Thread: [Fresh e-mail lists \(real e-mail addresses\)](#)

? Soufian ? - April 12, 2016, 1:52 pm

Sup guys,

I'm about to launch a new project, for this project I will be needing a huge load of emails to send promotion emails to.

I need these email addresses to be real and not some fake generated email addresses.

I prefer Gmail, do any of you know a provider for fresh quality email lists?

This would be really appreciated! ?

Larry Lovestein - April 12, 2016, 4:29 pm

I have a good sized email list checked and verified they're real.

Vicci - April 12, 2016, 6:00 pm

I need fresh e-mails which have been active this year, do you think you can provide me that?

I have millions of real email entries for multiple games / MMO's

You would have to format the databases yourself to be just mails. I'll sell them for a reasonable price.
