aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa

vfragtasticv - April 17, 2016, 10:43 am

ciphertext first time I hear this shit

ps:. first comment

ps:. first comment

Ciphertext just means the atom-128 output. So start with atom

SpanishCat - April 17, 2016, 11:33 am

I am sketchy about this crypter...it runs a "Client (.32 Bit)" everytime I open this...so...please explain this?

And It has an "Anti-Sandboxie" thingy...which means I can't open it in sandboxie :P

I would NOT download this if I was you.

client? what ?

the anti's mean the output cannot be run in a vm, sandboxie or with wireshark open

? also I would not be a dick and try and infect members if that's what you think

SIM-2460067 - April 17, 2016, 9:14 pm

Getting a 404 not found when clicking on Download, mind uploading elsewhere.

vfragtasticv - April 18, 2016, 6:07 am

Hmm wtf ?

Its just stuck and take so much CPU power.

L33tness - April 19, 2016, 2:50 am

Damn man!!! Why must it not work with LLink!?!? LOL

iLogic™ - April 19, 2016, 3:31 am

LOLLuminosityLink's stub is big.

BIGLEECHER241 - April 19, 2016, 2:06 pm

Lol nice password. and btw Thank you!

parafox - April 19, 2016, 3:48 pm

It looks nice, its worth a try

manjgala - April 19, 2016, 4:24 pm

Hello, I'm not able to pm you so can you please pm me the key?

iLogic™ - April 19, 2016, 9:47 pm

(Apr 19, 2016 10:34 AM)Blezzedd Wrote: [\[CITE\]](#) The function I use to turn the file into a image (for FUD storage) does not work on anything over 50kb (unless you have a crazy fast computer)

?File into image ? Nice method ?

gnomek022 - April 20, 2016, 2:39 am

Hi am not able to PM You, can I give a some password, or link to download ?

Im don't find decrypter for (ciphertext)

Best regards

anonym - April 20, 2016, 5:46 am

Can you PM me with the key? Thanks!

vfragtasticv - April 20, 2016, 7:13 am

No pm no key for skids. anti-skid security :)

Slavoj Žižek - April 21, 2016, 7:49 am

I WILL NOT PM YOU THE KEY IF YOU ARE NOT UPGRADED / TRUSTED

STOP ASKING

iLogic™ - April 21, 2016, 7:53 am

STOP ASKINGGreat decision ?

IntelCore8700K - April 21, 2016, 8:07 am

Yeah I get the 404 error too when clicking on download :(

manjgala - April 21, 2016, 7:29 pm

The most illogical system I've ever seen. You don't give .RAR password to anyone until they haven't spent 18 bucks for to get there account trusted? Where's the logic? If you're selling your crypter just say it. I can't understand how a person who has "bought a trust" can be trusted...

because non - upgraded members are ether banned from hf so they made another one or got banned from a shitty forum then came over here (sorry to the actually legit non - upgraded members)

I trust upgraded members because they like and trust the forum to a point where they want to upgrade their rank ?
