Thread: [Introduce me to a DoS'ing program?](#)

**introview** - April 14, 2016, 1:34 am

Hey everyone, I was wondering if someone can please introduce me to a guy who has a DoS kit. I'm not really trusting sites cause, usually the sites don't work, always have an error and etc, etc. ?

If you are a seller viewing about this forum and is willing to sell me a kit for DoS'ing, contact me. Just pm me and I'll give you my kik. ? And please bring along evidence your sales were successful, trustworthy. Thank you so much ?

You dont get Kits for dosing dude, you buy a booter on the internet its all web based, You use a Control panel on the booter to tell a server to rape, Its not a file you download and launch from home

Nothing is wrong with stressers they work well.

Try one of these [Layer4](#)

[Stresser network](#)

I mean hypothetically you could download LowOrbitlonCannon which would be a file you download and launch from home, Maybe the kids internet has some next level 300gbps power you never know, He might live in the steam servers

But I've used vBooter (and a couple more which I cannot remember) and they didn't take down my target that's why I'm not really trust worthy with sites. Like how I knew was I was in a skype call w/ him and nothing

What sort of attack did you select to use, Chances are you used a layer7 on a home and layer4 on a website

Host: (Random IP) Port: 80 Time: 120 Method: Free users can use only UDP. I used this attack and no, I just had vBooter open.

Their you go ? "Free users" honestly dude, practically every paid booter will down a home, Buy this <https://booter.xyz> for a month, and use UPP or SSYN and it will down them

Different, if you mind can you give me your skype? I want proof that it works. It's not like I distrust you or anything I just got a booter and it doesn't even work. So, thats why I'm asking. Thanks
