Thread: [\[FREE\] CompTIA Network+ N10-006 \(2015 Objectives\) Course \[FREE\]](#)

Silent Militant - April 14, 2016, 12:13 am

I have a video course of Network+ N10-006 I am giving away! It has 8 hours worth of lessons(91)!! The file is around 500MB but it's very good material if your planning on taking the Network+ Exam. This is the most recent course with Network+. I have used the same person on my A+ Course learned a lot for my A+. Also, I have tons more of course covering CompTia, Microsoft Exams, Programming, and programs like FI Studio, Unity, WireShark.

Topics:

- Fundamentals of Networking
- Components and Devices
- Network Addressing
- Routing and Switching Network Traffic
- TCP/IP Protocols
- Network Cabling
- Wide Area Networking
- Wireless Networking
- Management and Troubleshooting
- Network Security
- Network Troubleshooting
- Networking Tools

Post below, or PM me:)

I took training for the Network+ last summer and have my notes and the book from the class I took

(through New Horizons). This would be a great study tool. What other training courses/videos do you have? I am planning to get a lot of certs this year actually.

Really interested, thanks!!!
