Thread: [\[Free\]Email Spoofer - Directly to the Inbox.](#)

xLelouch - April 15, 2016, 4:07 am

Hey there,

I just wanted to give something back to the community. Pretty simple thing but I will have to limit usage of this because hosting will get blacklisted and mails will start going to spam folder.

Heres what it looks like when you receive email.

Requirements -

Ub3R - Positive Reputation , No open scam reports

L33t - 25+ Reputation, No open scam reports

Normal - 50+ Reputation , No open scam reports

I know even I don't have that much reputation I can't help it.I really don't want to restrict usage like that but I'm sorry I can't do anything about it because I use this host for my personal purposes.

Rules -

For educational purposes only.

Never use this for BM.

Never use this to scam someone.

Tested on Gmail only

If my web server changed I will only give it to people who posted feedback in thread / said thanks. So after using the spoofer please come back and leave feedback / say thanks. It will help to keep the service alive.

Post here and [Private message me](#) to get the link.

haxf4rall - April 15, 2016, 6:09 am

Neos07 - April 15, 2016, 7:56 am

Vouch, it works great.

I thought it was a program, so maybe it doesn't belong to this section.

dopepizza - April 15, 2016, 8:35 am

This works really well, thank you.

Blue Sapphire - April 15, 2016, 10:59 am

Would love to take a copy,
Thanks in advance.

dopepizza - April 15, 2016, 12:15 pm

EDIT:

khurram002 - April 15, 2016, 11:35 pm

xLelouch - April 16, 2016, 1:33 am

Glad everyone enjoy the service. ?

(Apr 15, 2016 07:56 AM)Neos07 Wrote: [\[CITE\]](#) Vouch, it works great.

I thought it was a program, so maybe it doesn't belong to this section. Its just a website. I don't really know where to post. Almost every program uses web link but they use program for licensing . This is free so I don't think I need to spend my time making a program

(Apr 15, 2016 12:15 PM)dopepizza Wrote: [\[CITE\]](#) And... It already doesn't even work anymore. Had some issue with the host. Updated Link. If anyone didn't receive the new link please PM again.

Skidy - April 16, 2016, 6:28 am

Thank you guys. Hope you enjoy the service.

babayaga2600 - April 16, 2016, 5:38 pm

It shouldn't really be too hard to write a PHP script and find a free hosting and then just reupload the script. Does this have some kind of Web GUI or is it just for people who don't know how basic email spoofing works?

Hello, I've received a copy, yesterday, and now i'm actually surprised on what i got,

This is not an application, so you don't need to worry about running it on Vm, Op was actually kind enough, to share his host with us, and actually let us use it, i have tested this, its flawless, the Site Is Stable, Would vouch for this , If op thought of selling this he could make alot of profit.

WakenBake - June 13, 2016, 12:54 pm
