Thread: [Bi-Weekly Giveaway! Stay Tuned in!](#)

'Suicide - April 13, 2016, 2:36 pm

Hi HackForums!

Due to my [Bragging Rights](#) receiving a lot of attention. I decided that i'll just give away even more to HF Community.

I'm here just to give back to the community.

The rules are very clear:

1. If I don't like you, you will not win. Very simple. (Shoutout to the people who kicked me out of Dawn the next day after i paid)
2. Just make a post on how you will either show off your award or spend your cash (lie if you don't want to put your business out)
3. Follow the format i give you
4. Re-read #1.

So I'll be giving out these awards!:

Or \$20 BTC/PP

And if you're the very lucky:

Or \$40 BTC/PP

Format:

Code Step 1 (Finish the sentence, doesn't matter how long or short): I plan on improving [b]myself[/b] by:

Step 2. Choose a random Number between 1-10000

Step 3. I love you FlossinRod

So the winner i will PM. I will switch up the way i choose the winners bi-weekly, and you can never stop winning. I do not care how many times you enter. There will never be 2 winners the same year also.

I plan on keeping this alive forever.

Let the games begin!

minimalist - April 13, 2016, 2:37 pm

I already have all of the awards so I'm just asking this for clarification: biweekly = 2x a week or biweekly = every 2 weeks?

Every two weeks. And since you have all the awards you can accept a cash prize. \$20 regular and \$40 if i make it a bonus week.
