Thread: [Scraping Lists of Images, Free.](#)

Netflix and Weed - April 20, 2016, 3:13 pm

Hello fellow members, I figured I would do this as a free service if you guys want.

If you have a page with a mass amount of images you would like I'll grab them and send you a list of them.

Some sites it will not work on as the tool may not be able to remotely access the site. The tool is 100% custom coded and I will not be giving it away.

Here is an example list.

Does it get any extension or only the pictures with .jpg extension?
