What do you expect of Enigma?

I expect Enigma to provide me with a distinctive and informative experience that is all-encompassing in relation to the various technologies that are prevalent in my current day-to-day life. I would like to join Enigma and be welcomed by a group of individuals whom I share similar interests. I want to have access to the discussions, group activities, guides, and public forum

activities that come with being part of a user group. In addition, I expect to engage Enigma's community not only to provide input, but to absorb knowledge from those who are experienced in areas that I am not. I continually strive to enhance my knowledge base, and I hope to be able to do that here.

Specific Skills?>Large body of health and health-related knowledge

>Proficient writer

>Very skilled FPS gamer

>Money management

>Above average understanding of technology (not an expert;however, part of the reason I am joining is so that I can develop in this area)

Please list contributions you have made to HF:<https://hackforums.net/showthread.php?tid=2843729>

Why should we pick you?

I'm a 22-year-old Canadian Dean's list student finishing my 3rd year of my BsN (Bachelor of Science Nursing). I hope to pursue a MSN (Master of Science Nursing) and become a nurse practitioner. Therefore, I have amassed quite a large body of health and health-related knowledge, which I believe is unique on a forum that is predominately composed of those interested in computer science based skills and technologies. I am also quite knowledgeable about video games. As stated above, I do have an above average understanding of technology, and I believe that I can quickly develop in this area if given access to a group based on technology.

I was the #1 overall ranked GB player for Halo Reach for the first 7 or so months before taking a break. I have amassed the records in my signature, in addition to many other top page teams during my time on Gamebattles.

The overall theme from the aforementioned is that I have the drive to be great. Therefore, I will be a productive member who is actively engaged in improving myself, and others in the group, through my inner group interactions and my interactions, that are representative of the group, to the community. I am not a user simply trying to acquire a user bar.

Bo Burnham - April 14, 2016, 11:30 pm

What do you expect of Enigma?

I expect a group full of talented individuals who aren't only contributors in the sub-forum, but as well contributing in the sections around HF.

Specific Skills?

Remote Administration Tools,

A meagre amount of knowledge in .net,

Speaking and writing English,

Social Engineering,

Advertising/Advert Creation

Please list contributions you have made to HF:

A Remote Administration Tool [Help Desk](#)

[SimpleRefresh](#) is a little tool I made to boost online time in forums. I made it for myself to use originally, but upon thinking, I decided to release it for other people to benefit from it.

[SimpleSpam](#) is a tool that was made for this [This Spreading Method](#). People have the option to use it and it would help them be more efficient.

My [Spreading Method](#) does give HF users something to start off on in terms of a "RAT"

I also dedicate most of my free time being part of the [Luminosity Link Support Team](#) and I have been apart of it for awhile now. I get quite a few requests on skype requesting help with their RAT and how certain features work.

Why should we pick you?

There is no specific reason to pick me. I am a 16 year old college student that lives in the UK, using free time to assist other members. I study when I can and the other half of my time goes on HF.

What do you expect of Enigma?

A friendly and active environment as well learn some new things I might not know about already, as well try to regain a reputation in the Hack Forums community again.

Specific Skills?Very Proficient FPS Gamer

-Proficient in Counter Strike: Global Offensive Skin Trading.

Proficient Writer.

Decent understanding in technology. (Willing to learn more)

Please list contributions you have made to HF:Currently making a movement based tutorial for the Counter Strike Global Offensive Community. (WIP)

Offering a Brokering Business (In Sig)

Why should we pick you?

I am always willing to learn about new things and I can offer help in some fields some might not understand, I am trying to become active again so in doing so I will be posting in the sub section this group offers as well in some of the regular forums sections. I am always trying to help people whether it is on here or out.

Anything Else?

I am a 16 year old with an intrest in technology as well, I am always trying to learn new things, such as web development resulting in me being a decently fast learner. I spend most of the time on the computer so I will be active when ever I am needed.

What do you expect of Enigma?

I'm expecting a lot, maybe too much for a group on Hackforums. But basically, I'm looking for a group filled with knowledgeable persons, who know exactly what they are doing and how they are doing it. A group with people aimed around the same objective, be the best of the best, always share their knowledge and gaining more knowledge around discussions. A group where you can discuss with everyone without getting insulted back, where you can discuss what you want, the way you want, receive advice about which method is the best.

A group where the discussion is open and the objective is the same, learning.
Specific Skills? Backend Development PHP (OO, Laravel)
C# (ASP.NET)
Meteor
Java EE (Hibernate, Spring)
FrontEnd Development AngularJS
Meteor
Razor
Xamarin.Forms
Project Management (Scrum, Kanban)

Why should we pick you?

Because I'm an active member of the coding section, I'm not a lounge whore (public lounge I mean), and my objective is not to get the highest reputation count, all I want is to help to one who deserve to be helped, and I do not care if I got neg-repped for being honest to someone.

Also, I'll bring my knowledge in my field of expertize, help peoples, and take part into group projects.

Anything Else?

I don't think, sorry for my English, I'm Belgian, and I've always been in learning new languages :(

What do you expect of Enigma?

I expect Enigma to be an active group, whether in the sf or out as in Skype. I would like them to be as passionate to helping HF and each other as I am. But I also want to have fun, groups bring a special feature to HF, it gathers many HQ people who are interested in the same thing and creates friendships. Thats what I expect and want form this group.

What do you expect of Enigma?

Some group projects where everyone could create something that we can be proud of. I also expect to meet some nice people and having some discussions about programming, mechanic and electricity. There are lots of skilled people I would like to learn from too. I expect a place where you can share your ideas and your knowledge to people who actually listen. I don't wanna feel like I am back in the school again so I expect being able to start discussions without being insulted or similar.

Specific skills?

- Creativity
- Graphics
- Webdevelopment
- Internal marketing
- I am a qualified electrician and mechanic (I am a instructor)
- If you want to know more send me a PM.

Contributions to HF?

I did lots of stuff for many people. I am not the guy who is posting giveaways all day to gain reputation, fame or something else. I think there is only one giveaway I posted. People who know me know what I do for other people. Especially on Hackforums.

<https://hackforums.net/showthread.php?tid=5028254>

Why me?

I love to share my knowledge and I am learning fast. There is lots of stuff I can teach people because of my work experience. I would like to be a part of the group so I could have some nice discussions with people skilled in things I do every day. Currently I am working on a nice project I would like to post in this group. I would do group projects where I would make stuff with CNC cutting machines for Enigma. This could be a course where people could be creative by creating their own projects which get real and it is a perfect thing to improve people's programming skills. I may list more here later but let me talk about me a bit. I am 22 years old and I run a part of a company selling forklifts. You maybe noticed my English isn't the best but I am getting better every day. I am talking English a lot at work that's why I even know how to write in English. Well except my work there is lots of other stuff I do. I am a Thai boxing and going to the gym often to keep in shape after a long day in the office but don't think I have no time for group projects. That's it.

Anything else?

Thanks for reading my application.

Why should we pick you?

I've given a huge amount of my personal to the site and continue to do so actively. I'm an extremely active member and 90% of my posts give an immense amount of value. The other 10% is just basic socializing and joking around which is valuable in its own way. If you want an awesome guy that's active and knowledgeable in a lot of fields, you should pick me up.

What do you expect of Enigma?

I really except some new friends and new experiences to learn.

I came to HF to learn and absorb as much as I can for the future to try and further myself as a human being. I saw the huge amount of potential that Hackforums brought to the table and I was engulfed by this experience. I spend most of my time on HF making money and learning as much as I can.

Why should we pick you?

I feel like I can bring knowledge to the table and as well as help on numerous different topics. I know more than my skills listed, but not enough to call them skills. I like to think I'm a chill guy who just wants to learn and make money, and I feel like I can help the group and the group can help me. Hopefully being able to start on some new projects with some members of the group if I get accepted so I'll be trying to help out.

Anything Else?

I have lots of time and lots of learning stamina, so if you need something to get done, I'll learn how to do it and get started. I benefit from learning, and you benefit by having the work get done. Don't get me wrong, I won't do everything you say, I have my limits and my own things I need done, but if you need somebody to lend a hand I'll be your guy.

I enjoy giving contributions to the Hack Forums community and I plan on doing at least 1 contribution each month. I like to set goals for myself so I can achieve them and broaden my horizons. I also vow to only make quality posts and threads/contributions weather it be in the subforum or out of it. I can admit that I'm not perfect, I'm not a god in any of the skills I have listed above, I know I have room to grow, and by joining Enigma I feel as if I will not only learn more in the skills I have listed above, but I will also be able to help other members learn as well.

Anything Else?

Thank you for taking the time to read my application, if I'm not accepted then no hard feelings! I know you will give my spot to a more deserving applicant.

I've made a large amount of contributions to the eWhoring section as well that can be seen my profile (don't see the need to link all of them).

Why should we pick you?

I think I would make a good fit for this group because I am always online to help group members with whatever I can and will contribute to group projects whenever possible. I'm a really chill, laid back guy and will be very active in the sf and also think I bring a lot of knowledge that I can share with members of the group.

Anything Else?

AS I mentioned above me being inactive in the group will not be something you have to worry about, if accepted I'd be losing forward to working on projects with group members. Overall I'm very easy to get along with and enjoy helping others wherever possible.

Thanks for taking time to consider me.

What do you expect of Enigma?

An elite group of coders that have programming knowledge that can share their experiences, research, projects, etc., in IT with me. I want to join a group that is active and contributes to helping members who are trying to learn computer programming.

Specific Skills?

Java, JEE 7, JSF, Prime Faces, hibernate, CDI, Html, CSS, Java Script etc.

Please list contributions you have made to HF:

I have been on HF for over 6 years and involved with reselling of many products. Such as the sk1d products and blackout AIO. Though these have ended and no longer supported, these were very popular back in early 2011 that I provided support for.

The issue with reselling and why I stopped coming back to HF was that I was tired of the scamming. Joker, the owner of Sk1d, was backdooring his product and infected many members. I made a thread originally with screenshots and had him banned. The second time around, with Blackout AIO, Gamepro was the owner, and he simply just stopped replying and went off the grid. At this point, I've had so many PMs and IM messages up that I didn't know what to do. I couldn't even refund customers, because all I did was provide support.

A couple of years later, BlackShades was released and I thought wow, a product that looks good and will probably last. I decided to wait to see if it would last. Then about 6 months after, it got shut down by the FBI.

Though I haven't contributed much to the forum as I did to my own wallet, at least I didn't give up on helping members and runaway with the money. I love helping members and making sure that what they pay for, is the real deal, and won't have to worry about being infected.

Why should we pick you?

I feel like I can bring many things to the group. I know more than the skills and languages that I've

listed,

but I know much more and I'm 24 and have many years of experience under my belt and certifications. I'm an active member who wants to grow and share my knowledge with the group. Let's grow together!

Anything Else?

I graduated in CS. I do QA. I do manual testing along with automation testing using Selenium web driver using Java. QA is interesting and my dad's friend told me about it. I started off with getting an internship with QA while being in school. Now I'm in a full-time role. QA pays good. But just like with any position, if you're in a junior-senior level, it pays really good. It's a good start for a CS major either. I have over 3 years of QA work experience and enjoy every second of it. I've been also teaching others about QA and how it's a perfect career path for anyone who's interested.

So, are Enigma looking for looking for service providers in favor of the group?

I am looking for a group where I can have my own thread design or signature service (free of charge) only for members within the user group.

I do not have my graphics service open, so I got time for free work. Right now I am doing works on the free section and small projects like [this](#) one. If Enigma is looking for it, I will toss together an application.

Please list contributions you have made to HF:I'm quite active on the market place section assisting other HF members

Helping people make programs for there needs as well.

Why should we pick you?

I am currently trying to expand my skills in many shapes and forms. I am a relaxed individual and just like to make conversation and help people if they need anything that I can assist them with. Hopefully If I am skilled enough in a certain area I can help out on projects and more. I also know alot about prices.

Anything Else?

I am always willing to learn new traits and expand in many ways and always willing to obtain more knowledge

What do you expect of Enigma?

I assume Enigma will provide me with a distinctive and beneficial experience that will encircle in relation to the various technological information that is prevalent for me to have a better understanding of life. I would like to join Enigma and be welcomed by people whom I share interests with. I seek for access to the actives held, discussions, tutorials. Also, I expect to engage Enigma's community not only to provide assistance, but to absorb knowledge from those who are experienced in subjects I'm not too shabby with. I continuously strive to intensify my knowledge base, and I hope to be able to achieve that here.

Specific Skills?

- I'm an aspiring psychologist, so I can offer immaculate and beneficial advice.
- Dexterous writer
- Extremely skilled first person shooter and gamer in general.
- Excellent at managing money and generally anything business related.
- Above average understanding of technology (however, the reason I am applying is to develop in this area).

Please list contributions you have made to HF:

(CHECK [REPUTATION](#), I HAVE YET TO CONTRIBUTE GIVEAWAYS, HOWEVER I HAVE DONATED IMMACULATE VALUES OF BTC.)

Why should we pick you?

I'm a 17 year old British student completing my 2nd year of Network & System Operations. I hope to pursue in expanding my knowledge of computing. Therefore, I have collected a large amount of information relating to technology however, I wish to join Enigma to help me expand on it and this will help me for my career, which I believe is unique on a forum that predominantly consists of those interested in computer science / programming based skills and devices. I am also extremely knowledgeable upon gaming. As stated previously, I do have an above average concept of technology, and I firmly believe that I can quickly develop in this area if given access to a group based on technology.

I was also ranked 1st in my county (or state for you Americans) for the achievements I have accumulated in boxing over the years.

The general theme from the preceding is that I have the mind set to be great. Therefore, I will be a productive member who is actively engaged in improving myself, and other individuals in the group, through my inner group interactions and my interactions, that are representative of the group and to the community.

SIM-1472133 - May 15, 2016, 8:58 pm

What do you expect of Enigma?

I am 100% willing to help out the group in any way possible

I feel like I can help the group and the group can help me.

if I get accepted so I'll be trying to help out.

Anything Else?

The reason I am on hackforums is simply just to grab a decent understanding of hacking and coding, and maybe have a bit of fun here and there, and make some money on the side.

I'll be active pretty much all day long, everyday. I have nothing I got to do so i'm free pretty much all the time and i'm on Hackforums daily.

FlowDesigns - May 19, 2016, 10:35 am

What do you expect of Enigma?

Enigma seems to be a HQ group. I would love to be part of a group with knowledge and skill to contribute myself and receive help when needed.

Specific Skills?Social Engineering

Good CS:GO player

Above average understanding of technology (improving massively right now)

Beginner Coder

Please list contributions you have made to HF:[\(Graphics\) \[NEW\] FlowDesigns | PayPal/BTC \(project is frozen\)](#)

Why should we pick you?

I'm in my 20s, currently learning Computer Science, Programming Language Java and some other random stuff.

Not specialized yet since I want to get to know more about the subject and how I perform personally.

I am a lurker who contributes only when it benefits others or myself.

Anything Else?

Thanks for building up this group.

Also nice logo ;)

Mr. Monkey - May 19, 2016, 1:09 pm

What do you expect of Enigma?

I expect from this group to:

Be a place where I can find faithful friend\partners.

Grant me new knowledge and experiences.

Having fun!

Specific Skills?

Developer:C\C++ (Mostly for network stuff or if I write hooks)

JAVA (When the stuff I am trying to do is hard enough like Machine Learning...)

C# (I use ASP.Net for web apps)

HTML, CSS, JavaScript (I don't think these count as skill though...)

Designer:Adobe Illustrator (Created my avatar for example)

Adobe Photoshop

Adobe After Effects

Please list contributions you have made to HF:[\[FREE\] 210GB of HD Images \[FREE\] \[EXPLOIT\] \[EASY\] Kahoot.it - Gets the answers to a quiz](#)

Why should we pick you?

I have wide range knowledge, from "fun facts" to hard core C hooks writing.

I am an autodidact and use search engines very efficiently, which means I handle problems quick.

If I deiced to do something, it will be done.

Anything Else?

I am finishing now my 2nd year in Computer Science, in about 2 months I will be done with my finals and have a lot of time to work on projects, so I am dedicating some of my time (Exactly what I am doing right now) to find interesting projects to work on in the summer and I hoped you are the right address for that.

[\$(5)\$] - May 21, 2016, 1:15 am

What do you expect of Enigma?

I am expecting a fun, friendly, and active environment where I can better myself and help others better themselves as well. I absolutely love being apart of a group that is close knit and likes to assist eachother in any way possible. From the many posts I've seen of the Enigma group I think that it will be able to meet my expectations and more.

Specific Skills?Server Management

Customer Service

Marketing

Social Media Growth

Project Management

Marijuana/Vices Knowledge/irl business of growing Marijuana (legally)

Stress Testing

<https://hackforums.net/showthread.php?tid=3824908>
<https://hackforums.net/showthread.php?tid=5005930>

Why should we pick you?

I believe that I have the potential to help others within the group grow and also be of assistance with projects that require hosting/hosting services. My customer service skills and ability to manage projects, businesses, and situations would also allow me to assist nearly all aspects of the group to keep it organized and well addressed. I enjoy assisting anyone that ever requires it as long as I'm fit to do so. I've read that the group is extremely close in a few threads, and that the group stands for unification of those who are like minded as the group and I think that is a big part as to why I think I'd fit in with this group. Team work is something that I adore participating in.

Anything Else?

I am extremely active and can be even more active than I am currently if assigned a task or required to be online for something. I love to participate in anything I'm able to. I have worked in many real-life customer service environments, including but not limited to call-centers, retail, credit sales, and restaurant service. I believe my work experience has strongly contributed to my work ethic online as well which makes me that much more dedicated to projects I'm apart of.
