Thread: [Regulus Skype Impersonator "regulos" - Do NOT Deal With This Skype! \[READ THIS!\]](#)

Regulus - April 18, 2016, 8:58 am

Hello there. So I thought i'd open this up to make a community alert against someone that's impersonating me on Skype.

I was gonna do a middleman deal with a user on here and someone else who didn't even want to PM me confirming the deal, so I turned down the deal and he was trying to scam the other user by impersonating me on Skype with a different name.

My REAL and ONLY Skype is: regulushf
Skype Impersonator Name: reguloshf

Here's a screenshot of impersonator trying to scam the other guy:

Notice the reguloshf instead of regulushf?

Do NOT deal with this Skype at any costs.
I don't wanna get into trouble because someone is trying to impersonate me on Skype and scam others.

Here's also a screenshot of him trying to say he didn't get any messages so he would add me to another group chat:

I do not know who this user is or if he's even on Hackforums but i'm pretty sure he is.
Just wanted to make this for a heads up.

Just make sure people PM you to confirm the deal and you should be fine ?

If they choose not to do that, that's their problem.

I hope I don't have any impersonators... ?

Yes it really sucks. I hope no one is being scammed by this account.

I'll contact Skype about it now as well to see if they can do something about it.

Regulos hahaha, doesn't even remotely look legit to your name. Hope he doesn't manage to pull off a scam though.
