Thread: [\[ps.php\] - light-weight port scanner - gotta get those 50posts](#)

ImDeepWithWindows - April 15, 2016, 12:49 am

im mostly posting this to get that first 50 posts so i can psot in market place section and include urls in my posts

here it is a port scanner written in php (yes i know this is rookie stuff like i said rushing to 50 posts)

```
Code <?php
if (!$_REQUEST['targ']) {
    echo "target will see you as: [".$_SERVER['SERVER_ADDR']."]<br/> and maybe:
    [".$_SERVER['SERVER_NAME']."]<br/>";
    echo "<form method=REQUEST ><input type=text name=targ value=tcp:// /><input type=submit
    value=scan />";
} else {
    $targ = $_REQUEST['targ'];
    echo "scanning [ ".$_REQUEST['targ']. " ] ...<br/>\r\n<hr/>\r\nlist of open ports:<br/>\r\n";
    for ($p = 1; $p < 1000; $p++) {
        if (@$conn = fsockopen($targ,$p,$errno, $errstr, 2)) {
            echo "open port: [ ".$p." ]<br/>\r\n";
            fclose($conn);
        }
    }
    echo "<hr/>\r\ndone scanning<br/>\r\n<form method=REQUEST ><input type=submit
    value=NewScan /><br/>\r\n";
}
?>
```

Please stop sharing this kind of script, they suck and are useless.

3yZtwgIFSCUs - April 15, 2016, 3:11 am

this are like snippet why not share the whole thing
