isnt portforwarded cuz when I had my minecraft server up And tried it pple could connect and canyouseeme.org still said error connection timed out. Thx

SI4s#3r - August 12, 2011, 2:10 am

made my day with uTorrent Port Forwarding ,thanks bro

SaggyBewbs - August 13, 2011, 5:14 pm

thanks this really helped me port forward for my RAT ?

Shutdown. - August 13, 2011, 5:37 pm

Swwet man, great guide thanks for the info.

1234567890-

lango121 - August 15, 2011, 5:56 pm

tja såg att du var svensk :D. vore grymt om du kunde lära mig lite om drakcomet vore grymt pma mig om du känner för att ge mig den hjälpen mvh!

Insidious. - August 17, 2011, 12:11 am

But... When I have to have uTorrent open to have the port open. and When I turn on Cybergate, port 100 can't be used because uTorrent is using it. How Do I fix this? (This is my latest problem,, Rats used to work perfect for me, I've had to close down my free rat service as well)

Unholy^ - August 18, 2011, 2:46 pm

Error: I could not see your service on 90.180.78.62 on port (82)
Reason: Connection timed out

Idk what do I do wrong :(Did everything the tutorial said (portforward.com)

QuiiKz - August 23, 2011, 8:47 pm

Is there anyway i can find my username and password

[Z]Cody - August 24, 2011, 10:33 am

I'm having problems with port forwarding.. i'm using Belkin and i won't let me type the private Ip address box, it only let's me type 3 letters and or numbers.. Someone help me!

I did everything correct and it still says :

Error: I could not see your service on 74.185.105.180 on port (82)

Reason: Connection timed out

SOMEONE HELP!

Polarity* - August 26, 2011, 5:26 pm

For those of you who are having problems port forwarding like I did a couple mins ago:

<http://portforward.com/help/doublerouterportforwarding.htm>

You may have more than one router connected to each other. Check out this website to give you

more information on how to fix it. It is possible.

If you have no idea what the website says: try port forwarding your "192.168.x.xxx" ip to both routers using whatever port your trying to open.

And of course this website to see if you did everything correctly:

<http://canyouseeme.org/>

Nechronik - August 28, 2011, 8:12 am

can i do it with simple portforwarding program? plz reply!

thnx!!

Moshie - August 28, 2011, 8:14 am

I like the second picture, Haha I love how you tried to censor that tab with arrows. ;P

wiNNNd.dLL - August 29, 2011, 4:43 am

Can you help me with port forwarding and set up rat..? please i need help

Nechronik - August 29, 2011, 3:14 pm

When I type my IP adress in the bar theres the username and pass thing but idk it and all the combinations from the tut dont work please help me!!

If you need my modem model its a THOMSON TG585 v7

thanks!!

Versio - September 5, 2011, 12:39 pm

I like this as a good beginners TuT..

As my router seems to be disabled to Port Forward, i'll leave it by there.

- Dylano

max785 - September 8, 2011, 7:06 am

Hi , I have problem with your port forwarding tutorial . On canyouseeme.com it tell me that my isp block port 82 ... what I should do ?

evelong698 - September 8, 2011, 7:23 am

okayyyy so i managed to successfully set up my RAT

but got stuck on step one here :

went to start . run. cmd and typed in IPCONFIG

instead of an ip address and all the rest i got :ipv6 address

link local ipv6 address

default gateway

any help would be appreciated?

SIM-955290 - September 8, 2011, 12:00 pm

Really nice simple tutorial! Realy good job man.

killermindhacker - September 9, 2011, 10:23 am

Nice but one problem is tha i have failed and got a program called pfconfig. Its for port-forwarding but i dont know the registration code..?? Anyone of u plzz tell me or my whole process will go in Vain

untilkatin - September 11, 2011, 11:59 am

I got a problem When I type my Gateway it dosent show anything at all.

newway - September 12, 2011, 3:18 pm

good tut but i am using 3g modem can i port forwarding 3g port
it is always showing 619 error or 628
answer one

Wires - September 12, 2011, 3:21 pm

Theirs no reason to portforward with Utorrent, just configure your firewall.

zhc_zology - September 16, 2011, 8:22 pm

Error: I could not see your service on ip addres on port (82)
Reason: Connection timed out

gis - September 21, 2011, 3:32 pm

I cant access the http://(IP) website, it says something about teamviewer and port 80 being blocked.
Anyone know how to fix this?

Await - September 21, 2011, 3:34 pm

I wouldn't use Utorrent it's shit for unup portforwarding.

paulos - September 22, 2011, 3:36 am

Nice simple and usefull tutorial for the beginners :D

- Keep up the good work :D

H@KER - September 22, 2011, 3:54 am

can i use my utorrent's forward port for rat?

box3r1 - September 22, 2011, 8:02 am

Is it necessary to port forward before using a rat ?
coz my router is a shared one and i am living in ahostel,so the guy have setup a password on
router :(
so i cant access that router
if u have any ideas or any solutions kindly share it with me
wt to do now :(

Quahas - September 22, 2011, 10:51 am

This tutorial is great for beginners :) Really appreciate the effort !

byunis - September 22, 2011, 12:08 pm

This tutorial is very helpful for us beginners and very much appreciated! Thanks

boriis - September 24, 2011, 6:11 am

Hey could you please pm, i am new to this site, and i don't havve enough posts yet. But i have a
problem at the beginnen, i can't find the virtuel server, is it because i live in frace? my provider is
"orange " its a french provider
thank you

I cant find my router password and so on... HELP PLZ

d-block - September 27, 2011, 2:31 pm

great guide but im having trouble with this

i try to forward my port but it gives me this error "

Reason: Connection timed out" not connection refused. whats the problem?

hiperpoo - September 27, 2011, 4:13 pm

Great TuT hope to see more :D

PS: Yes Finally 10 Posts!!!

s3|261μ - September 29, 2011, 2:17 pm

hi! i do not have a modem, or a router! my internet cable is plugged directly into the computer... what can i do about this? can i still port forward? thanks!

Adx3 - September 30, 2011, 4:47 pm

(Sep 29, 2011 02:17 PM)s3|261μ Wrote: [\[CITE\]](#) hi! i do not have a modem, or a router! my internet cable is plugged directly into the computer... what can i do about this? can i still port forward? thanks!

You have to have a router somewhere it doesn't plug into your computer directly from the outside. Excuse me if I'm incorrect.

ak 74v - October 3, 2011, 2:21 am

Hey, i watched ur rat tut. And i did port 100 on it, do i need to port forward with port 100 or 82? reply fast thx!

ourlivesuck - October 3, 2011, 1:05 pm

Great Tutorial. Helped me alot. And too answer the question above port forward port 100 and 82 to be safe, thats what i did.

MrJouleJr - October 6, 2011, 5:19 am

Thanks man a very good tutorial for beginners, and since i am a beginner it works for me

sorry but i need to get 10 posts for a pm :/

Don't have enough posts for a PM :/

ive had some trouble because port 82 was obviously blocked by my ISP... so ive downloaded uTorrent and clicked the random button. checked with Open Port Check Tool and it says im visible :) is there anything else i need to change due to this uTorrent change. Any ports or things like that???

ov3rdo - October 8, 2011, 7:47 am

Awesome, really helped me out! thanks :)

SafeHavens - October 9, 2011, 8:13 pm

Had a friend show me how to portforward. We ended up doing a factory reset, that totally screwed up everything.

raimisbmw - October 10, 2011, 2:19 am

great guide, i like it..helped for me ;)

Gorsko - October 11, 2011, 1:39 pm

@Plutonium, first of all thanks for the Cybergate tutorial,second,i've been tryin to open port like 2

months now, and i failed, until i read (saw) your Utorrent Port Forward. Thank you so much !:)

MisterPain - October 13, 2011, 2:30 pm

Thanks for the helpful guide, but my Router and Modem suck, and won't open the ports :(.

TooDoubtful - October 15, 2011, 11:45 am

very nice guide thanks mate for it! :D

Frosti3 - October 16, 2011, 10:35 am

good tutorial thankyou so much! ^.^

xsugarmanx - October 17, 2011, 4:51 pm

(Jul 5, 2010 09:01 PM)Plutonium Wrote: [\[CITE\]](#) What Is Portforwarding?

Port forwarding is necessary for using different tools, Such as RATs and uTorrent and so on. Please follow this guide on How To Port Forward and you'll have your port forwarded :)!

Hey Guys!

This thread is necessary for my cybergate tutorial:

<https://hackforums.net/showthread.php?tid=545871>

Today i'll teach you how to port forward through the router & modem. (Not with PFConfig :))

Lets Start!

Start off by going to: Start -> Run -> CMD -> And Type IPCONFIG

[IMG]<http://i978.photobucket.com/albums/ae264/Rasmuz00/FASDASD.png>[/IMG]

Now Copy That "Standard Gateway // Default Gateway" IP And Type It Into Your Webbrowser & Log in.

[IMG]http://i978.photobucket.com/albums/ae264/Rasmuz00/IP_2.png[/IMG]

My username is Root - nothing. The router // modem accounts usually are these:

Admin -

Admin - Admin

Admin - Password

Admin - User

Admin - Root

Admin - Custom Password, Check underneath your router for it! ;)

Root - Admin

Root -

Root - Password

Root - Root

Root - Password

Root - Custom Password. Check underneath ;)

User - Root

User -

User - Admin

User - Password
User - User
User - Custom Pass.

And so on.

Once you're logged in, Go to the "port forwarding" or in this case, "Virtual Server"

[IMG]http://i978.photobucket.com/albums/ae264/Rasmuz00/lp_3.png[/IMG]

[IMG]http://i978.photobucket.com/albums/ae264/Rasmuz00/DASDSAD.png[/IMG]

Virtual Server: Enable / Disable.
Local IP: Found In IPConfig, As IP Adress.
Start Port: The Port You Want To Forward, Start Port.
End Port: The Port You Want To Forward, End Port.
Protocol: TCP & UDP or BOTH
Remark: The Name Of The Wished Forwarded Program.

And When You've Saved The Settings, Go To Canyouseeme.org And Type Your Port In There, And If It Says

[IMG]http://i978.photobucket.com/albums/ae264/Rasmuz00/lp_5.png[/IMG]

Then You've Succeeded Your Port Forwarding.

If It Says

[IMG]http://i978.photobucket.com/albums/ae264/Rasmuz00/lp_6.png[/IMG]

You've Failed. Then I Advice You To Take A Look At Portforward.com And Look For Your Router Or Modem, Once You Find It They Have A Port Forward Tutorial There.

Or Try To Have The Application You Are Forwarding For Open, Like Cybergate & Try Again!

Utorrent

IF manually portforwarding doesn't work, then you'll need to use Utorrent. ;). You still need the port "100" forwarded in your router for this to work. First of all you want to download Utorrent, which can be downloaded [--> HERE! <--](#).

Easy instructions;

1. To set a single port, navigate to Options > Preferences > Connections
2. Click "random port" once, and note the port number provided. This will be the port number you will be forwarding in your router. (You may also assign a port number of your choice)
3. Uncheck "Randomize port each time µTorrent starts." The port number will no longer change each time µTorrent is started.

[img]http://i.[censored]/iemvkY.png[/img]

If you need any help with this, feel free to send me a PM! ;)

//Plutoniumonly have pubic wireless rite now.How do I port forward?

Predator_Crack - October 17, 2011, 4:56 pm

(Oct 17, 2011 04:51 PM)xsugarmanx Wrote: [\[CITE\]](#) only have pubic wireless rite now.How do I port forward?

If you have public wireless you may can't have access to the router/access point.

Just try with a rat that supports upnp to see if any port works for you (darkcomet)

- if you need help i have serious problem with my teamviewer license (disconnects after 5 mins) but glad to try to help mate

Dubbeltyee1 - October 20, 2011, 8:17 am

nice tutorial.

I have open my ports also doing it by myself and my friends help:D

Inform - October 26, 2011, 11:28 pm

My portforward page looks nothing like the edit modify page that yours has...Can someone teamview me and help?

<http://imageshack.us/photo/my-images/832/whattodoy.png/>

Theres a picture.

My ip address in the default gateway that you told me to enter is different then the one on the canyouseeme page as well, is that because its external or am I doing something wrong?

Someone private message me or help please going to bed soon.

stelioss - October 29, 2011, 1:58 am

nices tutorial!! old but nice .. Look At Portforward.com and find your divices

abdulbadie7 - October 29, 2011, 2:23 am

hello

guys i'm new member here

i need a keylogger please help me

please pm me

THANKING YOU!

predator_crack can you please assist me with my portforwarding, I hav an AT&T U-VERSE 2-wire I followed this guide the best I could <http://www.pcwintech.com/2wire-generic-guide-2-all-models> but i still have no luck <http://canyouseeme.org/> i used that to check if the ports were open but they always

had connection timed out please help me! :)

Romperin - November 5, 2011, 10:41 pm

I've got a Belkin router, and you can't set "Both" as the type (TCP UDP) So I set one for both, everything is set up correctly, I think. I believe everything else is set up the same, other then I used everthing like you did, as that's probably just an example, I'm not quite sure.

-- Anyways, if someone can give me some advice, help please.

The "Canyouseeme" could not access.

Reason: Connection timed out

Does that everytime. Anyways, some get back to me soon.

Please and thanks.

-- Edit: I found the portforward page on www.portforward.com but I did exactly that, no sham Pictures of what I get.

i43 . tin ypic . com/ 34hvb.png

No spaces obv.

Make sure that you insert the correct lanip (192.168.1.x or anything else...depends on the router itself) and that you have any software firewall disabled (windows firewall, comodo, outpost, internet security suite FIREWALL)

Romperin - November 6, 2011, 10:58 pm

Alrighty, thanks for the advice. I didn't shut off my firewall, so that may be the problemo.

I'll get back to you guys soon.

hobo fights - November 7, 2011, 12:01 am

nice tut keep up the work !!! !!! !!!! !!! !!!

WannaHackLol - November 8, 2011, 11:48 am

Hey there Plutonium, great work! You've put a lot of efforts in all this. Very nice tutorials, explained very easy, perfect for noobs like me.

But i have a big problem. If i type in my default gateway in my browser, it can't find anything, so i

cant use that method. But on the site of my internet provider you can log on with your id and password, and there in advanced settings you can port forward. So far so good. But when i try to enter port 82 it gives me an error saying the port number has to be between 1023 and 65536. o.O" What's wrong?

Thx.

Predator_Crack - November 8, 2011, 12:29 pm

use anything above 1300 for example 9192 and retry. Some ports like 80,82,23,100 used for specific services and sometimes they are blocked.

WannaHackLol - November 8, 2011, 1:06 pm

(Nov 8, 2011 01:29 PM)Predator_Crack Wrote: [\[CITE\]](#) use anything above 1300 for example 9192 and retry. Some ports like 80,82,23,100 used for specific services and sometimes they are blocked. Thanks for your fast reply! But apparently for cybergate i need to open port 82 and 100, don't really know why because i'm a noob lol :) Are there any other ports that will make cybergate working?

I might sound a bit dumb, but i just started with this today.

Predator_Crack - November 8, 2011, 1:27 pm

No mate, you don't need to use the ports that tutorials mentions. Use any port as i said.

WannaHackLol - November 8, 2011, 1:53 pm

The IP you get from CMD is not the real ip - external ip but the LAN IP or better ipv4. You need to test with your no-ip host in cybergate settings in order for your server to work. The slaves will connect to you with the help of no-ip and not the ip you get from cmd.

LuubezZ - November 11, 2011, 10:23 am

I cant find where to do this as i have a netgear router.. please help, nice tuts btw

safwen - November 11, 2011, 11:06 am

great one man but is there any way to portforward a usb 3g modem ???

U STRAIGHT RATCHY - November 14, 2011, 12:22 am

This TuT is AMAZING. I love it, helped me out so much with my Booter and RAT! Thanks!

Hey there, I am trying to set this up, and I am wondering what should I press... "Single Port Forwarding" Or "Port Range Forwarding"? Thanks!

Ian Brown - November 18, 2011, 12:22 pm

Can someone help?

When i use 'canyouseeme.org' i get this:

Error: I could not see your service on (My ip) on port (82)

Reason: Connection timed out

Anyone know why?

GordonBM - November 23, 2011, 7:00 am

Yes, same problem as LordVader.

Also, I cannot edit the IP in my router portforwarding page. It's set at 192.168.0.[I can edit this]
I can only edit the last 3 digits...

Broda - November 23, 2011, 10:59 am

I have a problem too (nooby one). I have tried all possible passwords for my router, but it just keeps saying "wrong password". Heeelp.

wonderfulife - November 23, 2011, 11:45 am

Hh boy I love, I who can not open a port manually, I do it with uTorrent and it works. I do not know how to thank you guys!

I love u ! :D

Angelic™ - November 24, 2011, 8:24 am

Thanks a lot this helped me so much, much appreciated

TheMustak25 - November 24, 2011, 9:09 am

damn im bizzy with opening port, its not working fucking router.
i have eminent 4450 router.
can some one help me?
thanks

anohacker911 - November 24, 2011, 11:14 pm

i have verizon and i dont know my parents account info u____u

Prime - November 25, 2011, 10:59 am

I know this is a nice tut but i have a problem, when i typ my Standard Gateway in google chrome it doesn't find something.. Can you please help me.

Thnx

Tuukka01 - November 25, 2011, 11:10 am

Nice Guide for Portforwarding! I have already portforwarded my router to cod4 :D

Dolphin. - November 25, 2011, 11:44 am

Would this work if a slave downloads and executes my server? e.g: If I've forwarded the 2001 port for UDP/TCP for my router and made DarkComet successfully listen to port 2001 with UpNP, the servers I've built are configured to my no-ip address and port 2001? ?

can you see any problems with the above?

quintz - November 26, 2011, 3:51 pm

[IMG]http://k.minus.com/jb1BL6cTJprdJD.PNG[/IMG]

Using uTorrent with CyberGate. God damn >.<.

Gokus Dog - November 26, 2011, 4:01 pm

Great tutorial taught me how to port forward

King Z - November 28, 2011, 2:15 pm

I can't stop reading this thread it's so Amazing.

SwagLikeCaillou - November 29, 2011, 3:05 pm

I have a 2wire 2701HG-B router. I can't find anyone doing it with 2wire. It is hard to follow this tutorial on port forwarding with 2wire :/

-SCV- - November 29, 2011, 3:43 pm

yea i cant port forward on a linksys e1200 if some one could help me im willing to pay \$\$

TheyCallHimBoss - November 29, 2011, 3:47 pm

...post coz im cool woottt lool ...

DsntExist - November 30, 2011, 8:58 am

I don't understand why he set up port 100 for the cybergate rat but chose to port forward 82 in this tutorial.

TheNeutron - November 30, 2011, 9:25 am

A great tutorial. Just what I needed.

chrisinho - December 4, 2011, 4:59 am

Really nice tutorial, helped me a lot, thank you!!

SWEET_GIRL - December 5, 2011, 1:39 pm

can you help me plsss

forward my port,,

all i read tut but still not open.. plzz i need help

ShadowRi5ing - December 5, 2011, 3:17 pm

Thanks bro, keep making goood tuts like this

Quote: Thanks, this helped a ton! hope you keep making tutorials, great job. Hope you also check out some of my :D

Habs - December 6, 2011, 1:09 pm

Nice tut will help out a lot of beginners

Agent Q - December 11, 2011, 10:21 pm

Seems this has solved my port forwarding problems but one problem. I have to have utorrent running to keep the port open. Will this create problems with a RAT using the same ports?

yarwood - December 12, 2011, 12:40 am

can anyone tell me how to find out your computer login and password when you port forward because i tried all hes suggestions plus the username and password i use when i connect to the internet so please reply if u know how

Golliath808 - December 12, 2011, 12:56 am

This is the fifth tut about PortForwarding lol, if you enter portforward.com you could choose your router model and see the tut for it just like thisone

wert2828 - December 12, 2011, 1:32 am

when a type my gateway i says this webpage is not available?
help plz ? ? ? ? ? ?

yarwood - December 13, 2011, 12:42 am

Invalid ip address! cannot be LAN(my standard ip) can u please help

Makaveli. - December 21, 2011, 11:47 am

canyouseeme.org still doesn't see my service:/

pedro_kangkong007 - December 27, 2011, 6:59 am

dude is there any option in port forwarding if you dont have access to your modems username and password..?

i hope you can help me thanks

OTRON - December 27, 2011, 7:51 am

This is pretty cool, Great guide

Thanks man

Immunity - December 27, 2011, 12:35 pm

When I type in my gateway, it says it can't connect /:

master god - December 29, 2011, 8:16 pm

AND WHAT IF IT SAYS : Error: I could not see your service on (IP ADRESS) on port (82)

Reason: Connection timed out

Mystique221 - December 30, 2011, 4:38 pm

Thanks alot dude!Great guide,helped me alot.

Btw I have a problem regarding CMD,could you pm me your e-mail or something so I could ask you about it please?Im not yet allowed to PM. thanks!

jcarn18 - January 2, 2012, 2:32 am

Thank you so much man

I Love you TUT's =]

MultiHacker02 - January 2, 2012, 4:29 am

Plutonium, är du svensk? Jag är också!

xlnvaDe - January 2, 2012, 4:40 am

It is easy but thanks for your guide

tobbepro - January 6, 2012, 6:22 am

Thank you! Well explained guide, works perfect!

voodoooflame - January 8, 2012, 11:26 am

It say Port 82 is an illegal port. Is there any other port I can use? I have a SMCD3GN.

SIM-947411 - January 9, 2012, 5:56 am

Good tutorial, it will help people who need this it's really good...

Netberg - January 9, 2012, 6:11 am

Thanks for the help, did help me alot with my Blackshades.
Have fun.

reconfury - January 11, 2012, 8:22 am

does it matter if the name is cybergate not Cybergate

Bill Nye - January 14, 2012, 9:40 pm

I am having problems port forwarding, my router is PF but my modem needs to be and I am getting frustrated because it is not working properly.

Grey125 - January 14, 2012, 11:55 pm

Thanks a bunch!! This tutorial is incredibly helpful. :D

xswrain3 - January 15, 2012, 12:06 am

ty, this post is great and helped a lot

Hesco - January 17, 2012, 1:26 pm

It doesnt work for me since i dont have a router or real ip wanna help me me out bro please?

CyberSupial - January 20, 2012, 12:30 am

Thanks for the great information on both setting up cybergate as well as the port forwarding, Everything I did worked without a hitch, but for some reason the open port check tool is giving me an error saying it times out. I have a hunch that this is caused by my firewall, but when I have the firewall make an exception it seems to block all of the interwebs, but again thanks I'll figure this out eventually :D

Joe Negri - January 20, 2012, 6:04 pm

How do you forward a 2wire gateway?

swimmer - January 20, 2012, 7:00 pm

very good tutorial ! very interesting

Thanks after two tries it works wonderful :)

Thank you very much

DubiousObject - January 23, 2012, 10:53 am

I have a problem with the standard gateway thing, when I copy it and put it in my web browser it doesn't work, it just automaticly goes to Bing and find anything on the web that has these numbers in it.. what do I have to do?

thanks in advance

assassincredo - January 23, 2012, 1:20 pm

i have a problem with the standard gateway when i put in a new webbrowser i doesnt connect so if there is a other way can you explain it to me on a pm pls

thanks for now

Jam2556 - January 23, 2012, 4:43 pm

This helped me a whole lot. Just had to use UTorrent.

C1st1C - January 30, 2012, 12:47 pm

Thanks man, great TUT :) I have seen a lot of tuts but your is the best :)

burding - February 1, 2012, 12:07 pm

can you do it for me? i did everything but its shows different for me

the1447elite - February 1, 2012, 1:01 pm

My router was fucked up b4, but then you gave me the idea to look wich port utorrent is using and that port for example "5000" is open !

2short2do69 - February 4, 2012, 2:26 pm

I have an thomson 789vn dutch router and i cant portforward with it its really hard , Alot of people have problems with it anny help please private message me.

mortis - February 4, 2012, 2:35 pm

Nice tutorial bro, im sure its gonna help alot of people!

Luckintosh - February 6, 2012, 4:11 pm

The portforwarding didn't work in my router admin so i did the utorrent and than checked the port canyouseeme.org and it said "Success"I can see your service on 82.xx.xxx.xxx on port (53943)
Your ISP is not blocking port 53943.

Is it done??

pls reply, thanks.

If i put port 82

Error: I could not see your service on 82.44.xxx.xxx on port (82)

Reason: Connection refused

if i put port 100

it says success

i'm confused..

nuggs-8 - February 7, 2012, 9:03 am

hey, thnx for tut .

only having one problem i cant forward the ports 1-1024 are blocked by my isp. is there anyway to bypass this?

xPoverty - February 8, 2012, 11:40 am

i couldnt do the ipconfig method :\

so can you plz explain to me about the utorrent one ?

all i need to do is press random port at the program ? :S

janco809 - February 9, 2012, 12:04 pm

thxxx man that helps very much!!!!

Its great!!

keyloggerv3 - February 10, 2012, 7:17 am

thanks for this guide. i wasnt able to portforward using the regular method.

but this one worked.

kul att se svenskar här.

svennebanan :D

justjilan - February 10, 2012, 7:49 am

I am Getting ipv6 address ,but u have mentioned for ipv4 ..is the procedure same for both ipv4 and ipv6???

?Raw - February 10, 2012, 3:57 pm

Error: I could not see your service on xxx.xxx.xxx.xxx on port (82)

Reason: Connection timed out

Vir2ListiX - February 10, 2012, 9:13 pm

Nice tutorial. It should help out the noobs alot.

undera - February 11, 2012, 4:07 pm

nice man tut .i did that , every single word

every single step

but seems not working at all
any way thanks ..

Ace Coder - February 11, 2012, 8:50 pm

Thank you for the help with this, but for some reason (after following this guide as well as the one at portforward.com) the canyouseeme site still says error because of timeout? Is this a problem? It isn't saying the port is blocked, but not saying it is open...

theanonymousguy123 - February 12, 2012, 11:38 pm

That utorrent trick is fucking magic bro, thank you!

NeverHauntMe - February 13, 2012, 2:26 am

good guide mate, bookmarked !

35 character..

kamronkelin - February 13, 2012, 3:33 am

Nice tutorial bro.i have already visited in portforward.com .but i did not find my port number.please give me a suggestion how can i forward this?

xmidnightxlonerx - February 13, 2012, 3:32 pm

i cant om you but need help. please pm me or somebody D:

paine131 - February 13, 2012, 4:18 pm

Will I need to do this if I use a RJ11 connection?

secrets2 - February 13, 2012, 4:28 pm

Make sure that you get a router where you can set it so that each computer always gets the same local IP based on the MAC address or else the DHCP server on the router could reassign you a different local IP and void all your ip forwarding settings.

paine131 - February 13, 2012, 4:35 pm

Do you know what a rj11 type is? :/ That would only end up having me share a dial up connection
><

XInfant - February 16, 2012, 10:48 am

LOL, he had porn in his most recent :P

jessyray - February 19, 2012, 1:57 am

i cant seem to forward port 100, can you please help me? ive tried forwarding through my lynksis router, (dont know what to put for the last digit it asks for on the ip 192.168.1.[0] the number inside the []) and ive downloaded utorrent and tried opening the port but when i run dark comet or go to open port checker they say its not open.

Please help

Thank you

paine131 - February 19, 2012, 2:01 am

you mean too the router or what IP to PF too?

Px5 - February 19, 2012, 3:34 am

Hmm very nice way..

I use a Premium VPN for portforward, I think its better.

Anywayz thank you :~)

NeoXx™ - February 21, 2012, 11:33 am

Best tutorial ever about setting up cybergate! :D

daworkinmex - February 21, 2012, 8:00 pm

I it wasnt working for me my router brand is linksys i keep getting this message Error: I could not see your service on *.* on port (82)

Reason: Connection timed out

TrollSaysGG - February 23, 2012, 6:42 pm

For starters, like me , this is a very helpful and clear tut , Thanks ^__^

nicee : O i found the utorrent PF alot easier and faster, only for the reason it doesnt let me go on my default gateway and idk why

evildead4ucomon - February 25, 2012, 10:32 am

i use nokia n72 modem for my internet... do i need to port forward as my ip always changes as i connect internet...

G0Z - February 25, 2012, 11:24 am

Thank's a lot for the help it work better now :)

Brains - February 25, 2012, 12:16 pm

Thanks for the tutorial. It really helps alot :)

ironangel - February 25, 2012, 1:55 pm

Thanks man this looks really nice .

stroeckx - February 25, 2012, 2:37 pm

when i type the standard-gateway in my browser, it just says can't find the page, any ideas what i'm doing wrong?

r3dh4wk - February 25, 2012, 7:19 pm

nice tut ... but in my router settings .. i cant find the "both" or "UDP" or "TPC" option at all ...

canyouseeme.org confirms the port got opened but all other programs "e.g : Rats" say it didn't work ...

help ?

Slaytanic - February 27, 2012, 9:58 am

Ive port forwarded but canyouseeme.org says its not? its not just port 82... any port i tried wouldnt work!

I got a Cisco EPC3825 router

john.ferao - February 27, 2012, 1:05 pm

nice work bro the only thing is that its not same on every router thats why some times its hard to know-

AERO. - February 27, 2012, 2:21 pm

this guide is good but doesnt work for me

CrazyExGf - February 28, 2012, 6:03 pm

I would just like to say, I FUCKING LOVE YOU! Been having problems with port forwarding so I figured I might as well try the uTorrent way, and of course, IT WORKED :D Thanks bro.

DoomLuicferBringer - February 28, 2012, 7:47 pm

when i press run for ip config it flashes then closes.

preetam - March 4, 2012, 4:57 am

I am using Telenet TNDL 2120, but am not able to forward port in my router. virtual server option is only not available in the router. please have a look at above screenshot.

[img]<http://img339.imageshack.us/img339/4838/routerp.jpg>[/img]

JaggerNotchas - March 7, 2012, 9:06 pm

Im using a Mac book pro, Yes "Modern apple crap" i hate it, but everytime i portforward for ANYTHING it never works Im doing it all right. Ive tryed multiple times portforwarding, im using parrallels desktop, for it. not sure if its the best one for me to use? but if you could please help me out through team viewer, or somthing screen share wise.

Thanks.

OneHundredPercent - March 7, 2012, 10:00 pm

Good tutorial, it will help people who need this it's really good...

Best tutorial ever about setting up cybergate! :D

PAULSAGE02 - March 8, 2012, 5:36 am

Great tutorial man, thanks for sharing your knowledge :)

codyth - March 14, 2012, 3:03 pm

I try to port forward, but it doesnt work. help! I can port forward everything but then I have no connections.

Tonsillar - March 15, 2012, 11:05 am

Thank you so much but i only have one question: if my port is 54615 on utorrent does that mean my RAT will now work?

paro - March 15, 2012, 11:10 am

omg nice tut thanks bro it will help me !!

anonhaxor - March 15, 2012, 8:30 pm

thank you so much i can now play age of empires 3 because of this

guitargod546 - March 15, 2012, 8:38 pm

Thanks so much!! Really Helped Me!!! :)

Hellodere - March 16, 2012, 12:54 am

hello, im using a Cisco Linksys E1200 router. When I login to my basic settings, i go to application and settings, the sub-tabs are

"Single Port Forwarding", "Port Range Forwarding", "Port Range Triggering", DMZ and QoS. I did all of the steps you told me to on "Port range forwarding", and canyouseeme.org said it cannot find me because the connection timed out.

BihariBabua - March 16, 2012, 4:28 am

Thank You Sir This helped me alot

I hope I learn more from here :)

Xander4399 - March 16, 2012, 9:53 am

Great tutorial it works fine for me, Thx bro

muskelmorfar - March 16, 2012, 7:40 pm

If I use port 100 on utorrent, I can't use it on my RAT too :/

_guardian - March 18, 2012, 3:18 am

shot :D great tut, :))))_)_)_)_)

Jettthebuizel - March 22, 2012, 11:24 am

Turns it to be I have to router. Our internet is wireless and I have no default gateway.

herrdeutschland - March 24, 2012, 3:55 pm

dude ,but we portforward with the help of the cybergate program ,i mean it s enough isn t it ??

xMiRZ - March 24, 2012, 5:09 pm

Thanks for the tutorial. Much appreciated.

Naween - March 26, 2012, 1:06 pm

i have a usb mobile modem for internet, does it matter, do i still have to port forward cause i type my default gateway into my web browser, and nothing happens

manis0077 - March 27, 2012, 4:26 am

i have usb card,not have router,then how to get portforward

Markets - March 27, 2012, 5:07 am

Good tutorial, it will help people who need this it's really good...

meziougg - April 1, 2012, 9:55 am

very well detailed tutorial thanks alot !

TehFadez - April 1, 2012, 11:59 am

Doesnt seem to work for me, gonna try it when i get nVpn

Quibbous - April 2, 2012, 6:28 pm

Uh-oh.. I definitely need help. I'll PM you. I love you tutorials by the way, you helped a total noob through half of this :-)

fromeabowe - April 5, 2012, 9:59 am

on "canyouseeme.org" it says: I could not see your service on (my ip) on port (82)

Reason: Connection timed out. What is the problem i did exactly as you said. Plz hope if you answer.

And one thing more, Are you frome sweden?

D620 - April 5, 2012, 11:14 am

Great guide, this will help a lot of members within the forums.

dead lock - April 5, 2012, 3:45 pm

I can't get my port 82 opened and I tried everything :(

TreasureMan - April 6, 2012, 12:06 pm

i have linksy's and i could not find what you showed in your tutorial please pm me i need help

Nness - April 6, 2012, 4:20 pm

Thank you for this guide [:
It was very helpful

King of the South - April 7, 2012, 3:10 am

I'm loving this great tut. Nice and perfect guide.

Keep it up.

Regards.

RadioactiveMicrobe - April 8, 2012, 5:34 pm

I'm a bit confused on what I do with this.

I want to get passwords logged from a single computer. (not mine) So what do I port forward to?
(total noob here)

TheLiberty - April 12, 2012, 4:24 am

I have to go to work right now but will definately try this, i've done the cybergate tut not so long ago and couldnt figure out how to actually port forward to 82 because on my router setting signing in, there was nothing there to allow me to, im confused but hopefully when i try this tonight ill make some sence of it :) Thanks in advance looks like a v good guide.

corvenik - April 12, 2012, 4:28 am

very well detailed tutorial thanks alot !

samoclan - April 12, 2012, 3:41 pm

Great tutorial! Really cleared up a lot for me, thanks!

Sureal - April 12, 2012, 7:06 pm

Hey bro! please help. i put my Ip, and I cant login no where? I did the utorrent thing. Is that all I need to do?

Just put 100, and uncheck the box, and apply. And Im done? Please reply thanks so much.

ExZeter,

TheAmb15 - April 14, 2012, 4:56 am

Its a really good tourtorial it really helps me
thank you in advance

DeC0Dr - April 14, 2012, 5:06 am

Thanks Man It's Really Help Specially Beginners Like Me.

iN^SaNE - April 14, 2012, 5:27 pm

I'm using a cisco router and when i went to applications and games and went to port range fowarding n enter my stuff and went to check port 82 it said error it couldnt find n that stuff

King of the South - April 14, 2012, 8:58 pm

I'm loving this tut every time and every day.

One of the best HQ tutorials. Nice and absolutely perfect.

Keep it up and Well done for the great job.

Regards.

free33 - April 20, 2012, 5:02 pm

can i portforwording on proxy. and what is the main excess of port forwarding. am sorry just learning ethical hacking i will be glad if i can pm on full tutorials thanks

policijaigor1982 - April 20, 2012, 5:38 pm

i have tried everything you have write and i cant get portforwarded

can somebody help me to portforward my router?574 793 286 team viewer or sexandlies82 on skype

King of the South - April 20, 2012, 11:06 pm

I'm loving this tut every bit of moment i go through it.

A very good one from the HQ member. Love it.

Thanks mate, for your great commitment to helping other members on this HF.

Keep it up. Wishing u more successful tuts like this in the future.

Regards.

PeWz - April 24, 2012, 9:16 am

Having a problem on the third picture you got a list of files but not on mine i can't find any? i'm using a Thomson TG789vn Help please :D / Fixed that portforward with utorrent instead but i got an problem what i'm supposed to write for port at utorrent? /82/100?

l3g4llyh4rml377 - April 30, 2012, 10:29 am

i am not able to find my modem on portforward.com :(mine is indian bsnl broadband.. any help guys?

xandru8 - April 30, 2012, 11:01 am

(Jul 5, 2010 10:24 PM)Plutonium Wrote: [\[CITE\]](#) Yeah, Sent PMs to iBruteforce & Yin. Hopefully a response soon

i have been trying the last 3 days to get the port forwarding going but i have a little problem in my router it asks local ip and remote ip and i don't understand what am i supposed to do here can anyone help pls ??

TanyaB - April 30, 2012, 11:11 am

I managed to portforward perfectly using your guide, much appreciated.

DarkCodings - April 30, 2012, 11:22 am

Thanks i needed a little help on that last part but thanks for everything.. You made it very clear:D

TwinBlade - April 30, 2012, 2:39 pm

Doesn't work with :

THOMSON TG585 v7

=(

Sirenfal - April 30, 2012, 4:06 pm

This is all neat and all, but It really supprises me how fat and lazy people can be not to be able to click around and gain knowledge. I portforwarded in 3 minutes without this tutorial, when i WAS 7.

Infinity. - May 4, 2012, 6:56 am

Mate my default gateway is 172.30.1.1 and i really cant open that address in web browser ..
What shall i do?

King of the South - May 6, 2012, 12:24 am

(May 4, 2012 06:56 AM)GG.Rajni Wrote: [\[CITE\]](#) Mate my default gateway is 172.30.1.1 and i really cant open that address in web browser ..

What shall i do?

When you tried to open it in your web browser, what was the result you got or had ? Can you tell me please ?

Regards.

N3p BoY - May 6, 2012, 12:56 am

Good tutorial, it will help people who need this it's really good..

Xiez - May 9, 2012, 7:48 am

None of the usernames/passwords worked for me, help please?

Peoplebehatin - May 9, 2012, 9:05 pm

Hey I love this tut and I want to try it but its not working?

King of the South - May 9, 2012, 9:45 pm

Absolutely nice and a perfect tutorial mate.

Keep it up. I wish you more successful threads like this in the upcoming future.

Regards.

smitpaul - May 10, 2012, 6:21 am

My router settings also ask for me to put the I.P. Address directly before entering which port i'd like to open. Do I use the I.P. address found under ipconfig (beginning with 192.) or do I use the I.P. Address that my router and and whatismyip.com tell me? (this beigns with a 2.) Which one do I need to use?

fallingangel - May 12, 2012, 8:18 pm

very helpful guide, greatly appreciated.

gross gore - May 13, 2012, 10:55 am

When I went to canyouseeme, it said it doesn't see my port. (Which is 100)

fallingangel - May 13, 2012, 11:03 am

(May 13, 2012 10:55 AM)gross gore Wrote: [\[CITE\]](#) When I went to canyouseeme, it said it doesn't see my port. (Which is 100) Make sure that your utorrent is closed before proceeding with canyouseeme. Utorrent uses/blocks the port.

woodleei - May 13, 2012, 11:29 am

great tutorial for N00bs! :D Good Work!

PkGlitch1 - May 13, 2012, 11:32 am

Great tutorial helped a lot!
35charr

coodiesonme - May 13, 2012, 7:12 pm

Q: Instead of it saying, "Connection Refused" on canyouseeme.org, it says, "Connection Timed Out". Help please.

katal - May 13, 2012, 7:14 pm

blocked out pornhub with the arrows had me dying, very funny mayne.

Peoplebehatin - May 13, 2012, 9:54 pm

So I got 100 to work but when I try 82 it wont work?

demonlayer - May 14, 2012, 8:16 pm

awsome tut all clear im allset up but i have 1 problem (Have this problem not just with this program)

(x= Number)

Error: I could not see your service on X.XXX.XXX.XXX on port (XXX)

Reason: Connection timed out

Can you help me ?

BaSingShe - May 17, 2012, 12:46 pm

What if I am on a dedi server with no knowledge of router and static IP? What if I set port to 80?

SIM-111414 - May 17, 2012, 1:22 pm

Very good tut bro.

HQ tut with images and explanations.

Thanks for sharing it.

osos96 - May 21, 2012, 9:38 am

my router doesn't have this option in its menu only:

System Management

Diagnostics

System Log

Logout

Firewall

Port Mapping

LAN Setting

Wireless Lan

System information

Service information

so is there any way i can use a rat now i actually liked prorat so much but couldn't setup it i built a server and did every thing but i can't get the victim ip address i tried it on my self and wrote my ip address but didn't even connect

also i liked this one cyberGate but i can't port forward so any help please

also i liked this one cyberGate but i can't port forward so any help please

Hack3r420 - May 26, 2012, 3:32 am

Very Great Tutorial
But i don't have a router so i use VPN Like proxpn, Cyber-ghost, Hotspot Shield and some others.
But in my case "Canyouseeme.org" says "Connection Time Out" and some time "connection refuge"
Whats going wrong can anyone explain plz its important

ONE MORE THING i m using this applications in VMware Workstation 8.

sv650_pimpin - June 2, 2012, 7:00 pm

Hey bro, been a while since I used cybergate. Thanks for the refresh. Back to trolling...

Praid1337 - June 2, 2012, 7:56 pm

Awesome tut, perfect for a noob like me

NightTommy - June 2, 2012, 9:04 pm

What does portforwarding do? does it make the website bypass your router?

Ozymandias - June 3, 2012, 7:01 am

this has been so much help! thanks so much :D

Eunoia - June 3, 2012, 11:21 am

i didn't manage to port forward using my router, but port forwarding using utorrent worked! thank you so much :D

Ruthboy - June 5, 2012, 7:40 am

i get a diffrent page when i log into my router theres nothing called port forwarding or virtual

krishnav891 - June 5, 2012, 8:02 am

when i type ipconfig in CMD i get this PPP adapter xx:

Connection-specific DNS Suffix . . :
IPv4 Address. . . : XXX.XXX.XXX.XXX
Subnet Mask . . . : XXX.XXX.XXX.XXX
Default Gateway . . : 0.0.0.0

Ethernet adapter Local Area Connection:

Connection-specific DNS Suffix . . :

Link-local IPv6 Address . . : fe80::9d42:4ad7:
IPv4 Address. . . : XXX.XXX.XXX.XXX
Subnet Mask . . : XXX.XXX.XXX.XXX
Default Gateway . . : XXX.XXX.XXX.XXX

and when i type my default gateway ip address in web browser unable to open :(

utorrent port forwarding is working for me :)

TheOne0 - June 8, 2012, 8:26 am

Does the port (start port and end port) must be 82 or it can be 80 or some else? pls answer ;)

buddhist - June 11, 2012, 12:36 pm

I got it! You may have done the same thing I did...:

In the previous tutorial (<https://hackforums.net/showthread.php?tid=545871>), where he showed us how to set up CyberGate, it was told to listen to port 100, which we will be forwarding later. In this tutorial, he uses port 82, which is what I tried at first, before going back and reading the first tutorial. After Port Forwarding again, this time using port 100, I have finally received a "Success". ?

wzaza - June 15, 2012, 1:19 am

(Jun 12, 2012 05:57 PM)Penoris Wrote: [\[CITE\]](#) I have the same problem, and I've tried it numerous times!

Yeah i finally figured it out for myself just before i read this post i was using a different port from both of them but for some reason once i restarted my comp the utorrent method worked.

i need a booter - June 15, 2012, 1:23 am

hey dude i need help i cant find out my username and passwords i tried those but not working skype is ipkedvlsi or send pm or comment

Hacker 4949 - June 23, 2012, 2:26 am

i got you very well clearly explained :)

Thank You :)

BeginnerHack - June 24, 2012, 6:39 am

Hey dude, My broadband is a Orange home one and its kind of different to your one. I figured out how to get to the port forwarding section of it but I just dont know how to do it.. please PM me for my skype stuff

Zonated - June 24, 2012, 11:29 am

I'm having trouble setting up port 100. I tried it in my router and the checker still said "connection refused." I went into uTorrent and changed it to port 100, but it still says that. Do you have any tips? Could you PM me?

Thanks! :)

20dash - June 26, 2012, 6:30 am

i could not able to port forward it... :(
what to write in server name and remote ip here: <https://i.imgur.com/cB8vM.png> ????
plz reply soon....

Blizzard12 - June 27, 2012, 8:42 am

When I log in at my router (using IP) I go to Advanced Settings, then there is Port Forwarding AND Virtual Server, which one do i need?

SoH exe - June 28, 2012, 12:52 am

I'm exactly sure if i port forwarded correctly, instead of saying "connection refused" on canyouseeme.org it will say "Connection timed out". I'm guessing it's pretty much the same, but i'll try it again.

iAmNawt - June 28, 2012, 1:08 am

alexfaf - April 12, 2013, 9:25 am

very helpful guide, thanks for this ?

King-Of-Hacker "PiatOs" - May 11, 2013, 5:34 am

what kind of DLL i download? only i type on google is DLL for cybergate? and download?

herowest - May 25, 2013, 3:21 am

how do port forwarding on my linux openvpn/server

niks143 - August 28, 2013, 12:02 am

Guys....I have two main problem regarding creating stub and portforwarding..First when i click 'build stub' after doing all neccessary things, i get a error message showing 'Generation aborted by user'..what should i do to fix it? Plz help me and i need help in portforwarding...When i copy and write the default gateway in the URL box i get 'webpage is not available'....What should i do?? I have an IDEA 3G netsetter dongle...therefore should i need to portforward it to use darkcomet?? You can reply,PM me or send an email to -woozworldlost@gmail.com.

Please reply quick....!(Request)....Thnx..

Austerity - August 28, 2013, 4:21 am

Very nice tutorial, I'm sure it will help many members.

Blackout08 - October 16, 2013, 4:49 pm

I'm new here, and this was definitely a useful guide! Thanks.

janofer - October 25, 2013, 1:05 pm

Good job. Thank you. Please send me more such things.

FrogKing - November 16, 2013, 10:44 pm

Hey great tutorial. I am not new to port forwarding but am having some issues with my current hardware. I can't seem to manage to open any ports.

I have a modem connected to a wireless router and have disabled the firewalls on both of them as well as on my desktop. Yet I still can't manage to forward a port properly, any suggestions?

darkjay - March 27, 2014, 5:28 pm

Sorry for bothering you but i try all day to port forward, and it happen to work sometimes when i look ont canyouseeme, but like 3-4 min after it still fail, i think im behin two router and i'm on windows 7, i have set a No-Ip host i don't know if it can block somthing, i'm a noob and tryin to start learning,

I did try to go on both router adress than add the port forwarding to both but like i said it doesn't work or when it does it's just for 2 min

I try the port 1500

My first router is a Zhone Gateway 1511 A1

Than it go wireless into a DIR-615 v3. Dlink

Can somebody help me set that up so i can try a Rat tool like DarkComet correctly

Thanks in advance

benitodelmonte - March 28, 2014, 6:04 am

Used this guide a while ago, coming back to say thanks. Thanks!

Mokum - March 29, 2014, 7:44 am

I tryed everything but i can't get my port open...

is there someone who wants to help me?

pm me please.

thanks in advance! :)

techy1 - August 23, 2014, 6:45 pm

Does anyone know how to port forward an Apple Airport Extreme I need this port forwarded to port 3175 for a RAT program! Thanks! Rep will be given to those who help!

TheCrazy8th - August 23, 2014, 8:44 pm

Great tutorial m8. Glad to see people giving back to the forum with knowledge.

ScienTisT - October 26, 2014, 8:53 am

umm i know how to port forward and theres just one stuf that messes me up my ipv4 always changes how can i stop this and make it stop changeing ?

vboy - January 1, 2015, 7:21 pm

Thanks for this TUT. Im used to playing with the router but this was plenty of help

jambogini - January 7, 2015, 7:51 pm

please i do not have a router, rather, i use my android phone to connect to my laptop via hoptspot tethering, my question is how do i port foward using my android phone connection to my laptop. urgent response will be appreciated

steellice - February 10, 2015, 10:30 pm

Hey plutonium, I need help but i can't PM you),: Do you have skype? If so plz PM me your name and i'll add you

What_Is_Hax - February 11, 2015, 10:37 am

Thanks Bro. Keep up the good work! ???

-GetRekt- - May 26, 2015, 10:54 am

Hey can you help me out with port forwarding, pm me plz or pm me ur skype

adenfr - August 1, 2015, 4:53 pm

Thanks man to share
Thanks in advance

Strayta - August 1, 2015, 5:19 pm

awesome stuff man! well be referring back to here in future

zongemadel - August 8, 2015, 11:29 am

I have smile network and i have added port still not working

AbelNightroad - January 11, 2016, 8:44 pm

trying to connect with you on skype "ab3ln16h7r04d". Looking forward to working with you.

bravo90 - January 21, 2016, 1:51 am

Are you still here, plutonium?

juiceman2020 - April 28, 2017, 11:10 pm

wow man this is really useful holy shit i didnt even know u could do this!!

Machiatto - October 27, 2017, 9:44 pm

Use the one through the safari extensions. On the top bar of screen go to
Safari
Safari extensions
Install "AdBlock Plus"

Schlong - June 18, 2020, 8:15 am

great thanks. nice tutorial

highboy - *July 1, 2023, 11:32 am*

This helped me tremendously thank you soooo much!!!
