Thread: [Booter stop button](#)

Drunkatwork - April 17, 2016, 1:36 am

Hello guys,

So i just finished creating <http://booter.eu>

Autobuy, attacks (l4&7) working @ 5gbps & 10k r/s

But now i need to code a stop attack Button and have no idea Where to start

Do you guys have a existing code i can modify?

Thanks ?

ma?ns - April 17, 2016, 2:10 am

I can help you with this. Send me a PM with ur skype

Description - April 17, 2016, 2:27 am

Can i ask why everything is so cheap? shells? i don't see how this can have any power

Done.

I know this but the stop Button on the source i dont know.

And these hacked linux boxes are all 50mbit spoofed servers.

And these hacked linux boxes are all 50mbit spoofed servers.50mbit huh. You might actually take down a home connection with that initial BW.

So let me get this straight? You coded the attack methods and attack button but have no idea how to make a stop button which is a lot easier? It is literally the same code as the attack except it executes a different command?

Lammers - April 17, 2016, 3:30 am

og domain but skid own this.

vouch for ur 10gb tn lmaoo

btw nice rethemed of fagbooter

hey,

how is ur protection with ovh? My 5 memes are haxors

check-host.net/check-report/eadfda

Exitus - April 17, 2016, 4:22 am

Vouch for this stresser, bought a package hits hard af

"5 memes" no offence but don't try to be a 'top kek' haxor. As you can easily take it down with a vps 5-10k r/s using apache bench. <https://check-host.net/check-report/eae35a> . And for OP I highly suggest you upgrade to cloudflare for example or something else that will get the job done.

Vicci - April 17, 2016, 5:37 am

Haha lol. How is upgrading to Cloudflare gonna help him with the stop button???

Legion - April 17, 2016, 5:44 am

If you can't make a simple stop button you shouldn't even be running a stresser.

BekerMelk™ - April 17, 2016, 5:45 am

Can't connect to the website, this is the reason you don't advertise at HF without good protection ;) (I hope for you that the downtime is fixed soon.)

PS. I can help you with the stop button, PM me.
