Thread: [Tabbed Menu Support](#)

Potttioojm - April 16, 2016, 1:05 pm

How do you get a nice tabbed menu? Been following tutorials, and uploading applications, and could never find one that looks good.
Edit: Since I cannot post images, I am getting a tabbed menu that is white, and does not work with a dark theme.

Would be nice if someone could point me in the right direction. Wanting it to look something like
I am looking for something like NulledBB.com, DemonForums.net, ect
Was hoping someone from here would be able to help me.

You may not be able to post images or links but you can just give us the image link without the http.

Either way I think he's looking for something like the HF tabs.

| +Common | -Hack | -Tech | -Code | -etc |

Shows Active "Common", even though all sections are actually already loaded on the page.

This is the plugin you're looking for <http://community.mybb.com/mods.php?action=view&pid=456>
After installing it, change its CSS to fit your website. If you have no clue about CSS, you can always hire someone to do it for you.

VirtualFrost - May 13, 2016, 7:34 am

MyTabs is the plugin, you just need to learn how to make it look better with CSS. They're all just heavily changed to look different.

You're going to need to install Tabbed Menu, it's made by Omniscient and can be downloaded at MyBBCentral.com.
Once you've downloaded, installed and configured it you will then need to change the CSS to look like those forums.
