Thread: [Captcha while trying to send pms](#)

IMostlyLurk - April 14, 2016, 5:25 pm

I am sorry good sirs, but I must inquire as to if it is normal to have to enter captcha to send pms, or if I have done wrong and this is solely happening to me. Thank you for taking time to finish reading my question. I bid you good will.

minimalist - April 14, 2016, 5:29 pm

It's related to what's inside the PM (use pastebin.com if sharing code), your country, and your IP (and surrounding IPs/block).

You yourself have done nothing wrong.

Thank you good sir, you have been of much help to squash my confusion. I shall consider this question to be answered. Good day.
