Thread: [\[TuT\] Adf.ly Script \[iMacros\] \[EASY\]](#)

manny118 - April 13, 2016, 10:32 am

Hello HackForums members,

I am sure that many of you know Adf.ly and use it for earning some money for your applications. For the ones that have never heard of it Adf.ly is something between Google's AdSense and Bitly. This means that you can use it to earn money by placing advertisements in your website or by Shrinking and distributing URLs. Adf.ly doesn't care if the person clicks the skip ad button so we will not be clicking it in this script. Only thing we have to do is wait for 5 seconds but, to make sure we get the money I made it seven seconds. This guide was made for the ones willing to learn ways of making money out of Adf.ly fast and efficient.

Part 1 : Requirements

I will add links once I have enough posts!

For this guide we are going to need:

Mozilla Firefox (tested) or Google Chrome (not tested)

iMacros for Firefox or iMacros for Chrome

Adf.ly Account

Adf.ly Auto Clicking Script: [http://bit\(.\)cur\(.\)lv/AdflyBot](http://bit(.)cur(.)lv/AdflyBot)

Part 2 : Setup iMacros

Now we are going to configure iMacros

1. Open iMacros [Press F8 (Windows) or the icon in your Browser]
2. Move to Edit tab and click Options
3. In the General tab change the Time out Limit to anything you want (above 1000)

Part 3 : Configure Adf.ly Bot

In order to use CoinURL BoT you need to place it in iMacros Folder which is placed (default, WinXP): C:\Documents and Settings\User\My Files\iMacros\Macros

If you are using other OS or Windows Version, then you can find where iMacros folder is placed by going to Path tab in iMacros Options (see Part 2)

After you have placed the Adf.ly Bot in the iMacro's folder you need to edit it. To do so:

1. Open iMacros
2. Find the Adf.ly Bot By TeamSensation.iim and right click
3. Click Edit Macro
4. A new window will now open. Edit my Adf.ly Links with yours.

Where you see:

Code WAIT SECONDS=7

Then edit this to however long you want it to wait. Must be 5 or higher for you to get the money!

Part 4 : Starting the bot!

1. Select the bot's .iim file.
2. Select the tab play.
3. Look for Play (Loop)
4. On top of it should be a Max setting.
4. Change that to however many times you want the bot to run and click Play (Loop)

IMPORTANT:

I am not responsible for anything that may happen while using the script.

THIS DOES NOT INCLUDE PROXIES!

Fleckens - April 13, 2016, 10:34 am

This won't work as you need proxies to do so

Crory - April 13, 2016, 10:35 am

For the Lazy ones [Adflybot](#)

VrOcKs - August 30, 2016, 7:01 am

But will that even work? as you are viewing the link so it would be considered as NO Views i myself made a bot without any proxy support and i got like 3k Views on 3k links still got 0 btc

Jordibdn16 - August 30, 2016, 6:29 pm

Yo need a proxie to work :(

Dermyz - August 31, 2016, 9:36 am

DOesnt function because it count only One per day

houssem2525 - March 8, 2017, 8:20 am

thankssssssss man for this script

Hopsin - March 8, 2017, 10:13 am

This is 1 year old thread mate. Also, this could get you banned and there is high chance that this script might no longer work. Have a nice day?
