Questions and Answers Spoiler ([Click to View](#))

Q: Does the keylogger support Unicode and Global keys?

A: Yes, it does.

Q: Does the keylogger capture game keys along with login details to different online services?

A: Yes, it does. In case you don't get any results, I will show you.

Q: Is the keylogger FUD?

A: Your files will only be obfuscated to stay secure but maybe not be FUD.

If you want to crypt your files to make them FUD, then you need to buy a crypter from the Cryptography market.

Q: How will I receive my keylogs?

A: There are currently two ways of retrieving logs; Either use SMTP (Mail) or FTP (File transfer Protocol).

Q: Is it possible to ask you for support?

A: Yes it is. That's included when you purchase our product.

Q: How often do you release updates?

A: Depending on what kind of bug I find, it might take around 1-2 weeks. But it usually takes less than that.

Q: I can't compile my file, what should I do?

A: Since this is a server-sided client, you might have to wait up to 1-2 hours before the Server goes online again so you can compile your application.

If you don't like waiting then send me a PM and I will see if I can re-activate it again.

Q: What should I do if I find a bug in the application?

A: If you find a bug, please contact me as soon as possible so I can repair it.
