Well, I couldn't sleep all night lmao and I was really bored, so I kept messing in Photoshop for hours and this is what I came out with.

Bare in mind, this is like my 2nd time doing Double Exposure and it's been a loooong time since I did any photomanipulation, so be a tiny lil bit lenient, okay? Haha. Would appreciate any feedback, cc and comments.

Thank you!

The main problem I have with this is you've lost the definition of the shape you're masking all the other faces on top of; if you trace the outline it just looks like an amorphous blob that you've pasted random faces over rather than a carefully thought through shape that the other faces add to and complement. I like the colours, and I like the main text. I'd ditch the sub-text, personally. It has too much visual importance.

Thank you for the feedback! It's much appreciated. It's just something out of boredom haha, I'll plan the next one before I make it instead of just recklessly doing whatever I feel like.

I don't understand what it is tbh

What is the item all the faces are clipped onto?
