Thread: [A Simple Deface page maker php script made by me!!! No need to code by urself](#)

vanbookpro - April 16, 2016, 5:59 am

Welcome Everyone ^_^
I am not so good in writing codes but I successfully made a php script by using it u can made a Deface page without coding!

Just add the details as your wish and you will get the output file named as "Deface.html" in the same directory.

Note: php is a server side language so you must upload it to a server!

PHP Code

```
<?php
