Thread: [Any decent Satoshimines bots?](#)

Delupara - April 21, 2016, 3:18 pm

I'm looking to buy one since I'm too lazy to code one.

All of the one I've seen have shit increase option or doesn't offer multiple ways to stop the bot.

Any actual decent SM bots?

Edit: If the bot could do custom increases like satoshi panel, I'd be sold.

BahNahNah - April 21, 2016, 3:19 pm

Have you seen this one? Its free.

It seems "meh" not to offend you.

the only thing that jumped to me is multigame, pretty nice touch

I'll give it a shot and look at the options.

Many of the satoshi bots on the market are just reskins of that bot.

+Celeron - April 21, 2016, 3:27 pm

I'll give you the source to one at a decent price,

let me know

Delupara - April 21, 2016, 3:41 pm

I don't even have a preview.

No preview, no bueno.

BahNahNah - April 21, 2016, 3:47 pm

I also have this one:

Spoiler [\(Click to View\)](#)

I was planning to give it away at some point, but never got around to it

Or i can make you a custom one.
People really need to stop paying for these bots.

+Celeron - April 21, 2016, 3:52 pm

OP, if you want an amazing bot with full customization and stop ignoring my pms/being a dickhead,
let me know.

i mean like I said I could make one, but Lazyness and C being a bitch to network programming
really push me off.

Please gimme ?

Rich Uncle Pennybags - April 21, 2016, 4:00 pm

Can I try out one of those bots as well? I'll PM both of you.

Delupara - April 21, 2016, 4:06 pm

- 1.You have about 600 posts and directly PM me, sounds shady.
- 2.You got a scammer rep by vape, user which I know and trust.
- 3.You ask for skype yet I don't use skype. I thought everyone knew skype is broken as hell in terms of security. XMPP has always been more safe.
4. Bahnahnah said it himself. people should not pay for bots, even though I know people will do it, so I don't really care.

EDIT: 5. tries to give me Satoshi-panel's source.... Even though everyone knows it's backdoored as hell.

EDIT: 6. User claims to know the original coder and says there's no backdoored because it's the source. alright bro.

you do realize that scam report by vape is completely invalid? if you think that's legit then your as dumb as he is.

lol

If you want to do make a custom bot that isnt complicated, you can use the api on the bot thread.

Spoiler [\(Click to View\)](#)

ANSI C, not C#.

I don't know shit about C#

I told you in PM, there's no custom Increment.

I can't set a fixed bet based on my loses. If you add it, I'll get it.

Otherwise, out.

I didn't know that was you lol but I was in the process of adding it. It has been added now. You can add unlimited custom increments. Here's the most current settings in the bot so far :)

Reece Morgan - April 22, 2016, 3:34 am

You want something to automatically lose your money for you? Why..

Delupara - April 22, 2016, 5:39 am

(Apr 22, 2016 03:34 AM)Reece Morgan Wrote: [\[CITE\]](#) You want something to automatically lose your money for you? Why..

Because the money I bet is money I don't care about.

Win some, loose some, whatever lol. I just don't wanna waste my time doing it by myself.

Cecilia - April 22, 2016, 7:34 am

PM me OP. I'll give you a version of Satoshi Panel with the backdoor removed.

Delupara - April 22, 2016, 9:50 am

Isn't the fun of gambling to actually.. gamble? So if your not having fun doing this, and you don't care about the money, why not donate it to a charity where it could quite literally save lives? No? I very much doubt you simply don't care about the money, and the only reason I can see for somebody wishing to automate 'fun' is because of some misguided belief that they can profit from it.
