sent you a pm

Judicious? - April 19, 2016, 5:24 pm

I have one that's got a + sign but I can't use the email functionality on it. How did you accomplish this?

i know what you are saying, i would say it only depends on you luck. I also have lots of + ids that dont have email functionality but this one has it. i+ << is super og now i guess.
if you could fine a way to fix the email functionality let me know too
